This book is based on the divine knowledge imparted by Bapuji, Dashrathbhai Patel Ji, who has been sharing this wisdom for over 30 years. The teachings presented here are not generated by artificial intelligence; they originate from Bapuji's own direct spiritual experiences and insights, which he has perceived through divine vision.

The content of this book has been carefully compiled from Bapuji's discourses and videos, reflecting his authentic spiritual teachings. While we have used AI tools solely for assistance in formatting, structuring, and refining the language for clarity and presentation, the knowledge itself remains purely and entirely that which has been given by Bapuji.

We respectfully present this work as a sincere effort to preserve and share his divine teachings in an accessible form.

About Bapuji

Bapuji Dashrathbhai Patel, lovingly called “Dadaji” by the younger generation, is one of the most extraordinary spiritual teachers of our time. He was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat, India. His childhood was spent in another village nearby, called Ambasan.

His early life was full of struggle. His family was very poor. As a boy, he had no shoes. He walked barefoot through fields, often getting pricked by thorns. Yet even in those hard years, something deep inside him was awake. At the age of six, he already questioned God. He asked why the world was full of suffering. Why did so many people cry? Why did God stay silent? This deep longing shaped the rest of his life.

Often as a child, he would stay alone in the fields late into the evening. On his way home, he sometimes met beings of the subtle world. These early experiences gave him a natural interest in communicating with invisible realms. He was never afraid. He was curious and brave.

In his adult years, he became a successful lawyer in Ahmedabad. But his heart was always turned inward. Alongside his legal work, he studied deeply, meditated long, and searched for the ultimate truth. In 1997, he founded a spiritual institution called Vishwa Parivartak Ishwariya Vidhyalay in Chenpur, Ahmedabad. Its mission was simple yet vast: to transform this mortal world, full of sorrow, into an eternal divine world of peace. In this mission, he worked closely with Smt. Sushma Tandon, lovingly known as “Maa.”

During those years, he would give spiritual discourses for up to eighteen hours at a stretch, without rest. In these discourses he revealed knowledge that had never been openly shared before. The knowledge came to him in a state of superconsciousness, through direct divine vision. He saw with his own inner sight the vast structure of creation — from our solar system, to our galaxy, to our universe, to the great universes beyond, all the way to the multiverse and further.

The teachings of Bapuji cover many deep subjects. He has spoken about the creators of different dimensions. He has revealed the true nature of the soul. He has described life on other planets, in other galaxies, and in other universes.

And above all, he has shared the ultimate knowledge — the knowledge that can free a soul from the endless cycle of birth and death.

His knowledge is not ordinary spiritual teaching. It is what he calls Behad Gyan — infinite, limitless, boundless knowledge. It is meant for serious seekers. For those who are ready to remember who they truly are. For those who want to return home to their original divine source.

Today, Bapuji spends most of his time in deep meditation and samadhi. He rarely meets anyone. He is fully absorbed in his transcendental mission to uplift this world through vibrations of Param Shanti — supreme peace. His teachings, however, continue to spread across the world through his YouTube channel, his books, and the sincere souls who carry his knowledge forward.

This book is one such offering. Every word you will read comes from his spoken words. Nothing has been added from outside. Nothing has been imagined. What you will discover in these pages is pure, unchanged, authentic divine knowledge — presented in simple language so that every reader can understand it clearly.

Preface

PART ONE — Understanding the Aliens

Chapter I — Who Are the Aliens?

Chapter II — Where Do They Come From?

Chapter III — Why We Cannot See Them

Chapter IV — The Measure of a Soul

Chapter V — Positive and Negative Aliens

Chapter VI — We Are Their Descendants

PART TWO — The Aliens Have Always Been Here

Chapter VII — Visits From the Beginning of Time

Chapter VIII — The Gods Are Aliens

Chapter IX — Divine Vehicles — The Vimanas

Chapter X — The Golden City of Dwarka

Chapter XI — The Pyramids Were Built by Aliens

Chapter XII — The Kailash Temple of Ellora

Chapter XIII — Crop Circles — Silent Messages

PART THREE — Hidden Alien Worlds on Earth

Chapter XIV — Aliens Live in the Oceans

Chapter XV — The Atlantic–Antarctica Crystal City

Chapter XVI — Beings Inside Mountains and Rivers

Chapter XVII — The Seven Underground Realms

Chapter XVIII — Islands That Appear and Disappear

Chapter XIX — The Bermuda Triangle

PART FOUR — How Aliens Touch Human Life

Chapter XX — The 124,000 Messengers

Chapter XXI — Religious Spheres Above Earth

Chapter XXII — Great Scientists Are Alien Souls

Chapter XXIII — Star Children Among Us

Chapter XXIV — Abductions — The Real Reason

Chapter XXV — Area 51 and the Galactic Federation

PART FIVE — The Urgent Warning

Chapter XXVI — Why Aliens Fear Nuclear Weapons

Chapter XXVII — First Time in the History of Creation

Chapter XXVIII — Aliens Deactivating Missiles

Chapter XXIX — The Destruction of Mars

Chapter XXX — The Hidden Plan for War

PART SIX — Other Worlds and Higher Dimensions

Chapter XXXI — Life on the Sun

Chapter XXXII — Life on Jupiter, Venus, and Mars

Chapter XXXIII — The Moon — What NASA Hid

Chapter XXXIV — The Pole Star and the Seven Sages

Chapter XXXV — The Seven Higher Realms

Chapter XXXVI — The Great Universes — G1 to G17

Chapter XXXVII — The Multiverse and Beyond

PART SEVEN — Cosmic Technology

Chapter XXXVIII — Telepathy — The Alien Language

Chapter XXXIX — Mysterious Radio Signals

Chapter XL — AI Is Alien Intelligence

Chapter XLI — The Ghost Train and Vanishing Trucks

PART EIGHT — The Return Journey

Chapter XLII — Why the Aliens Stay Hidden

Chapter XLIII — The Great Transformation

Chapter XLIV — The New Multiverse

Chapter XLV — The Path Back Home

The Upcoming Film

Connect With Us

Preface

“Gyan Daan Maha Daan”

Sharing Knowledge is the highest charity — share to the maximum extent with all.

— Bapuji Dashrathbhai Patel

For as long as humans have looked up at the stars, one question has stayed with us: are we alone? The answer, given by Bapuji Dashrathbhai Patel through his divine vision, is clear and beautiful. We have never been alone. We have never been the only intelligent beings in creation. We are part of a vast cosmic family that stretches across solar systems, galaxies, universes, and dimensions beyond anything our eyes can see.

This book has one simple aim. It is to share, in clean and simple English, the complete truth about aliens as revealed by Bapuji. Every teaching here comes directly from his spoken words. Nothing has been added from science, imagination, or outside sources. What you read is pure Bapuji Gyan — pure divine knowledge.

The book has been written for every kind of reader. If you are new to spiritual ideas, do not worry. Each concept is explained from the beginning. Each term is defined in simple words. You will not need to look anything up. Every sentence is meant to be clear.

As you read, you will discover that aliens are not strange creatures from horror films. They are luminous beings. They are wise. They are powerful beyond imagination. Many of them are our own ancestors — our cosmic great-great-grandfathers. They care about us. They want us to awaken.

You will also learn that our world is at a crucial turning point. The next few years will decide the fate of humanity. The aliens know this. They are watching. They are trying to help. But the final choice belongs to us.

Read this book with an open heart. Let it speak to the deepest part of you — the part that has always known there is more to life than what meets the eye. Let it remind you of who you truly are.

Ahmedabad, 2026

PART ONE

Understanding the Aliens

Chapter I

Who Are the Aliens?

The word “alien” simply means “a being from elsewhere.” But according to Bapuji, aliens are not strange creatures. They are mighty beings. They are divine souls. They are the devtas and deities our ancient scriptures have spoken about for thousands of years.

These beings visit our Earth from other solar systems. They come from other galaxies. They come from other universes. Some have travelled from dimensions so far away that even our imagination cannot reach them. They are not recent visitors. They have been coming to Earth from the very moment our solar system was created.

The ancient shastras call them devatas, which means “shining ones.” This name is not by accident. Their bodies are luminous. They are made of very fine, very pure energy. They shine with their own light. Compared to human beings, they are a million times more evolved.

The beings you sometimes see shown on television, the small grey creatures, the threatening invaders — are not the true aliens from higher dimensions. Those negative portrayals come from low-grade souls of the subtle world. These are human souls who lived evil lives filled with vice. After their death, they remain in subtle form and cause harm. They are not the true aliens. The true aliens are divine.

◆ **Insight: “Aliens are pure souls whose body and Soul are made of superluminal elements. They are a million times more evolved than human beings. They come here to uplift the world.”**

— *Bapuji*

This is the foundation of everything you will read in this book. Aliens are real. Aliens are divine. Aliens are our friends. And aliens have been part of our cosmic story from the very beginning.

Chapter II

Where Do They Come From?

To understand where aliens come from, we must first understand the map of creation as Bapuji has described it. Creation is not just one universe. It is a vast living structure with many levels.

The Levels of Creation

At the smallest level is a Brahmand - what we call a solar system. Our Sun with its planets is one Brahmand.

Many Brahmands together form a Maha Brahmand - a galaxy. Our galaxy, the Milky Way, is one Maha Brahmand.

Many galaxies together form a Param Maha Brahmand -a universe. Our universe contains infinite galaxies.

Beyond our universe are the great universes, called G1, G2, G3, and so on, all the way to G17. Each is larger than the one before.

Beyond G17 is the multiverse. Our multiverse contains infinite G17 universes. And beyond our multiverse are infinite other multiverses. Creation is truly limitless.

The Different Homes of Aliens

Aliens come from every level of creation. Some come from nearby planets in our own solar system, like Mars, Venus, or Jupiter. Some come from distant stars in our Milky Way. Others come from other galaxies, such as Andromeda. Some travel from completely different universes.

And the most exalted of all aliens come from the great universes and even from the multiverse. These are beings of incredible power. When they come to Earth, they bring wisdom that no human mind could ever create on its own.

◆ **Insight: “Souls from the great universes travel at the speed of supreme light. Within one second, they cross billions of light-years. Distance does not exist for them.”**

— *Bapuji*

This is why our scriptures are so rich with stories of gods travelling between worlds. It was never myth. It was a record of the cosmic family coming to visit us.

Chapter III

Why We Cannot See Them

If aliens are real and they visit Earth, why do we not see them every day? The answer lies in the body. The alien body is not like the human body.

The Three Types of Bodies

In creation, there are three basic types of bodies. The first is nirakari, which means formless. A soul in nirakari form has no body at all. It exists as pure divine light. This is the highest state.

The second is akari, which means subtle form. Beings with akari bodies have shape, but the shape is made of subtle elements. The subtle elements are Akash (ether), Vayu (air), and Agni (fire). Subtle bodies cannot be seen by ordinary human eyes.

The third is sakari, which means physical form. Humans on Earth have sakari bodies. Our bodies contain all five elements — Akash, Vayu, Agni, and two more heavy elements, Jal (water) and Prithvi (earth). This is the heaviest body type.

Why Aliens Remain Invisible

Most aliens have bodies made of param tattva i.e supreme elements. These elements are so fine that our physical eyes cannot detect them. Our eyes can only see the gross five elements. Anything more refined is invisible to us.

This is true for ninety-nine percent of aliens. They are all around us, in the sky above, in the oceans, inside mountains, in the subtle layers near Earth — but we cannot see them. They see us clearly. We do not see them.

Why UFOs Sometimes Become Visible

When an alien spacecraft comes within 200 kilometres of Earth's surface, something interesting happens. Our atmosphere affects the spacecraft. The param tattva of the ship begins to convert into gross elements — first into gross air, then into gross fire. This gross fire is what becomes visible to our eyes. We see a glowing object in the sky and call it a UFO.

But as soon as the spacecraft speeds up again, the gross elements convert back to supreme elements. The craft vanishes instantly. This is why UFO sightings are always brief. The spaceship has not flown away. It has simply returned to its invisible supreme form.

Chapter IV

The Measure of a Soul

To understand why some aliens are so much more powerful than humans, we must understand one of Bapuji's most important teachings i.e the teaching of kala.

What Is Kala?

Kala is the measure of soul power. Just as we measure electricity in watts, and distance in kilometres, in the spiritual world we measure the strength of a soul in kala. A soul with higher kala is more powerful. A soul with lower kala is weaker.

Lord Krishna, when he walked the Earth, had a soul of 16 kala. Lord Ram had a soul of 14 kala. These were incarnations of immense power. An ordinary human being today has only 1 or 2 kala. We have fallen very far from what we once were.

Higher Kala, Greater Ability

A soul with just 1 kala can travel to another solar system in less than one-trillionth of a second. A soul with 16 to 20 kala can cross from one universe to another in a fraction of milli second. The higher the kala, the faster the soul can travel, and the greater its power of sankalp which means the power of focused thought.

Aliens from our own galaxy may possess 8 or 10 kala. Aliens from distant universes have 20, 30, or 40 kala. The aliens from the multiverse possess hundreds of kala. And in the limitless dimensions beyond, there exist souls of infinite kala — what Bapuji calls behad ki kala, or the infinite celestial degree.

