About Bapuji

Bapuji (full name: Bapuji Dashrathbhai Patel, also lovingly called "Dadaji" by the younger generation) was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat. However, he spent his childhood in another village named Ambasan, also located in the Mehsana district.

In the early part of his life, he was a highly successful lawyer. Later, he devoted his life to realising the supreme spiritual truth and bringing this divine knowledge forward for the welfare of humanity. Today, this supreme knowledge serves as a guiding light for true seekers to realise their ultimate destiny. It is a blessing of the highest divinity that the present time is witnessing the rise of this supreme spiritual knowledge, guiding souls on Earth to return to their original source.

Despite being raised in a very poor family and facing challenging circumstances, Bapuji had a deep desire to transform this sorrowful and suffering world into a better place. At the young age of six, he questioned God repeatedly, asking why God remained silent about the suffering of humanity. This intense longing to end human suffering eventually led him to attain the highest level of spirituality later in life.

Even as a child, Bapuji would spend hours alone in the fields, often neglecting his own comfort. Due