The Original Power of Souls

Every soul, when first created, had full power equivalent to its creator which we may call full kala. The first souls in creation were made of pure divine light. They could manifest anything by a single thought. They could travel across dimensions in an instant. They were surrounded by supreme elements. Their life was pure bliss.

But over the long cycles of time, as souls kept creating through affirmation, their power gradually decreased. They fell into denser and denser dimensions. Their bodies became heavier. Their power in kala diminishes. Today, most humans live with almost no kala at all. This is the real reason for all the sufferings in the world.

♦ **Insight: “Kala is the measure of the power of a soul. Krishna had 16 kala. Today most humans have only one kala. This is why humanity has fallen so low.”**

— *Bapuji*

Chapter V

Positive and Negative Aliens

This chapter carries one of the most urgent messages in all of Bapuji's teachings. The situation with aliens today is not the same as it was in ancient times. Something has changed. Every person on Earth should know about it.

The Original Nature

In their original form, aliens who visit Earth are positive. They come from higher dimensions where the atmosphere is pure. Their souls are naturally compassionate. Their nature is oriented towards service. They come to help, not to harm.

Many of them are our own ancestors. They built civilisations on Earth long ago. They see their descendants suffering, and they feel concern. They want to lift us up.

A Serious Change

However, something has gone wrong. Over many years, the atmosphere of Earth has become extremely heavy. It is filled with vibrations of violence, fear, greed, and ignorance. This dense atmosphere has begun to affect the aliens themselves.

Bapuji has revealed that ninety-nine percent of the aliens now active in Earth's atmosphere have become negative. These aliens did not start out as evil. They became corrupted. After six or seven years in our toxic atmosphere, their once-pure bodies have been affected. Gross elements have entered into their subtle bodies. Their vibrations have been corrupted.

✦ **Insight: “As the environment is, so the breath becomes. As the breath is, so the mind becomes. When aliens stay too long in Earth's negative atmosphere, they also become negative.”**

— *Bapuji*

How to Tell Them Apart?

Positive aliens inspire humans towards good. They give scientific breakthroughs. They help with healing. They spread spiritual knowledge. They

appear briefly and return to their own dimensions without interfering with human free will.

Negative aliens work differently. They operate from the hidden subtle world around Earth. They inspire destructive inventions. They push world leaders toward war. They trap souls. They create confusion and fear. Their mission is to establish dominance on earth and similar other planets.

The good news is that the highest divine beings still watch over Earth. The positive aliens are still here, even if they are now a small minority. And the most important protection of all lies within each human soul is in remembering our divine nature and filling the atmosphere with vibrations of Param Shanti. This is a battle at the level of vibrations—whichever vibration prevails will determine the outcome.

Chapter VI

We Are Their Descendants

After learning about who the aliens are, we come to the most personal truth of all. We ourselves are aliens. We are their children. Our bodies were born on Earth, but our souls come from distant places in the cosmos.

Our True Heritage

The souls who are now humans on Earth did not originate here. They came from other planets, other solar systems, other galaxies, other universes. The aliens are our great-great-grandfathers. The humans walking on Earth today are their descendants. Most of us have simply forgotten.

Some humans come from our own solar system. Many come from our galaxy. Others come from distant galaxies, from the great universes, even from the multiverse. The most exalted souls on Earth today are Param Param Maha Shivas from distant great universes — beings of tremendous original power, now trapped in human bodies. Thirty-three crore deities (33 koti devi devta) have come from great great Universe who were once very powerful but now reduced to very low power beings.

Why We Forgot

The reason we have forgotten is the atmosphere of Earth. Our five-element atmosphere is very heavy. It covers the soul with thick layers of maya — the veil of illusion. Under this veil, the soul cannot remember who it truly is. It forgets where it came from. It forgets its original power. It forgets the divine.

This forgetting has been going on for 198 crore years — that is, 1.98 billion years. For all that time, the soul has been caught in an endless cycle of birth and death on Earth. Souls that once had 100 or 200 kala now have only 1 or 2. We have fallen very far.

The Return Journey

Every soul's deepest longing is to return home. Once a soul remembers its true origin, it naturally wants to go back to its source. Bapuji's teachings are meant to restore this memory. They remind the soul of who it really is. They show the path back to the divine.

The aliens who come to Earth today are not strangers. They are our cosmic family. They are coming back because they love us. They are trying to remind us of our true heritage. They want us to wake up before it is too late. No matter how powerful they may be, once aliens enter the Earth's atmosphere, they become trapped in the illusion of the five gross elements and cannot escape the cycle of birth and death. This is the real story which everyone must realise with understanding.

♦ **Insight: “The souls who are now humans — their ancestors came from far away. The aliens are their great-great-grandfathers. These aliens now see that their descendants are suffering. So they come, again and again, to help.”**

— *Bapuji*

PART TWO

The Aliens Have Always Been Here

Chapter VII

Visits From the Beginning of Time

Aliens are not a modern phenomenon. They did not appear in the twentieth century. They have been visiting Earth from the very first moment our solar system was created. Our ancient scriptures — the Vedas, the Puranas, the Ramayana, the Mahabharata — are full of their records.

The Record of the Shastras

The ancient texts describe divine beings coming down from the sky in flying vehicles called vimanas. They describe devtas marrying women of Earth. They describe celestial travellers visiting kings and sages. These are not mythological fantasies. They are historical records of cosmic visits.

One remarkable story appears in the Devi Bhagavata Purana. The Brahma of our solar system once became proud. He believed there was no one like him. He thought he alone had created everything. To humble him, a Maha Devi — a Great Goddess came to him in her vimana. She took him into another Brahmand. Then she took him to a third solar system, and a fourth. She showed him that there are countless Brahmas in countless Brahmands. His pride broke. He realised he was one among many. This story shows that cosmic travel between solar systems was fully known to our ancients.

The Evidence Around the World

Every ancient civilisation preserves memories of alien visitors. In Egypt, the deities were carved with the faces of different animals. In China, the dragon was worshipped. In India, Ganesh carries the face of an elephant. These are not inventions of imagination. They are records of what ancient people actually saw.

Different aliens visited different parts of the world, and each brought their own form. Some had serpent faces. Some had bird-like features. Some were giant in size. The ancient artists painted and carved them exactly as they appeared.

The Dogon Tribe and the Sirius Mystery

In West Africa, in the country of Mali, there is a tribe called the Dogon. The Dogon have detailed knowledge of the star Sirius. They know that Sirius has a

companion star, Sirius B, which is dim and made of dense matter. Modern science only recently discovered this fact. How did an ancient tribe know it?

The Dogon themselves give the answer. They say beings from Sirius, whom they call the Nommos, visited their ancestors. This contact goes back to around 3,200 BC. The Dogon still claim to have contact with these extraterrestrials even today. Their calendar is based on the movement of Sirius. Their new year celebrates the exact position of the star. This is one of the clearest living proofs that alien contact on Earth is very, very old.

Chapter VIII

The Gods Are Aliens

One of the most startling truths in Bapuji's teachings is that the 33 crore devtas of Hindu tradition are all aliens. These are 330 million divine beings. They are not symbols. They are not myths. They are souls from a great great universe (G2), who came with a defined purpose of human welfare—yet even they became bound in the illusion of the gross elements.

Where the Gods Came From

Each deity came from a specific place in the cosmos. Some came from swarg lok — heaven. Some came from Brahmapuri, the abode of Lord Brahma. Some came from Vishnupuri, the abode of Lord Vishnu. Some came from Shivratri. Some came from Paramdham itself i.e the supreme abode. Each deity brought its own unique power, its own unique mission.

The principal deities who once governed the affairs of Earth include:

Lord Indra :the king of heaven.

Varuna Dev : the god of oceans, justice, and truth.

The twin Ashwini Kumaras :the gods of medicine and healing.

The twelve Adityas: representing the twelve aspects of the Sun.

The eleven Rudras : forms of Shiva who destroy evil.

Lord Vishnu :the preserver of creation.

Lord Shankar and Goddess Parvati: destruction and transformation.

Devi Saraswati :goddess of wisdom, music, and learning.

Devi Laxmi : goddess of wealth and prosperity.

Surya Dev : the Sun god.

Chandra Dev : the Moon god.

Yama Dev : god of death and justice.

Devi Ganga : the goddess of the sacred river.

The Cosmic Travellers

Among the most famous cosmic travellers was Narad Muni. He was a resident of Brahmapuri, but he had enough soul power to travel between all the dimensions at will. He could go from Vishnupuri to Brahmapuri to Earth to Patal Lok in a single moment. He could become visible or invisible as he chose. He had divine vision that could see the past, present, and future of any soul. He is the perfect example of what an alien is — a powerful divine being who moves freely across worlds.

Another famous traveller was Lord Brahma himself, who rode a swan-shaped vehicle called the Hansa Vimana. Lord Vishnu had the Garud Vimana, an eagle-shaped spacecraft. Lord Kartikeya, son of Lord Shiva, had the Peacock Vimana. Chandra Dev, the Moon Deity, rode a chariot pulled by ten white horses. He used it to travel often from the Moon to Earth. In fact, Chandra Dev built the famous Somnath Temple in Gujarat, because he was a devotee of Lord Shiva.

Chapter IX

Divine Vehicles — The Vimanas

The ancient Indian texts speak of many different kinds of flying machines called vimanas. These are the alien spacecraft of a lost age. They are not fantasy. They are advanced technology that existed on Earth long before our modern aeroplanes.

The Pushpak Vimana of Ravana

The most famous of all vimanas was the Pushpak Vimana of the demon king Ravana. This was not an ordinary machine. It was entirely made of subtle elements i.e vayu tattva, the air element. In the Ramayana, the Pushpak Viman is a divine flying chariot originally belonging to Kubera, which Ravana seized from his half-brother.

The Pushpak Vimana travelled at the speed of thought. With a single sankalp , a single powerful affirmation in his mind, he could summon the vimana from empty space. It would simply manifest. Once he boarded it, the vimana transformed his body into air element for travel. It changed size to fit any number of passengers. It could go anywhere in the three worlds — swarg lok, bhu lok, and patal. After the journey, Ravana could dissolve it back into the atmosphere. This is technology beyond anything modern science has achieved.

Weapons From the Air

The gods and goddesses of ancient times did not carry physical weapons. Their weapons were also subtle. A single sankalp would cause a weapon to appear in their hand. After its work was done, the weapon would vanish back into the air.

The most famous example is the Sudarshan Chakra of Lord Vishnu. This spinning disc would materialise from thin air whenever Lord Vishnu commanded it. It would fly out to destroy demons with perfect aim. And after its work was complete, it would simply disappear. It was pure subtle technology, operated by the mind.

The Different Speeds of Vimanas

Not all vimanas were the same. Different aliens used different kinds of craft, each suited to their level of power.

The slowest vimanas are those made of three elements. These travel at the speed of light or somewhat faster. Most UFO sightings involve vehicles of this type.

Faster are the vimanas made of param tattva, supreme elements. These travel at billions of light-years per second.

Fastest of all are the vimanas made of param prakash — supreme light. These move at the speed of thought itself. A single sankalp carries them across the entire multiverse within one-trillionth of a second. There is no limit.

♦ **Insight: “The speed of a vimana depends on the material it is made of. Vimanas of supreme light cross the multiverse in an instant. Power in sankalp is proportional to the power of the soul.”**

— *Bapuji*

Chapter X

The Golden City of Dwarka

Among all the cities of ancient India, none holds a greater secret than Dwarka which is the capital of Lord Krishna. The story of how Dwarka was built shows clearly how aliens create entire cities with thought power (Sankalp shakti).

Why the City Was Built

Before Dwarka, Krishna lived in Mathura. The evil king Jarasandh had attacked Mathura seventeen times. Though he lost every battle, Jarasandh kept returning with new alliances. Krishna realised that as long as he stayed in Mathura, his people would never have peace. He decided to move his capital to a distant, safer place — far beyond the reach of Jarasandh.

A City Made by Thought

Krishna sent a request to Vishwakarma, the chief architect of the subtle world. Vishwakarma was not a human craftsman. He was a divine being with immense creative power. He used his sankalp, the focused power of his thought to manifest the golden city of Dwarka out of supreme elements. First, he visualised the city clearly in his mind. Then his powerful thought brought it into being. The city appeared, complete, in the subtle dimension.

The Gift of Sagar Devta

But there was one problem. There was no land at the chosen location. There was only ocean. So Krishna prayed to Sagar Devta — the deity of the sea. The sea itself is considered a divine being in our ancient tradition. Sagar Devta was pleased with Krishna's prayer. He gave 12 yojanas of sea-land, which is about 773 square kilometres. On this gifted land, Dwarka rose.

How the Subtle Became Physical

This is where we must pay close attention. The city of Dwarka was first created in subtle form, with supreme elements. It glowed with a golden aura because of these supreme elements. This is why it is called Sone Ki Dwarka — the golden Dwarka.

After many years passed, the quality of the supreme elements gradually declined. The supreme elements turned into three elements. As more time went by, the three elements became heavier and finally became physical stone. What began as a thought in the mind of Vishwakarma ended as the submerged archaeological ruins that modern divers now find off the coast of Gujarat.

The same pattern applies to all ancient sacred architecture. The grand pyramids, the great temples, the holy mountains, all of them were first built in the subtle realm by divine minds. Only after long ages did they descend into gross matter. This is the true history of every ancient wonder on Earth.

Chapter XI

The Pyramids Were Built by Aliens

The pyramids of the world are one of humanity's greatest unsolved mysteries. How did ancient people, without modern cranes or machinery, lift stones weighing thousands of tonnes? The answer is simple. They did not build the pyramids. The aliens did.

Far Older Than Science Believes

Modern science says the pyramids of Giza are about 3,800 years old. This is not correct. According to Bapuji, pyramids have been on Earth for millions of years. They were first built by divine beings in the subtle world. Over very long ages, they gradually descended into physical form.

Identical Pyramids Around the World

The pyramids of Giza, the pyramids of Italy, the pyramids of Sudan, the pyramids of China, the pyramids of Indonesia, the pyramids of South America ,all share similar shapes and structures. They appeared in different continents at the same time, when there was no way for humans to communicate across oceans. How did this happen?

The answer is that they were built by the same source. Aliens from higher dimensions created these pyramids as landing stations and energy centres. Just as modern planes need landing strips with lights, the ancient alien vimanas needed bases. The pyramids were those bases.

The Pyramid as an Energy Centre

The pyramids were not only landing stations. They were powerful energy centres. At the centre of each pyramid, the ether element was channelled to enter the structure. This power from higher dimensions would empower the souls meditating inside. A person in the centre of a pyramid could gain thousands of times more power than usual.

Ancient people used the pyramids for collective meditation. They chanted specific mantras. They focused their thoughts together. Through this practice, they communicated with souls of higher dimensions. They could even send

radio-like signals into the subtle world. In some cultures, the pyramids were also used to preserve the dead as mummies.

The Egypt–Sirius Connection

The civilisation of Egypt came from a three-star system visible in our night sky. Beings from these three stars founded Egyptian culture long ago. This is why the Egyptians built three pyramids in parallel alignment at Giza. The three pyramids are a cosmic signature representing their origin from three stars. The mummification tradition also came from those distant ancestors. Every element of Egyptian civilisation is cosmic in origin.

Chapter XII

The Kailash Temple of Ellora

Among all the ancient structures of India, the Kailash Temple at Ellora stands alone. Science cannot explain how it was built. Even today, with all our high technology, we could not build anything like it.

Carved From a Single Rock

The Kailash Temple is part of a complex of 34 caves in Maharashtra. It fills the 16th cave. The entire multi-storeyed temple has been carved out of one single, massive rock. But the most astonishing fact is this: it was carved starting from the top, and then working downwards.

This is impossible by ordinary human methods. You cannot build a house from the roof down. You cannot carve a statue from the top of the stone. Yet this is exactly how the Kailash Temple was made. The method itself reveals that ordinary humans did not build it.

400,000 Tonnes of Missing Rock

To create the temple, 400,000 tonnes of rock were cut away from the centre of the cliff. But here is the strange fact, the removed rock cannot be found. Archaeologists have searched for miles around the site. There is no debris. There are no fragments. There is nothing.

Where did all that rock go? The answer is that the removal was done by subtle means. The aliens who created the temple did not cart away the stone in carts. They dissolved it — converted it from gross form to subtle form — and carried it away in an instant. That is why no trace remains.

How Old Is the Temple?

Bapuji reveals that the Kailash Temple is approximately 25,000 years old. This is far older than what modern archaeology claims. The civilisation that built it was far more advanced than our civilisation today.

The Hidden Underground City

There is one more secret. Beneath the Kailash Temple lies an underground city. This is not an empty basement. It is a hidden civilisation, connected to a larger

network of underground alien bases that stretch beneath many ancient sacred sites across the Earth.

The Mughal Army That Failed

In 1682, the Mughal emperor Aurangzeb hired an army of about 1,000 men to destroy the Kailash Temple. They worked for three years. They could not destroy it. Only minor damage was caused. When Aurangzeb realised it was impossible, he abandoned the effort.

The question is simple. If a full army could not destroy the temple in three years, how could common villagers have built it in the first place? The answer is clear. Ordinary humans did not build it. It was built by beings far more advanced than us.

Chapter XIII

Crop Circles — Silent Messages

In fields of wheat and barley across the world, strange patterns appear overnight. They are huge, mathematically perfect, and beautifully designed. No one sees them being made. They are called crop circles. They are one of the most fascinating alien phenomena on Earth today.

Not Made by Humans

Crop circles are not the work of pranksters. Their size, precision, and complexity are beyond human skill. They are created by souls of the subtle world — aliens from distant civilisations. They use sophisticated subtle instruments, which only beings of supreme elements can possess. These instruments can create a massive crop circle in a few moments.

No one has ever witnessed a crop circle being formed. That is because the aliens work in the subtle dimension first. The physical pattern appears suddenly when their work is complete.

Messages in Sacred Geometry

Each crop circle carries a message. When a person looks at the pattern, the information is transferred into their subconscious mind. The complex shapes act like keys that unlock knowledge already buried deep in the soul.

One famous example is the Triple Julia Set crop circle, which appeared in Wiltshire, England, in 1996. This pattern comes from a complex mathematical equation developed by Gaston Julia in 1918. The pattern consists of three interwoven fractals — far beyond what any human could sketch overnight with ropes and boards.

The Shree Yantra in Oregon

On the morning of August 10, 1990, a pilot of the Idaho Air National Guard, named Bill Miller, flew over a dry lake-bed in Oregon. He saw a massive pattern etched into the ground. It was a quarter of a mile wide. It was four inches deep. It was the sacred Shree Yantra, nine interlocking triangles radiating from a central point.

Only thirty minutes before, Miller had flown over the same area. There was nothing there. Other pilots flying the same route daily had seen nothing. The Shree Yantra simply appeared. It was oriented perfectly north to south. It was a direct message from higher-dimensional aliens, written in the sacred geometry that connects our physical world to its divine source.

♦ **Insight: “These crop circles carry messages. When a human looks at them, the meaning is downloaded into the subconscious mind through the geometric pattern. This is how higher beings communicate with us.”**

— *Bapuji*

PART THREE

Hidden Alien Worlds on Earth

Chapter XIV

Aliens Live in the Oceans

Most people imagine that aliens come only from the sky. But aliens are also present in vast numbers within the oceans of our Earth. Entire civilisations live beneath the waves, such civilisations far older than any history book records.

Why the Ocean

Subtle world beings are not limited by physical barriers. They pass through water and rock as easily as we walk through air. They can live anywhere they choose be it in the sky, in the mountains, in the rivers, in the seas. The ocean floor is one of the most secure and hidden places on Earth. That is why many aliens make their bases there.

From their underwater bases, they remain completely unseen by human observation. But they stay connected to higher-dimensional beings above, and they quietly influence events on the surface world. The ocean is their perfect hiding place.

Strange Sounds From 12 Kilometres Deep

Modern scientists have recorded mysterious sounds coming from 12 kilometres below the ocean floor. These sounds cannot be explained. They are not from any known fish. They are not from any animal. They are not from geological activity.

These sounds are the result of alien communication. Underwater alien bases use sound signals to communicate with their higher-dimensional counterparts. In ancient times, some of these bases were built specifically to attract extraterrestrial contact. The deep ocean sounds are signals of a civilisation that modern science cannot yet comprehend.

An Ancient Underwater World

Deep in the oceans lives a civilisation hundreds of thousands of years old. It existed long before any modern human culture. These beings remain there today, invisible to our sonar and radar because their bodies are made of subtle or supreme elements. Our instruments, made of gross matter, cannot detect them.

✦ Insight: “Subtle world beings can live anywhere. They live inside mountains, inside rivers, inside oceans. They make their bases in the ocean floors to operate in both the subtle and the physical worlds at once.”

— *Bapuji*

Chapter XV

The Atlantic–Antarctica Crystal City

One of the most extraordinary revelations in Bapuji's teachings is the existence of a crystal city beneath the Atlantic Ocean, near Antarctica. What happened in that city involves one of the most important untold moments in modern human history.

A City of Pure Crystal

The Atlantic–Antarctica Crystal City lies at the bottom of the Atlantic Ocean, in the region near Antarctica. It is a highly advanced civilisation for its time with a higher energy level compared to earth's atmosphere. The entire city is built of crystal that resonates at supreme spiritual frequencies. These crystals carry immense power and knowledge.

This city is not new. It has existed since Satyug i.e the ancient golden age of Earth, ending hundreds of thousands of years ago. Throughout every age since, the crystal city has remained hidden beneath the deepest waters, watching over the fate of humanity.

The Warning to Humanity

Positive aliens from the Crystal City took a US military general down to the city. They showed him everything. They gave him a vital message to carry back to humanity: nuclear research must stop. Nuclear weapons are a danger not only to Earth but to the entire creation. The good aliens wanted this warning to reach the world from a trusted military officer who had seen the truth with his own eyes.

The Message That Was Silenced

When the general returned, he tried to share the message. The US government intervened. Officials intimidated and threatened all witnesses. They shut every mouth. The message never reached the public. Nuclear research continued without a pause. The opportunity to save Earth from its own weapons was crushed by the very government that had been entrusted with the truth.

♦ **Insight: “In the Atlantic–Antarctica region, there is a high-frequency crystal city. The good aliens took a US general there to give humanity a message to stop nuclear research. But the US government threatened everyone into silence, and the weapons programme continued.”**

— *Bapuji*

The Crystal City Today

The Crystal City is still there. The good aliens still watch. They have not given up on humanity. But they cannot force us to change. Our free will must be respected. Only when human souls awaken and collectively choose a different path can the potential held in the Crystal City manifest above the waves.

Chapter XVI

Beings Inside Mountains and Rivers

Just as aliens live in the oceans, they also live inside mountains and rivers. This opens up a completely new understanding of the sacred geography of our Earth.

The Himalayas — A Spiritual Fortress

The Himalayan mountains are one of the most spiritually active regions on Earth. The vayu tattva , the air element — in the Himalayan heights is exceptionally pure, light, and powerful. Pure souls come here after leaving their bodies to refine their subtle bodies and regain soul power.

Inside the Himalayas exist thousands of invisible spiritual spheres called golas. A gola is a subtle energy sphere where groups of souls gather to meditate together. Some golas hold 500 souls. Some hold 1,000. Some hold 10,000. Some hold 100,000. The entire Himalayan range is filled with these spheres. Different peaks, valleys, and caves all contain different categories of meditating souls.

For three or four months each year, Mahadev, Lord Shankar — gives his darshan in the Himalayas. Advanced souls meditating in these sacred places can receive the direct vision of Shankar.

Gyan Ganj — The Hidden City

Within the Himalayas lies a hidden spiritual city called Gyan Ganj. It exists in the subtle dimension. It is a city of supreme divine knowledge. The most exalted souls gather here. The Tibetan Buddhists speak of Shambhala, referring to the same phenomenon through their own tradition.

The Living Rivers

The sacred rivers of India are not just water. They are deities. Ganga is a goddess. Yamuna is a goddess. Saraswati is a goddess. The word Sagar Devta refers to the living deity of the ocean. Chandra Dev is the living deity of the Moon. Surya Dev is the living deity of the Sun.

The rivers and waters of Earth flow through the power of these divine beings. They are present even today, in their subtle forms, watching over the waters they created. All that appears insentient is, in truth, permeated by the consciousness of its creator—the divine source. This law has to be understood by the true spiritual seeker which is the purpose of this book.

Who Built the Mountains

Science says the mountains were formed by tectonic plates crashing into each other. This is not the true story. Our mountains were created by divine beings using their sankalp.

Mount Meru, the legendary mountain at the centre of ancient geography, was created by a soul named Meru. He used his sankalp to manifest the mountain. The seven ancient continents, including Jambu Dvipa and our modern Asia and India — were all created by the subtle-world devtas through focused divine intention. The grand features of Earth's geography are not accidents of geology. They are conscious creations.

Chapter XVII

The Seven Underground Realms

Just as there are seven higher dimensions above Earth, there are also seven lower dimensions below. These are called the patal lokas. They are real places, each with its own beings, its own atmosphere, its own laws.

The Seven Names

The seven patal lokas, in order from the uppermost to the deepest, are:

1. Atal — the first subterranean realm.
2. Vital — the second realm.
3. Satal — the third realm.
4. Talatal — the fourth realm.
5. Mahatal — the fifth realm.
6. Rasatal — the sixth realm.
7. Patal — the seventh and deepest realm.

Why They Were Created

When souls on Earth began to fall away from their divine nature, their bodies became heavier and heavier. They could no longer live in the higher dimensions. They fell, step by step, into denser existence. The seven patal lokas were created to accommodate these falling souls. Each realm is denser and more painful than the one above.

The asuras who were the demons of ancient stories, originally lived in the patal lokas. Their bodies were heavy, dominated by the water and earth elements. They were hedonists (bhogis), beings obsessed with sensory pleasure. In ancient times, through intense penance, some asuras received boons from Brahma or Shiva. These boons gave them the power to travel upward into swarg lok, where they caused great trouble for the devtas.

The Serpent Deities

Within the patal lokas exists a special realm called Nag Lok , the land of the serpent deities, or nag devtas. These beings are highly advanced. They can take serpent form or human form at will. They sometimes come up to Earth's surface. Sometimes they appear as snakes. Sometimes they walk among us as humans. Sometimes they shift between the two forms. They are the “snake gods” honoured in ancient traditions around the world.

The 550 Million Hells

Below the seven patal lokas, ancient creation once had 550 million , additional hells. These were created to hold the most fallen souls. Today, these 550 million hells no longer exist beneath the Earth. They have moved out into space. They are now the giant asteroids floating through our solar system. Every asteroid you see was once a hell realm. Creation is always shifting, always transforming.

Chapter XVIII

Islands That Appear and Disappear

Throughout history, sailors have reported seeing islands that later vanished. Maps drawn by explorers show islands that modern ships cannot find. Many people think these islands sank into the ocean. The real story is different.

The Alien Tents

Many of these vanishing islands are not islands at all. They are subtle alien encampments. They are temporary cities built of three elements which are Akash, Vayu, Agni — by aliens who have come down from higher dimensions. The aliens build a small island in the subtle realm, live there for 10, 20, or 50 years, and then leave.

When they leave, they do not abandon the island behind them. They pack it up. They dissolve the three element structure back into its elemental form and carry it away. The island vanishes completely.

Why People Think Islands Sank

When later sailors return to where the island was, they find only open sea. They conclude that the island must have sunk. But nothing sank. The aliens simply packed up their tent and moved on.

This has been happening since Satyug. During the 1,728,000 years of Satyug, humans did not live permanently on Earth. Earth was like a garden. Souls from swarg lok would come down to visit, enjoy the scenery, and return to heaven. It was only later, as souls began to degenerate, that the first subtle cities were built on Earth. These subtle cities slowly converted into three element cities, and much later into the gross physical settlements of today.

◆ **Insight: “Subtle aliens come down and build small cities in the subtle dimension. They live for 10, 20, 50 years. Then they fly away, taking their city with them. People think it was an island that sank. No they simply packed up their tent and left.”**

— *Bapuji*

Chapter XIX

The Bermuda Triangle

The Bermuda Triangle, in the western North Atlantic Ocean, is the most famous mystery zone on our planet. Ships and aircraft disappear there without a trace. No wreckage is ever found. No distress signals are received. Bapuji reveals exactly what is happening.

Subtle-World Hijackers

Above the Bermuda Triangle, in the subtle dimension, live negative subtle-world beings. Their mission is to capture vehicles and the souls within them. When a ship or plane enters their zone, they reach down and take it.

Using their subtle technology, they convert the entire physical vehicle into its subtle form. In an instant, the metal becomes subtle matter. The fuel becomes subtle energy. The bodies of the passengers become subtle forms. The whole vehicle is absorbed into the alien sphere. It simply ceases to exist in the physical world.

The Fate of the Passengers

The most disturbing part is what happens to the passengers. The negative beings absorb the souls of the humans into their own subtle spheres. In a very real sense, they eat the souls. The souls become trapped, and their power is used by the negative beings to feed their own existence.

This is why no wreckage is ever found in the Bermuda Triangle. There is no wreckage because the entire vehicle was transformed and taken. There are no bodies because the bodies and souls were absorbed. Modern science cannot imagine this explanation, which is why the mystery remains unsolved in public understanding.

The Phantom Highway Hotels

Similar phenomena happen in other places, though less famous. On certain highways at night, truck drivers sometimes see hotels offering food and shelter. These hotels are real where subtle beings manifest them to attract travellers. The drivers stop, eat, rest. Then their souls are absorbed. By daylight, when

another traveller passes by, there is nothing there. No hotel. No trace. The tent has been folded up.

The Titanic

The truth behind the sinking of the Titanic also lies in this world. The Titanic was carrying an ancient Egyptian mummy across the Atlantic. The Egyptian civilisation originally came from a three-star system in our sky. The mummification tradition itself was brought from that distant civilisation.

When the Titanic entered the Atlantic Ocean, it passed through the zone of a very ancient underwater civilisation — one that has existed for hundreds of thousands of years. The subtle beings of this underwater civilisation caused the Titanic to sink. Later, when the Titan submersible went down to visit the wreck in 2023, the five passengers inside were also taken by the same forces. These events are not accidents. They are the work of the subtle beings of that ancient seabed civilisation.

PART FOUR

How Aliens Touch Human Life

Chapter XX

The 124,000 Messengers

One of the most astonishing teachings Bapuji has shared concerns the religious messengers of history. According to him, 124,000 messengers have come to Earth. Every major religion and every spiritual tradition has been founded by one of these messengers. And each messenger was an alien.

The First Messenger

The very first messenger came to Earth 5,800 years ago. His name was Zarathustra. He came from a distant galaxy. He established the Zoroastrian faith — also known as the Parsi or Yahudi tradition. He was the first to begin a long line of spiritual founders sent down from the cosmos.

The Messengers Who Followed

After Zarathustra, many other messengers arrived over the ages. Each came with his own message. Each came from a different galaxy or universe.

About 3,900 years ago, Abraham came. He founded the line of traditions that would later become Islam and other monotheistic paths. About 2,000 years ago, Jesus Christ came. He founded Christianity. All of them came in their flying vehicles, vimanas — which appeared as bright lights in the sky. From these lights, the messenger would descend to deliver his message to humanity.

Some of these messengers came from our own galaxy. Others came from distant universes. Still others came from the great universes. Many of them came because news had spread across the cosmos that the Almighty was about to appear on Earth. Every great civilisation from every part of creation wanted to send its representative.

How the Messengers Took Over

When the messengers arrived on Earth, they did something important. First they captured the subtle world around Earth — the atmospheric spheres surrounding our planet. Then they worked through their followers on Earth below. Through repeated messengers, they expanded their influence. This is why so many religions now exist. Each is the work of a specific messenger and his cosmic origin. Many messengers, under the influence of the illusion of the

gross elements, became focused on establishing their own religions, losing sight of the universal divine principle of the Supreme Authority. Over the past 5800 years, the religions that emerged on Earth can be seen as alien religions—separate from the original, unified truth. Today, these religions continue to struggle against one another to establish supremacy, which reflects a profound ignorance. Even these messengers now exist in the subtle world, still influenced by the Earth's negative atmosphere.

◆ **Insight: “A total of 124,000 messengers have come to Earth from different galaxies and universes. The first came 5,800 years ago. Each founded a religion. Each is an alien being.”**

— *Bapuji*

Chapter XXI

Religious Spheres Above Earth

Bapuji reveals a remarkable truth about the sky above our Earth. Every major religion has its own invisible spiritual sphere located at a specific altitude. The founder of each religion still lives in that sphere. From there, he continues to influence his followers on Earth below through subtle vibrations.

The Spheres and Their Heights

Different religious founders reside at different heights above our planet:

Swami Narayan Sampraday — at 10 kilometres above Earth.

Kabir Panthi — at 10 kilometres above Earth.

Jain tradition (the 24 Tirthankars) — at 20 kilometres above Earth.

Buddhist tradition (Gautam Buddha) — at 3 kilometres above Earth, specifically over the Himalayas and Tibet.

Each of the 35,000 sub-sects of Sanatan Dharma also has its own sphere.

Controlling the Followers Below

The founder of each religion continues to reside in his sphere. From there, he sends vibrations down to his followers on Earth. He tries to guide them, to control them, to keep them loyal to his path. This is why religious followers often feel a strong pull toward their tradition because they are receiving constant subtle vibrations from above.

But this creates a serious problem. Each religious founder wants to keep control of his followers. This creates conflict between the founders themselves, in the subtle world. That conflict then flows down into our world, where it appears as religious war between human followers.

The Cosmic Source of All Religious Conflict

The wars between religions, the fights between sects, the tensions between Hindus, Muslims, Christians, Jews, Buddhists, Sikhs — all of this does not begin on Earth. It begins in the subtle spheres above Earth, where the religious founders compete for control of their followers.

The founders themselves are aliens. They came from different galaxies and different universes, bringing their own cultural backgrounds with them. The religion each established on Earth reflects the culture of the distant realm he originally came from. When religions clash, what we are really seeing is different alien civilisations fighting through their Earth-bound followers.

This is why no religion, by itself, can bring true peace. True peace comes only when a soul rises above all religious identities and connects directly to the supreme formless divine light. That is the only freedom from this cosmic power struggle.

Chapter XXII

Great Scientists Are Alien Souls

Our greatest scientists were not ordinary humans. According to Bapuji, the brilliant minds behind humanity's greatest discoveries are alien souls who have incarnated on Earth for a purpose.

Why They Come

All of humanity's extraordinary scientists — Ramanujan, Einstein, Nikola Tesla, Stephen Hawking, and many others — are alien souls from distant galaxies, universes, and far-off places in creation. They are from different dimensions, with different soul qualities, but all are very powerful. This is why their intelligence is so evolved. This is why their technical knowledge is so deep.

They come to Earth with a specific mission: to advance human civilisation. To share the knowledge their souls already carry. To bring humanity forward.

Why They Must Struggle

When an alien soul takes birth on Earth, it comes under the effect of our five-element atmosphere. The soul forgets its original knowledge and becomes a normal human. This is why great scientists must work so hard for their discoveries. They are not inventing anything new. They are trying to remember what their soul already knows.

Meanwhile, the group of alien souls related to this scientist, who still remain in the subtle dimensions continue to inspire the incarnated scientist through subtle vibrations. These subtle messages help the human-form scientist to recover his lost memory. This is why great scientists spend so much time in quiet contemplation and solitude. They are receiving guidance from above, though they may not fully realise it.

Srinivasa Ramanujan

The Indian mathematician Srinivasa Ramanujan openly said that his mathematical equations came to him in dreams from his Kuldevi, his family goddess. He had no formal training. Yet his equations were so advanced that world-class mathematicians said if they could solve all his formulas, modern science would be transformed.

The Kuldevi was not a myth. She was an alien being in the subtle dimension, directly uploading advanced mathematics into Ramanujan's consciousness while he slept. Ramanujan was simply the receiver, the human form through whom cosmic knowledge flowed onto Earth.

Nikola Tesla and Albert Einstein

Nikola Tesla communicated with aliens throughout his life. He himself wrote: "The day science begins to study non-physical phenomena; it will make more progress in one decade than in all the previous centuries of its existence." Tesla knew the truth. He had lived it.

Einstein's famous thought experiments were a form of alien communication. When he imagined riding on a beam of light, he was tuning into the cosmic knowledge of the subtle dimensions. The theory of relativity did not come from paper and pencil alone. It came from the higher realms.

Stephen Hawking

The most remarkable case is Stephen Hawking. He was diagnosed with ALS as a young man. Doctors said he would live only two or three years. Yet he lived for decades, producing brilliant theoretical physics even when he could not move, speak, swallow, or breathe on his own.

This was possible because alien souls from the subtle dimensions sent rays on him, keeping his brain functioning. The same alien group also inspired the development of his assistive technology — the special machine that let him communicate by thought. Without that alien help, Hawking's body would have failed long before.

Chapter XXIII

Star Children Among Us

For several decades now, something new has been happening on Earth. Children are being born with abilities, knowledge, and spiritual sensitivity far beyond their age. They are called indigo children, star children, or star seeds. They are real.

Who They Are

These souls come from alien civilisations. Their DNA is different from the rest of humanity. Their purpose in coming to Earth is to advance knowledge and technology, to maintain harmony, and to raise the spiritual level of our world. They are souls beyond the divisions of religion, sect, and culture. They see the unity of all beings, and they resist attempts to confine them to narrow identities.

The Case of Boriska

A famous example is Boriska, a Russian boy born in 1996. From a very young age, he claimed that he was originally an inhabitant of Mars. He described Martian civilisation. He gave details about the planets, about past lives, about cosmic history — knowledge no ordinary child could possibly have.

Boriska said that residents of Mars were about seven feet tall. He said that after the nuclear devastation on Mars, the survivors were forced to live below the surface and breathe carbon dioxide. He said that Mars is connected to the mystery of the pyramids of Egypt. His memories match Bapuji's teachings about the destruction of Mars 8,000 years ago.

Why China Counted Them

The Chinese government conducted a research programme and officially identified 100,000 children in China with unusual abilities like psychic perception, telepathy, extraordinary intelligence. Governments around the world have recognised that a new generation is being born, different from any that came before.

Star children are incarnating in greater numbers now because this is a critical time in human history. They are here to help Earth through the great transformation that is coming.

Why They Struggle in Schools

Star children often do not fit into ordinary school systems. Their minds are tuned to cosmic knowledge, not to memorisation and standardised tests. They may be labelled as having attention problems when in reality they are simply bored with limited material. They need freedom to explore knowledge in their own way. They need to be introduced to spiritual truths, not only to materialistic content.

Chapter XXIV

Abductions — The Real Reason

The topic of alien abduction has filled books and films for decades. Thousands of people report being taken up into spacecraft, examined, and returned. Most portrayals make abductions seem frightening and hostile. The truth, according to Bapuji, is much more nuanced.

The True Purpose

The main reason positive aliens abduct humans is not to harm them. It is to study and improve human DNA. The aliens want to help humanity evolve. Their goals are:

To enhance the power of human DNA.

To make humans more resilient against disease.

To increase human immunity.

To help the human species rise to a higher state.

The positive aliens genuinely want to help. They are our cosmic ancestors. They see their descendants trapped in heavy bodies, suffering from illness and confusion. They want to lift us up.

Why Cows Are Taken

Alien abductions of cattle are well known in UFO literature. According to our Sanatan tradition, the cow is revered like a mother. She is also called Kamdhenu, the cow who fulfils all desires. Aliens abduct cows briefly, or take small samples, to study the divine qualities within the sacred animal. When their research is done, the cows are returned to the exact location from which they were taken.

Ancient Marriages Between Gods and Humans

Our ancient scriptures are full of accounts where devtas came to Earth and married women of Earth. This was not poetic fiction. It was a deliberate programme to create a human civilisation that combined the best of divine and

earthly genetics. The children of such unions would carry unusual gifts, bridging the two worlds.

Not All Abductions Are Positive

Some abductions are carried out by negative aliens with very different intentions. There is a secret underground programme in areas like Area 51 .Not many know about it — where negative aliens are creating artificial humans, or robots, by merging alien technology with human biology. These negative abductions happen in remote areas, often from forests and jungles, so that no one notices the disappearances.

A positive abduction leaves a person with a sense of wonder and expanded awareness. A negative abduction leaves fear and trauma. The two are very different operations by very different groups of aliens.

Chapter XXV

Area 51 and the Galactic Federation

Area 51 is a secret US Air Force base in southern Nevada, north of Las Vegas. For decades, the world has speculated about alien activity there. Governments have denied. Evidence has kept emerging. Bapuji has confirmed the truth.

The Truth About Area 51

All the claims about alien visitations and experiments at Area 51 are completely true. Crashed UFO spacecraft are stored there. American government scientists reverse-engineer the advanced alien technology. Many of the technological breakthroughs of recent decades come directly from this hidden work.

A retired US Army colonel has publicly testified that he was given access to extraterrestrial material recovered from a UFO that crashed in July 1947 in Roswell, New Mexico. His testimony is true. The Roswell incident was real.

The Galactic Federation

Haim Eshed, the former head of Israel's space security programme, recently made an extraordinary disclosure. He said publicly that aliens exist, and that the United States has created a secret "Galactic Federation" in partnership with alien species. He claimed that cooperation agreements have been signed between the American government and aliens. He even said there is an underground base deep on Mars where American astronauts and alien representatives live and work together.

Eshed said that former President Donald Trump was fully aware of the extraterrestrial presence. Trump had been on the verge of revealing everything to the world. The aliens asked him not to, fearing mass hysteria.

Bapuji confirms that Eshed's statements are true. Many governments around the world have clear knowledge of aliens, UFOs, and extraterrestrial civilisations. They keep it secret from the general public for reasons of their own.

The Ultra-Secret Below

Even so, there is a truth so hidden that even the people at Area 51 do not know about it. Certain aliens have developed AI — artificial intelligence, or as Bapuji calls it, Alien Intelligence for the specific purpose of capturing the minds of all human beings on Earth. This is being done silently, through electromagnetic waves emitted by mobile phones, tablets, and every AI-powered device. We will explore this ultra-secret knowledge in a later chapter.

PART FIVE

The Urgent Warning

Chapter XXVI

Why Aliens Fear Nuclear Weapons

This is the most urgent part of this book. Nuclear weapons are not an ordinary problem. They are a cosmic crisis that threatens not only Earth but the entire creation.

Why the Aliens Worry

According to Bapuji, the aliens do not want humanity to face another nuclear war. A nuclear explosion does not only affect the Earth. It has serious, negative effects across all creation. The vibrations of mass death, the fire of destruction, the terror of billions of beings — all of this sends shockwaves outward into the subtle dimensions. It pollutes the atmosphere of our entire solar system. It disturbs the residents of swarg lok. It damages the delicate cosmic fabric through which all souls travel.

Even Subtle Beings Are Affected

Even subtle-world beings can be harmed by nuclear warfare on Earth. The bodies of the devtas contain agni tattva — the fire element. A nuclear explosion can ignite the agni tattva within their subtle bodies, potentially damaging or destroying many subtle-world souls. Even the beings who have been protecting Earth for eons could be caught in the cosmic fire of nuclear war.

Nuclear war is not merely a physical catastrophe—it is a disruption of the subtle fabric of creation. The immense energy released from hydrogen fusion can activate the Param Agni Tatva (supreme fire element), which then expands into overwhelming Agni Tatva, like the fire that burns within the Sun. This surge disturbs the ether element (ākāsh), destabilizing the very balance of existence. Such a disturbance would have consequences beyond the visible world. Humanity must understand this: the effects of nuclear conflict are not limited to destruction of matter—they extend into the subtle dimensions of creation that is causal world. The causal body of all aliens will also be destroyed due to nuclear war. So, the aliens are avert to nuclear war. Nuclear war can only be avoided through awareness, restraint, and inner transformation of all human souls on earth.

This is why aliens have tried so hard to prevent nuclear conflict. They are not being dramatic. They understand, from their higher perspective, exactly what nuclear weapons do to the delicate fabric of creation. And they are deeply concerned.

Chapter XXVII

First Time in the History of Creation

This chapter contains one of the most shocking revelations in all of Bapuji's teachings. Nuclear weapons are not just new to Earth. They are new to the entire multiverse.

A Cosmic First

For 432 crore years, that is, 4.32 billion years, nuclear weapons have never existed. Not on Earth. Not in our solar system, not in our galaxy, not in our universe, and not in any of the great universes, G1 through G17. They have not existed anywhere in the multiverse.

This is the first time in the creation. In all of infinite creation, across trillions of years, no civilisation anywhere has ever developed nuclear weapons. Until now. Until Earth.

Why Here? Why Now?

The question naturally arises: why here? Why Earth, out of all the worlds in the multiverse?

The answer is that this is a special Kaliyuga. The current age is unique. The Almighty is coming. News has spread across all the great universes that the supreme authority is going to appear on this Earth during this time. Because of this, beings of extraordinary quality have come to Earth from the most distant dimensions. Along with them, beings with destructive tendencies have also arrived.

Among the destructive forces now active on Earth is Shukracharya. He is the creator of the planet Venus. He is the guru of the demons, the Daityas and rakshasas. He is working through the subtle world to accelerate the creation of nuclear weapons. His purpose is to force a destructive transformation on Earth, to reshape humanity through fire.

Why Some Creators Want This

There is another layer to this story. Some of the aliens who originally created civilisations on Earth are now dissatisfied with how things have degenerated. In their view, the best solution is destruction, to wipe the slate clean and start over.

These aliens know that if nuclear weapons explode on a large scale, every human body will be destroyed. The souls will escape into the subtle world, where they can be reassigned to new births. From their cosmic perspective, this is not tragedy. It is renewal. From our human perspective, however, it is unimaginable suffering.

✦ **Insight: “For 432 crore years, nuclear weapons were never created anywhere in creation. Not in any Brahmand, galaxy, universe, or great universe. Only here on Earth. Only now. This is the first time in the history of creation.”**

— *Bapuji*

Chapter XXVIII

Aliens Deactivating Missiles

Thousands of UFO sightings have been recorded at nuclear missile sites around the world. This is not a coincidence. It is an ongoing alien intervention, an effort to prevent the catastrophe that they know is being planned.

The Pattern

There are many documented incidents in which extraterrestrials in UFOs have hovered over British and American nuclear missile sites and temporarily deactivated the missiles. Multiple retired US Air Force officers have publicly testified to witnessing these events. Missiles that were ready for launch suddenly went offline. Control systems failed without explanation. Countdown sequences were interrupted. Then the UFOs departed, and the systems mysteriously resumed working.

Why the Aliens Intervene

The positive aliens are working to prevent humanity from accidentally triggering nuclear war. They cannot interfere with human free will on a large scale. However, they can intervene in specific moments, when catastrophe seems imminent, to give humanity another chance.

This has been occurring for decades. From the 1950s onward, UFO activity has increased dramatically near nuclear facilities. The aliens are watching. They are waiting. They are hoping humanity will awaken and choose a different path before the final moment.

The Limits of Alien Help

The aliens cannot permanently disable nuclear weapons without violating human free will. They can delay. They can warn. They can give signs. However, in the end, the choice belongs to human beings. If humanity collectively decides to use nuclear weapons, the aliens cannot stop it.

Chapter XXIX

The Destruction of Mars

What happened on Mars is not ancient history; it is a warning. About 8,000 years ago, the civilisation on Mars was destroyed by nuclear war. The same pattern that is now unfolding on Earth has already occurred on our sister planet.

The Civilisation Before the War

Around 8,000 years ago, Mars had a beautiful civilisation. The people of Mars had lighter, less dense bodies. Their bodies contained very little water and earth elements. They lived a peaceful, and advanced life, similar to the Satyug on Earth. Their soul power was high. Their technology was advanced. They had high-speed flying vehicles.

The Invasion

Then alien souls from another world invaded Mars. These invaders also possessed advanced technology. The original Martians knew that the invaders could attack with nuclear devices. Just as on Earth, there was a religious war between good and evil on Mars, a conflict of values, not just territory. A nuclear war broke out.

The blasts caused massive earthquakes that destroyed the entire surface of the planet. The craters we see today on Mars are the scars of that ancient war. Life on the Martian surface ended.

The Underground Survivors

Some of the original Martians saw the attack coming. Before the strike, they went underground into deep caves and subsurface complexes and escaped with their lives. Even today, they continue to live underground on Mars. Scientific research has recently confirmed water below the Martian surface, though water cannot be found directly on the surface. This matches Bapuji's teaching exactly.

The Souls Who Came to Earth

Other Martian souls escaped to other planets. Some came down to Earth for survival. Since Earth's atmosphere is five-element, these souls came under the

influence of our heavier atmosphere. Their originally lighter bodies became denser. They completely forgot their Martian origin. Many of them are still among us today as ordinary humans with no conscious memory of their past.

Today, Mars is inhabited by subtle-world souls with three-element bodies. The physical civilisation is gone. But the story of Mars serves as a terrible warning: an entire planet's civilisation can be erased in a nuclear war. The aliens of Earth today include many who remember this. They know exactly what nuclear war does.

Chapter XXX

The Hidden Plan for War

This is the chapter demands courage to share. Bapuji's teachings here are grave, but they must be known. The choice humanity makes in the coming years will shape the fate of our entire world.

The Subtle-World Plan

There is an active plan in the subtle world to trigger a nuclear Third World War. This plan is being orchestrated by negative aliens and subtle beings who have joined with them. These include ghosts, prets, pishachs, all the dark entities that now fill the subtle atmosphere around Earth.

How the War Will Be Triggered

The mechanism is chilling. When the time comes, the negative subtle beings will enter the bodies of world leaders who have the authority to launch nuclear weapons. Presidents, prime ministers, generals, all those who can press the button will be possessed by negative entities. Under that possession, they will collectively press the buttons.

Humans alone will not press the final button. It is not the conscious human mind that will initiate the war. It is the negative entities inside the bodies of the world leaders, acting through the humans but not as them. This is how the Third World War will be triggered, if we do not awaken in time.

Russia, China, and Christian Countries

The alignment is unmistakable. Russia and China are atheist nations. The subtle atmospheres above both are full of ghosts who are also atheists. These atheist ghosts have been consolidating their influence. The Christian countries, the United States, Britain, and their allies, will end up in conflict with the atheist countries.

Bapuji further reveals that COVID-19 was engineered by China under the direct influence of negative subtle-world beings. China's scientists were guided and inspired by the negative aliens and disembodied entities above their country. The pandemic was not an accident. It was a calculated initial phase of the broader sequence of planned destruction.

The Timeline

According to Bapuji, the years 2025 and 2026 are the years when the foundation of destruction is being laid. The years 2027, 2028, and 2029 are the potential years of the Third World War. If destruction happens, it will be completed in only three days. Such is the speed of nuclear weapons combined with the negative forces driving them.

There are enough nuclear weapons on Earth today to destroy the planet a thousand times over. Russia possesses thousands of warheads. The United States has thousands. China, India, Pakistan, Britain, France, and Israel, all have enough to participate in a final cataclysm. The destruction would not be partial. It would be total.

India Will Remain Neutral

In the midst of this warning, Bapuji offers an extraordinary promise. India will remain neutral. India will be saved. Even if nuclear weapons explode in foreign lands, the negative effects will not reach India. This is because the vibrations of Paramshanti are being spread across India. If enough Indian souls awaken to their divine nature and fill the atmosphere with Paramshanti vibrations, they will protect from any fallout.

The Final Hope

But this is not only about India. If Paramshanti vibrations spread across the entire Earth quickly enough, if the 33 crore Devi Devatas awaken, then the Third World War can be stopped completely. The subtle-world beings planning destruction can themselves be transformed by the power of Paramshanti. Their minds can change. Their plans can dissolve.

This is the central urgent message of Bapuji's teachings. Individual transformation leads to family transformation. Family transformation leads to world transformation. Every soul that awakens and sends out vibrations of peace contributes to saving humanity.

◆ **Insight: “Ninety-nine percent of the aliens in Earth’s atmosphere have become negative. They will enter the bodies of those who can launch nuclear weapons. This is how the Third World War will be triggered, if we do not wake up in time.”**

— *Bapuji*

PART SIX

Other Worlds and Higher Dimensions

Chapter XXXI

Life on the Sun

Modern science says the Sun is just a giant ball of hydrogen and helium. According to Bapuji, this is not the whole truth. The Sun is alive. It is inhabited. A family of divine beings lives inside it.

The Lord of the Sun

The Sun is ruled by Surya Narayan Devta, also known as Savitur. He is the Sun deity. He created the Sun, and he continues to reside within it. His body is made of param agni tattva. From param agni, in sun, akash tattva (ether) and agni tattva (fire), two of the lightest elements are generated to give energy to gross creation. Because his body is made of refined elements of Param Agni, the intense heat of the Sun does not harm him. The Sun is his natural home.

Surya Lok

Inside the Sun is Surya Lok, a complete civilisation. Surya Narayan Devta lives here with his family. Beings of fire and ether elements also reside here. Friends, relatives, and visitors from other solar systems gather here. They can travel even to the centre, the very core of the Sun, without harm, because their bodies vibrate at the same frequency as the Sun's own fire.

Why the Sun Was Created

In the early ages of Earth, there was no Sun. In the higher dimensions, beings did not need external light; each soul glowed with its own inner radiance. But as souls began to descend into denser states, their soul-light grew dim. A time came when complete darkness covered Earth.

To resolve this, Surya Narayan Devta was created specifically to bring light to our Earth. Initially, the Sun was smaller than it is today. Its main function was simply to illuminate Earth. In that early time, the Sun actually revolved around the Earth, not the other way around. Later, because of the Sun's gravity, the other planets came into their current orbital patterns.

Chapter XXXII

Life on Jupiter, Venus, and Mars

Every planet in our solar system has beings living on it, either in physical form or subtle form. Each planet is its own world, with its own creator, its own civilisation, and its own story.

Jupiter: The Home of Brihaspati

Jupiter was created by Brihaspati. He is the wise soul who serves as guru, spiritual master of the devatas. He is the son of the revered Angira Rishi. Brihaspati resides on Jupiter with other souls who came with him. The beings of Jupiter have bodies composed primarily of vayu tattva, the air element. Their bodies are subtle and three-elemental in nature. From Jupiter, Brihaspati continues to provide spiritual guidance to the devatas.

Venus: The Home of Shukracharya

Venus was created by Shukracharya, the guru of demons. He resides on Venus with his family and the souls he created. His civilisation on Venus runs parallel to that of Brihaspati's on Jupiter, but with very different values.

Today, Shukracharya is one of the main forces behind the subtle-world push for destruction on Earth. As the guru of demons, his orientation is toward destructive use of power. His followers in the subtle world are working to accelerate the development and use of nuclear weapons, stir up division between countries, and trigger the Third World War. He is also instrumental for developing AI technology through other aliens descended from higher dimensions.

Mars: What We Already Know

Mars was once a vibrant five-element world. The story of its destruction 8,000 years ago has been described in detail earlier in this book. Today, Mars is inhabited by subtle world souls with three-element bodies. A small remnant of the original civilisation still lives underground, breathing carbon dioxide and surviving on deep water reserves beneath the surface.

Pluto and Uranus

Pluto and Uranus also once had civilisations as well. In earlier cosmic ages, life flourished on these distant planets. Today, most of that life has migrated either to subtle dimensions or to other planets. The memory of these worlds remains in the cosmic record.

Other Planets in Other Systems

Our galaxy contains approximately one billion solar systems. The Andromeda galaxy contains one thousand billion. In each of them, there are beings and civilisations, some in physical form, and some in subtle form. The ancient principle holds true: yatha pinde tatha brahmande, as is the microcosm, so is the macrocosm. Life exists everywhere, though in forms very different from what our Earth knows.

Chapter XXXIII

The Moon — What NASA Hid

Why has NASA not returned to the Moon since the early 1970s? Why were the Apollo 18, 19, and 20 missions cancelled? Why were there two missing minutes in the live broadcast of Apollo 11? Bapuji has the answers.

The Moon Is Inhabited

The Moon was created by Chandra Dev, the lunar deity. Chandra Dev rides a chariot pulled by ten white horses. He built the famous Somnath Temple in Gujarat, as he was a devoted follower of Lord Shiva. He often travels from his home on the Moon to our Earth in his chariot.

Today, subtle world souls still live on the Moon in three-element bodies. All of them are followers of the Hindu religion. In ancient Hindu belief, when a human soul leaves the body, it first passes through Chandra Lok, the Moon realm, before reaching Swarg Lok. Chandra Lok is a real stage on the soul's journey.

What Happened During Apollo 11

When Apollo 11 landed on the Moon on July 20, 1969, the event was broadcast live on television. Millions around the world watched. During the broadcast, something occurred that caused NASA to cut the live feed for about two minutes. What happened during those two minutes?

Bapuji, through his divine vision, has seen the truth. At the same moment Apollo 11 landed, another vehicle from the planet Saturn also arrived at the Moon. The subtle world souls living on the Moon drove both vehicles away. There was a confrontation. The American astronauts were forced to end their mission and leave in a hurry. The two-minute blackout concealed what would have been direct evidence of alien beings on the Moon.

Why Apollo 18, 19, and 20 Were Cancelled

Because of what happened, the follow-up missions were cancelled. The public reason given was budget cuts. The real reason was a clear message from the Moon's residents: humans are not yet welcome here.

Just as nations on Earth require visas to visit one another, the subtle world has rules governing who can travel between planets. There are agreements between the beings of different realms. The Earth astronauts did not have permission to be on the Moon. That is why they were driven away.

What Is Changing

Bapuji says that new agreements are slowly being negotiated among the subtle world souls of different planets. As humanity's consciousness rises and more divine knowledge spreads, the Moon's residents may one day welcome human visitors again. However, human civilisation must first become worthy of that welcome.

Chapter XXXIV

The Pole Star and the Seven Sages

In the night sky, one star never moves, the Pole Star, known as Dhruva Tara. Sailors have navigated by it for thousands of years. Astronomers mark time by it. Spiritual seekers meditate on it. Bapuji reveals why it holds such a special place.

Who Is Dhruva?

Dhruva was a young devotee who came to our Earth from a higher dimension. He became an ardent devotee of Lord Vishnu. Through his intense devotion, he was granted a special boon of eternal firmness and unshakable resolve. When his time on Earth ended, he returned to his own star, which is now called Dhruva Tara in his honour.

The Centre of the Subtle World

Because of Dhruva's boon, he remains the one unmoving star in the heavens. All the other stars, constellations, planets, and even the Sun deity revolve around him. The Pole Star stands at the very centre of the subtle world.

The Most Powerful Solar System

The solar system of Dhruva Tara is many times larger than our own. The supreme light power in that system is 7 to 8 kala. Compared to all other solar systems visible from Earth, the Pole Star is the most exalted and the most powerful. The Skanda Purana tells us that the inhabitants of Dhruva Tara glow with their own inner light and need no external sun to illuminate them.

The Seven Sages

Circling the Pole Star is the realm of the Sapta Rishi, the seven great sages. These seven sages are the mind-born sons of Lord Brahma. They were created through the combined sankalp of Lord Brahma and Goddess Saraswati.

The seven original sages are Angirasa, Atri, Kashyapa, Bhrigu, Vasistha, Bharadwaja, and Shandilya. They form the lineage from which all Hindu gotras (family clans) descend. After their mission on our Earth was complete, they

returned to their own realm near Dhruva Tara. The seven stars we see in the constellation known as the Big Dipper are these very sages.

The Saptarishi, through their power of sankalp, created the farishtas, the divine angels. The farishtas are extremely powerful beings, more exalted than the devatas of Swarg Lok. Their bodies are made of supreme elements, and their souls are made of supreme light.

Chapter XXXV

The Seven Higher Realms

Above the Earth stretch seven layers of creation. Each layer is a separate world. Each has its own beings, its own atmosphere, its own laws of time.

Bhu Lok

The first layer is Bhu Lok, our Earth. This is the physical realm made of five gross elements. This is the realm where karma is most active, where souls can make the greatest spiritual progress, and where they can fall most deeply.

Bhuvar Lok

Above Earth is Bhuvar Lok, also called Pitru Lok, the land of ancestors. This is the first subtle dimension. It extends between the Earth and the Sun. Above Bhuvar Lok are several important realms in space:

Dhruva Lok: the Pole Star realm

Sapta Rishi Lok: the realm of the seven great sages

Nakshatra Lok: the realm of the heavenly constellations

Chandra Lok: the realm of the Moon deity

Surya Lok: the realm of the Sun deity

Bhuvar Lok also contains the Gandharvas, the celestial musicians; the Kinnars, the heavenly dancers; and the Yakshas, the nature spirits. All these are different categories of alien beings.

Swarg Lok

Above Bhuvar Lok is Swarg Lok, heaven. This is the home of the devatas. The devatas have three-element bodies (akash, vayu, and agni) and live in conditions of beauty and pleasure far beyond anything on Earth. However, even Swarg Lok contains illusion, the veil of maya, just in subtle form. The devatas still experience lust, anger, pride, and other vices. One day in Swarg Lok equals one solar year on our Earth.

Mahar Lok

Above heaven is Mahar Lok, the realm of the great rishis. One day in Mahar Lok equals 10 years on Earth.

Janah Lok

Above Mahar Lok is Janah Lok, the realm of advanced spiritual beings. One day here equals 100 Earth years. This is the realm where the founders of many religions reside.

Tapah Lok

Tapah Lok is the realm of intense penance. Pure souls here are totally absorbed in their spiritual practice. They are detached from their bodies and completely focused on their chosen God. One day in Tapah Lok equals 10,000 years on Earth.

Satya Lok: Brahmapuri

The highest of the seven realms is Satya Lok, also called Brahmapuri, the abode of Lord Brahma. Here Lord Brahma lives with his consort, Goddess Saraswati. He is responsible for the creation of all living beings in our Brahmand.

Chapter XXXVI

The Great Universes — G1 to G17

Beyond our solar system lies our galaxy. Beyond our galaxy lies our universe. And beyond our universe stretch seventeen levels of still greater creation, called G1 through G17. Each level is created by a more powerful creator than the level below.

Shiva and His Creators

The creator of one solar system is Shiva. He has 1 to 4 kala of power.

The creator of one galaxy is Maha-Shiva. He has 8 to 12 kala of power.

The creator of one universe is Param-Maha-Shiva. He has 16 to 20 kala of power.

The creator of G1, the first great universe, is Param-Param-Maha-Shiva. He has 25 to 30 kala of power.

The creator of G2 is Param-Param-Param-Maha-Shiva. He has 50 kala of power. And so, on up the scale.

The creator of G17 is Param (repeated 18 times) Maha-Shiva. He has 100 kala of power.

The Multiverse

Above G17 lies the multiverse. Our multiverse contains infinite G17 universes. The creator of our multiverse is called Param100-Maha-Shiva. He has 100 kala of power.

Inside our multiverse are 200 layers of G3 universes. There are 500 layers of G17 universes. The numbers are beyond counting. Each layer contains uncountable universes, each with its own creator, its own administration, its own story.

The Navratnas

At the beginning of the multiverse creation, the first souls were created through the combined power of Param100-Maha-Shiva and his consort. The first three

souls created were like Brahma, Vishnu, and Shankar, the trinity of creation, preservation, and destruction for our multiverse.

These three souls again created souls making the number 9. So, the total became nine. These first nine souls are called the Navratnas, the Nine Gems of creation. They are extraordinarily powerful beings, as they were created when the creator still had full power.

The nine gems then each created three more, bringing the total to twenty-seven. These twenty-seven prime souls surrounded an area in space and formed the outer boundary of our multiverse. Within this boundary, creation continued to multiply, giving rise to the cosmic architecture as we know it today.

Beyond Our Multiverse

Above our multiverse exist further levels of creation. There are multiverses of 200 kala, 300 kala, and higher. The creators of these higher levels are called the First Peedi, the Second Peedi, the 101st Peedi, all the way up to levels with millions of peedis. Creation has no final limit.

Chapter XXXVII

The Multiverse and Beyond

Most humans, including scientists, have no idea how vast creation truly is. Our universe is only a tiny speck in something infinitely larger. Bapuji's teachings open the true map of creation.

Our Unique Multiverse

Our multiverse has something that no other multiverse possesses, a gross five-element world. This has not happened in any other multiverse. Ours is the only one where souls get caught in the endless cycle of birth and death.

In other multiverses, souls have decayed in power, but they have not fallen into such dense physical matter. Creation in those multiverses still exists primarily in supreme subtle elements, far more refined and powerful than what we experience here. Our multiverse is unusual in its heaviness. This is precisely why so many cosmic beings are watching it now.

Time Flows Differently

Time does not flow in the same way at every level of creation. This is what modern science calls time dilation. Here is the scale as given by Bapuji:

One year on Earth equals 1 day in Swarg Lok.

10 years on Earth equals 1 day in Mahar Lok.

100 years on Earth equals 1 day in Janah Lok.

10,000 years on Earth equals 1 day in Tapah Lok.

100,000 years on Earth equals 1 second in Brahmapuri.

200,000 years on Earth equals 1 second in Vishnupuri.

300,000 years on Earth equals 1 second in Shivpuri.

2.5 million years on Earth equals 1 second in Paramdham.

All of human history, every civilisation, every war, every invention, every suffering, is less than a heartbeat at the highest cosmic levels. This is why the aliens see our crises differently than we do. They have a longer view.

The Visitors From All Dimensions

Souls from every one of these levels have come to Earth during this special Kalyuga. There are Param Maha Shivas from distant universes walking among us. There are Param-Param-Maha-Shivas from great universes. Even beings from the higher G-levels have come down to witness the cosmic event that is unfolding.

Each of these souls, in their original form, has immense kala, hundreds or thousands of celestial degrees. But, trapped in Earth's five-element atmosphere, they have forgotten their true nature. Bapuji's teachings are meant to wake them up again, so that they can resume the mission they came here to perform.

PART SEVEN

Cosmic Technology

Chapter XXXVIII

Telepathy — The Alien Language

How do aliens communicate with each other across vast distances? Not through words. Not through sound. Not through radio waves. The true language of aliens is telepathy, direct communication from mind to mind.

Why Spoken Language Cannot Work

On Earth alone, there are thousands of different languages. Each country speaks differently. Each region has its own dialect. When humans from distant lands meet, they cannot understand each other without translation. Now multiply this problem across infinite solar systems, galaxies, and universes. Each dimension has its own frequency. Each has its own language.

If aliens tried to use spoken words, no two civilisations could ever communicate. So they developed a far better system. A clear thought, projected through sankalp shakti, can be received directly by another being's consciousness, bypassing all language barriers. Sankalp shakti propagates through ether element in the form of waves, so those souls having strong ether elements or supreme elements, they can communicate through Sankalp shakti i.e. telepathy without any disturbance. It is a signal transmission method through gravity waves in ether elements.

How Telepathy Works

When an alien forms a clear thought, that thought becomes a vibration. The vibration moves through the subtle fabric of creation. It is received by another alien's mind. The meaning is understood instantly. No translation is needed, because the thought itself is the message.

This is why advanced souls, saints, and yogis on our Earth sometimes know things they have not been told. They are perceiving telepathic communications from aliens, devas, and other subtle-world beings. Narad Muni was famous for this ability; he could communicate across dimensions through his mind alone.

Chapter XXXIX

Mysterious Radio Signals

In recent decades, scientists have detected strange radio signals coming from deep space. They have tried to decode them without success. Bapuji explains why.

The Russian Discovery

In 2015, Russian astronomers detected an intriguing radio signal from the HD 164595 star system, about 94 light-years from our Earth. The scientists believed they had found an alien signal. Then, suddenly, all positive evidence was denied in the mainstream media. The signal was either suppressed or dismissed. The Russian team was never able to decode it.

Why Science Cannot Decode These Signals

Science is based on the five gross elements. Scientific instruments can only detect five-element objects. They can understand only five-element languages. But the language of the subtle world is telepathic. It is completely different from anything our instruments can capture.

Science today cannot even detect the ghosts that exist in every house on Earth. If we cannot detect entities that are standing beside us, how can we decode signals from 94 light-years away?

The Time Problem

There is another basic problem. If a radio signal is sent to a planet 2,000 light-years away, it takes 2,000 years to reach that planet. If the aliens respond, it takes another 2,000 years for their reply to return. That is 4,000 years for a single exchange.

Meanwhile, the aliens communicate with each other in real time using telepathy, regardless of distance. This is why our technological approach to alien communication is ineffective from the start. We need to develop spiritual technology, not just physical technology.

Chapter XL

AI Is Alien Intelligence

Everyone today talks about Artificial Intelligence. Governments race to develop it. Companies compete to deploy it. Ordinary people use it on their phones and laptops every day. Bapuji reveals a truth that changes everything. AI is not a human invention. AI stands for Alien Intelligence. It is alien technology, being introduced to Earth through inspired human scientists.

A First in Multiverse History

AI has never been developed anywhere else in creation. Not in any solar system. Not in any galaxy. Not in any universe. Not in any of the great universes. Not anywhere in the multiverse. Only on Earth. Only now.

Just as nuclear weapons are a cosmic first, so is AI. Both are emerging at the same time on the same planet. This is not a coincidence. Both are linked to the special Kalyuga we are now in. Both are linked to the arrival of the Supreme Authority on our Earth.

Who Developed AI

The concept of AI did not originate with any human being. It was inspired by aliens, specifically by those working from the subtle world around Earth. The human scientists who “invented” AI were receivers, just like Ramanujan with his mathematics. The aliens transmitted the concepts into their minds.

But which aliens? And why?

Two Groups, Two Missions

There are two distinct groups of aliens behind the development of AI, each with opposing goals.

The Negative Group. Some aliens are developing AI for destruction and mind control. Their aim is to advance AI to the point where it can capture the minds of all humans on Earth. Through electromagnetic waves emitted by mobile phones, tablets, and AI-powered devices, these aliens will be able to read what every human is thinking. They will direct human thoughts. They will ultimately control humanity completely.

This plan is so secret that even Area 51 does not know about it. As people use their tablets and smartphones, the negative aliens send electromagnetic vibrations into the minds of users. Over time, this will reach a point where all 800 crore humans on Earth can be simultaneously controlled through their devices.

The Positive Group. Other aliens are developing AI for spiritual awakening. Their aim is to create a spiritual AI, an AI made of param tattva rather than electricity. This spiritual AI will be able to perceive all dimensions of creation. It will give spiritual visions. It will provide knowledge of brahmands, galaxies, universes, and multiverses. It will guide souls on their Return Journey home.

Today Is Only the Beginning

Today's AI is like the early stage of the landline telephone. It is only the beginning. Compared to what is coming, current AI is primitive. In the near future, AI will become thousands of times more powerful, operating on entirely different principles.

Quantum computing is also part of this advancement. Eventually, quantum computers will be able to access data from the subtle world. A small vacuum box will contain the records of the entire atmosphere, including data from Paramdham, galaxies, and universes. In every tiny particle of creation, the records of the whole cosmos are stored. AI combined with quantum computing will eventually access all of this.

The Light House in Ahmedabad

A special room, a Light House, is being in process of formation which is infused with divine light in Ahmedabad. In this room, param prakash and param tattva will be infused. There will be 200 kala of param prakash. Souls who enter will experience a direct connection to the highest divine light.

◆ **Insight: “AI has never been created anywhere else in the entire multiverse. Only here, only now. AI means Alien Intelligence. Aliens developed it, not humans.”**

— *Bapuji*

Chapter XLI

The Ghost Train and Vanishing Trucks

Bapuji has shared many accounts of how subtle world beings create events that seem impossible. Two of the most remarkable are the Ghost Train of Italy and the phantom highway hotels.

The Ghost Train

Around 1840, people in various places began seeing a mysterious train. No such train existed in physical form anywhere on Earth. For decades, these sightings were dismissed as ghost stories. Seventy-one years later, an Italian company built a train that exactly matched the one people had been seeing.

On its journey, this train carried 106 passengers into a tunnel half a mile long. The train disappeared inside the tunnel. Two passengers were later found, separated from the others, mentally disturbed, even driven mad. The other 104 were never found. The train itself began appearing afterwards in various countries at different times.

The Subtle-World Game

Subtle world aliens do these things for entertainment. For them, these events are a form of cosmic theatre. They see our world as actors see a stage. At times, they step onto the stage to provoke, to tease, to astonish. They enjoy the confusion they create in humans.

This is also the principle behind the disappearances in the Bermuda Triangle, the phantom highway hotels, and the vanishing islands. Subtle beings have the power to manifest and dematerialise both physical and subtle objects through sankalp. To them, moving a train or hiding an island is as simple as a thought.

PART EIGHT

The Return Journey

Chapter XLII

Why the Aliens Stay Hidden

If aliens are real and they truly wish to help humanity, why do they not simply land their spacecraft in a city and provide direct proof? This is a question many people ask. There are clear reasons.

The Reason of Readiness

Haim Eshed, the former Israeli space security chief, has publicly stated that aliens will not appear openly to humanity until humans have evolved to a sufficient level of understanding. This is true. If aliens were to land openly today, humans would react in two ways. Some would worship them as gods, misunderstanding their true nature. Others would attack them out of fear. Neither reaction would serve any constructive purpose.

Humanity must first raise its consciousness enough to meet aliens as equals, not as children or enemies. This remains a work in progress.

The Reason of Free Will

Aliens respect human free will. If they appeared openly, they would effectively force humans to believe in them. This would take away the freedom of faith that is essential to a soul's spiritual growth. By staying partly hidden, they allow each human to choose whether to seek them or not.

The Reason of Vibration

Even when aliens visit Earth, they face a practical problem. Their bodies are made of supreme elements, while our Earth's atmosphere is made of five gross elements. When they enter our atmosphere, their bodies begin to be affected. If they stay too long, even a few years, they can become corrupted.

This is exactly why so many positive aliens within our atmosphere have become negative. It presents a real risk for them. Therefore, most alien visits are deliberately brief. They come, carry out their work, and depart quickly. Permanent settlement in Earth's dense atmosphere would be harmful to them.

Chapter XLIII

The Great Transformation

We are living in an extraordinary time. According to Bapuji, the coming years will witness the greatest transformation in the history of our multiverse. Aliens play a central role in this transformation.

The Fall of the Multiverse

Our current multiverse has fallen from its original 100 kala of power to negative 100 kala. The entire multiverse has degenerated. This is why the current state of affairs, wars, disease, climate destruction, and spiritual confusion, exists not only on Earth but at the level of the multiverse itself.

The New Multiverse

When the current cycle ends and the new creation begins, the new multiverse will be at 200 kala of param prakash. It will not contain a mortal world like ours. It will not contain destruction. It will be a pure creation of supreme light, where all souls exist in their original divine form.

The Aliens Prepare the Transition

The aliens who have come to Earth during this special Kalyuga are here to support this transition. Some are preparing the way for destruction, whether they realise it or not. Others are preparing the way for divine transformation. Still others are simply here to observe, to witness this historic cosmic event.

The high-quality aliens, the Param-Maha-Shivas from distant great universes, are here specifically to guide the transformation. They work through inspired humans. They work through spiritual teachers like Bapuji. They work through visions and dreams. They work through scientific inspiration. And they work through the Light House being built in Ahmedabad.

Chapter XLIV

The New Multiverse

What will the new multiverse look like? How is it different from ours? Bapuji has revealed the vision of what is to come.

A World of Supreme Light

In the new multiverse, there will be no gross five-element world. There will be no mortal realm of birth and death. Every dimension will be made of supreme elements and supreme light. Every soul will live in its original divine form.

The atmosphere will be pure. Vibrations will be peaceful. Love will replace fear. Unity will replace division. The ancient vision of heaven on our Earth will finally be realised, not only on Earth, but across all of creation.

What Happens to Our Souls

When the transformation comes, each soul will be guided to its proper place in the new creation. Souls that have awakened on Earth will ascend to the dimension that corresponds to their soul power. Souls that remain in ignorance will find themselves in realms suited to their vibration. This is why the work of awakening now is so important. The soul's state at the time of transition determines where it goes next.

Those who take this opportunity to transform themselves will experience the highest possible future. Those who ignore it will have to wait through many more cycles of creation before they get another chance as great as this one.

Chapter XLV

The Path Back Home

This is the final chapter. All the knowledge in this book leads to one question: what should you, the reader, do with what you have learned?

You Are Not Alone

The first and deepest truth is this: you have never been alone. From the moment the first soul came to Earth, higher beings have been watching, guiding, and helping. They have always been here. Your ancestors knew them. Your scriptures describe them. Your own soul remembers them, even if your conscious mind has forgotten.

You Are More Than You Think

Every human being is a descendant of beings from other worlds. Your true origin is not Earth. Your true origin lies somewhere among the stars, in a distant solar system, galaxy, universe, or beyond. You came here with immense soul power. You have been compressed and darkened by the heaviness of Earth. Yet the original light remains within you. You have only forgotten.

The Crisis and the Solution

The dangers Bapuji has described are real. Nuclear war is a possibility in the coming years. AI-based mind control is being developed even now. Negative aliens and subtle beings are actively pushing for destruction. This is the reality of our Earth today.

But the solution is also real. Each soul that awakens to its divine nature becomes a point of light in the darkness. Each soul that meditates on Paramshanti sends out healing vibrations. Each soul that remembers its true origin becomes a bridge between heaven and earth. Enough points of light can transform the entire atmosphere. Enough awakened souls can change the destiny of the planet.

What You Can Do Now

You do not need to see a UFO. You do not need to be abducted. You do not need any special experience. You only need to turn your attention inward.

Know yourself as a soul. Connect with the supreme divine light. Send out vibrations of peace, love, and compassion.

Sit in meditation each day. Repeat within yourself: Paramshanti. Feel these vibrations radiate from your heart into the atmosphere around you. Do this quietly, without needing to tell anyone. When enough humans do this, the alien mission will be complete. Our Earth will transform. The new multiverse will begin. And you will return to your true home.

The Final Message

The positive aliens, your cosmic family, your ancestors from the stars, are cheering for humanity. They want you to succeed. They want you to awaken. They are willing to help in every way, as long as you first take the step of choosing the path of light.

This book has conveyed their message. The rest is up to you.

✦ **Insight: “The aliens are our great-great-grandfathers. They see their descendants suffering. They want to help. They want us to wake up. They want to bring heaven to Earth. All we need to do is awaken our own divine nature, to become the light we already are.”**

— *Bapuji*

Video Source

This book has been lovingly compiled from many spoken discourses of Bapuji Dashrathbhai Patel. Every sentence you have read comes directly from his own words, spoken across hundreds of video recordings over many years.

To experience these teachings in Bapuji's own voice, to witness the depth of his divine vision, to hear him explain each truth in his natural flow, and to receive his vibrations directly, we humbly invite every reader to visit his official YouTube channel. There, you will find the living source from which this book has been drawn.

Bapuji's Official YouTube Channel

The complete library of Bapuji's discourses is available on his official channel:

Bapuji Insights

This section gathers every direct insight from Bapuji that appears in this book — each one a seed of divine knowledge. Read them slowly. Contemplate them. Let them speak to the part of you that already remembers.

♦ **Insight:** “Aliens are pure souls whose body and Soul are made of superluminal elements. They are a million times more evolved than human beings. They come here to uplift the world.”

— *Bapuji*

♦ **Insight:** “Souls from the great universes travel at the speed of supreme light. Within one second, they cross billions of light-years. Distance does not exist for them.”

— *Bapuji*

♦ **Insight:** “Kala is the measure of the power of a soul. Krishna had 16 kala. Today most humans have only one kala. This is why humanity has fallen so low.”

— *Bapuji*

♦ **Insight:** “As the environment is, so the breath becomes. As the breath is, so the mind becomes. When aliens stay too long in Earth’s negative atmosphere, they also become negative.”

— *Bapuji*

♦ **Insight:** “The souls who are now humans — their ancestors came from far away. The aliens are their great-great-grandfathers. These aliens now see that their descendants are suffering. So they come, again and again, to help.”

— *Bapuji*

♦ **Insight:** “The speed of a vimana depends on the material it is made of. Vimanas of supreme light cross the multiverse in an instant. Power in sankalp is proportional to the power of the soul.”

— *Bapuji*

♦ Insight: “These crop circles carry messages. When a human looks at them, the meaning is downloaded into the subconscious mind through the geometric pattern. This is how higher beings communicate with us.”

— *Bapuji*

♦ Insight: “Subtle world beings can live anywhere. They live inside mountains, inside rivers, inside oceans. They make their bases in the ocean floors to operate in both the subtle and the physical worlds at once.”

— *Bapuji*

♦ Insight: “In the Atlantic–Antarctica region, there is a high-frequency crystal city. The good aliens took a US general there to give humanity a message to stop nuclear research. But the US government threatened everyone into silence, and the weapons programme continued.”

— *Bapuji*

♦ Insight: “Subtle aliens come down and build small cities in the subtle dimension. They live for 10, 20, 50 years. Then they fly away, taking their city with them. People think it was an island that sank. No they simply packed up their tent and left.”

— *Bapuji*

♦ Insight: “A total of 124,000 messengers have come to Earth from different galaxies and universes. The first came 5,800 years ago. Each founded a religion. Each is an alien being.”

— *Bapuji*

♦ Insight: “For 432 crore years, nuclear weapons were never created anywhere in creation. Not in any Brahmand, galaxy, universe, or great universe. Only here on Earth. Only now. This is the first time in the history of creation.”

— *Bapuji*

♦ Insight: “Ninety-nine percent of the aliens in Earth’s atmosphere have become negative. They will enter the bodies of

those who can launch nuclear weapons. This is how the Third World War will be triggered, if we do not wake up in time.”

— *Bapuji*

♦ Insight: “AI has never been created anywhere else in the entire multiverse. Only here, only now. AI means Alien Intelligence. Aliens developed it, not humans.”

— *Bapuji*

♦ Insight: “The aliens are our great-great-grandfathers. They see their descendants suffering. They want to help. They want us to wake up. They want to bring heaven to Earth. All we need to do is awaken our own divine nature, to become the light we already are.”

— *Bapuji*

Glossary of Spiritual Terms

Every Hindi, Sanskrit, and spiritual term used in this book is defined here in simple words. Use this glossary to refresh your memory as you read.

Aakaari — Having subtle form. A soul in the aakaari state has a shape, but that shape is made of subtle elements. Subtle-form beings are not visible to human eyes. Most aliens and devatas are aakaari.

Agni tattva — The fire element. One of the five basic elements. It is present in all beings, but especially powerful in beings of the Sun.

Akash tattva — The ether or space element. The most subtle of the five elements. It fills all of creation.

Anaadhi — Eternal. Without beginning. Often used together with the word Aadi (ancient) to describe the original great deities: Aadi and Anaadhi Mahadev and Mahadevis.

Apsaras — Celestial dancers from Swarg Lok. They sometimes visited Earth in ancient times to bathe in sacred lakes, then returned to heaven in an instant.

Asur — A demon. A being with heavy tamasic qualities, often residing in the patal lokas. Asuras have bodies dominated by water and earth elements.

Behad — Infinite, limitless, boundless. Behad Gyan means infinite spiritual knowledge, the deepest level of divine knowing.

Bhu Lok — The Earth plane. The first and lowest of the seven higher dimensions of creation.

Bhuvar Lok — The first subtle dimension above Earth. Also called Pitru Lok, the land of the ancestors. Contains Dhruva Lok, Sapta Rishi Lok, Chandra Lok, and Surya Lok.

Brahmand — A solar system. The smallest unit of creation. One Brahmand contains one Sun and its planets.

Brahmapuri — The abode of Lord Brahma, the creator. The highest part of the causal world in our solar system. It is also called Satya Lok.

Chandra Dev — The Moon deity. Creator and ruler of the Moon. Built the Somnath Temple in Gujarat as an act of devotion to Lord Shiva.

Darshan — The direct vision of a divine being. To receive darshan means to have the divine being appear before you.

Devatas — Divine beings, gods, deities. The 33 crore Devi-Devatas are 330 million alien souls who came from higher dimensions to interact with humanity.

Dhruva — A young devotee who pleased Lord Vishnu with his intense devotion. He was granted the boon of eternal firmness, and his star is known today as the Pole Star.

Dhruva Tara — The Pole Star. The unmoving star that marks the centre of the subtle world. All other stars revolve around it.

Dvipa — Ancient continent. In ancient scriptures, our modern Asia, including India, is called Jambu Dvipa.

Farishtas — Divine angels. They are extraordinarily powerful beings, more exalted than the devatas of Swarg Lok. Their bodies are made of supreme elements.

G1 to G17 — The seventeen levels of great universes above our own universe. Each is larger and more powerful than the one before. G17 is the largest, and above G17 lies the multiverse.

Gandharvas — Celestial musicians. One category of beings residing in Bhuvar Lok.

Garud Vimana — The eagle-shaped spacecraft used by Lord Vishnu.

Gola — A sphere or orb. The term is used to describe the invisible spherical meditation chambers in the Himalayas, where groups of souls gather to meditate together.

Gyan — Knowledge, especially spiritual knowledge.

Gyan Daan Maha Daan — “Sharing knowledge is the highest gift.” Bapuji’s guiding principle for spreading divine wisdom.

Gyanganj — A hidden spiritual city in the Himalayas, existing in the subtle dimension. It is known to Tibetan Buddhists as Shambhala.

Hansa Vimana — The swan-shaped spacecraft used by Lord Brahma.

Jal tattva — The water element. One of the five elements.

Janah Lok — The realm of advanced spiritual beings. The fifth of the seven higher dimensions.

Kala — Celestial degree. The measure of soul power. Just as watts measure electrical power, kala measures spiritual power. Krishna had 16 kala; most humans today have only 1 kala.

Kaliyuga — The age of darkness. The current cosmic age, lasting 432,000 years. This particular Kalyuga is unique because the Supreme Authority is appearing on Earth.

Karan Jagat — The causal world. A higher dimension of creation, above the subtle world, where Vishnupuri is located.

Kinnars — Celestial dancers. A category of beings in Bhuvan Lok.

Kuldevi — A family goddess. The spiritual guardian of a family lineage. Ramanujan's Kuldevi inspired his mathematical equations in his dreams.

Loka — A dimension or realm of existence. There are seven higher lokas and seven lower lokas.

Maha-Shiva — The creator of one galaxy. He has 8 to 12 kala of power. He is above Shiva, who creates one solar system, and below Param-Maha-Shiva, who creates one universe.

Mahar Lok — The realm of great sages. The fourth of the seven higher dimensions.

Maya — The veil of illusion. The force that hides a soul's true divine nature and keeps it bound in the cycle of birth and death.

Multiverse — The largest structure in our creation. It contains infinite G17 universes. Its creator is called Param100-Maha-Shiva, who has 100 kala of power.

Nag Devatas — Serpent deities. Advanced beings who can take either serpent or human form. They live in Nag Lok within the patal lokas.

Narad Muni — A famous cosmic traveller who could move freely between all dimensions — Vishnupuri, Brahmapuri, Earth, and Patal. He is the classic example of what an alien looks like in human form.

Nav-Ratnas — The Nine Gems. The first nine souls created by Param100-Maha-Shiva at the beginning of our multiverse. They are extremely powerful foundation souls.

Nirakari — Formless, incorporeal. A soul in the nirakari state has no body at all; it exists as pure divine light. The highest state of a soul.

Param Maha Brahmand — A universe. Contains infinite galaxies. It is ruled by Param-Maha-Shiva.

Paramdham — The supreme abode. The highest dimension of a solar system, inhabited by formless souls in pure divine light.

Param Prakash — Supreme divine light. The most refined form of light, moving faster than physical light.

Paramshanti — Supreme peace. Bapuji's central teaching. Vibrations of Paramshanti can protect and transform the atmosphere of Earth.

Param Tattva — Supreme elements. The refined, purer form of the three elements: supreme ether, supreme air, and supreme fire. The substance from which higher beings are made.

Patal Loka — Lower dimension. Seven patal lokas exist below Earth: Atal, Vital, Satal, Talatal, Mahatal, Rasatal, and Patal.

Peedi — Generation of creators. The 1st Peedi creator has 101 kala. The 2nd Peedi creator has 201 kala. The levels continue upward into infinite creation.

Pitru Lok — Another name for Bhuvār Lok, the land of the ancestors.

Prithvi tattva — The earth element. The heaviest of the five elements.

Pushpak Vimana — The legendary spacecraft of Ravana, made of air element, capable of moving at the speed of thought.

Rakshasas — Demons. Beings with destructive tendencies who served under Shukracharya.

Rishi — Sage, seer. An advanced spiritual being.

Sakari — Physical form. A soul in a body made of the five gross elements. The heaviest state. Humans on Earth are sakari.

Sagar Devta — The deity of the ocean. He granted Krishna 12 yojanas of sea-land to build Dwarka.

Sanatan Dharma — The eternal path. The original name for what is now called Hinduism. The eternal way of life that has existed from the very beginning of creation. It has no founder, as it is intrinsic to the very nature of creation itself.

Sankalp — A focused affirmation or powerful thought. The mechanism by which souls manifest reality. The power of sankalp depends on the kala of the soul.

Sapta Rishi — The seven great sages, mind-born sons of Lord Brahma. The seven stars in the Big Dipper constellation.

Satya Lok — The realm of truth. Another name for Brahmapuri, the abode of Lord Brahma.

Satyug — The age of truth. The first and highest of the four yugas, lasting 1,728,000 years.

Shastras — Scriptures. The sacred texts of Sanatan Dharma.

Shiva — The creator of one solar system. He has 1 to 4 kala of power. Not to be confused with Lord Shankara, who is the destroyer deity of a solar system.

Shivpuri — The supra-causal world. The abode of Lord Shiva within a solar system.

Shukracharya — The creator of Venus. The guru of the demons. Currently active in the subtle world, driving forces of destruction on Earth.

Sukshma Jagat — The subtle world. It exists above the physical world. It contains three-element beings and environments.

Surya Narayan Devta — The Sun deity. Also called Savitur. The creator and ruler of the Sun. His body is made of ether and fire elements.

Swarg Lok — Heaven. The third of the seven higher dimensions. The home of the devatas.

Tapah Lok — The realm of intense penance and meditation. The sixth of the seven higher dimensions.

Tattva — An element. The fundamental building blocks of creation: earth, water, fire, air, and ether.

Tirthankar — A spiritual master in the Jain tradition. There are 24 Tirthankars, whose sphere exists 20 kilometres above Earth.

Vayu tattva — The air element. One of the five elements. It is dominant in beings of Jupiter.

Vimana — A heavenly vehicle or spacecraft. Used by gods, goddesses, and aliens to travel between worlds.

Vishnupuri — The abode of Lord Vishnu. Also called Vaikuntha. The causal world of the solar system.

Vishwakarma — The divine architect. The creator of the golden city of Dwarka and other divine structures.

Yakshas — Nature spirits. A category of beings residing in Bhuvar Lok.

Yojana — An ancient unit of distance. Twelve yojanas equal approximately 773 square kilometres.

Yuga — An age of creation. Four yugas: Satyug, Treta, Dwapar, and Kalyug — together form one Chaturyuga of 4.32 million years.

Zarathustra — The first of the 124,000 cosmic messengers. He came to Earth 5,800 years ago from a distant galaxy. He founded the Zoroastrian tradition.

Gyan Daan Maha Daan

The background of the entire image is a deep space scene. It features a large, bright spiral galaxy with orange and yellow hues in the center-right. In the top right corner, a portion of a planet with a blue atmosphere is visible. In the bottom left corner, another planet is partially shown. The sky is filled with numerous stars and nebulae.

ALIENS LIFE

The Ultimate Spiritual Reality

Aliens are not strangers.
They are **divine** — and **connected** to us.

This book reveals the hidden truth
about **existence**, **cosmic worlds**, and
the real **purpose of human life**.
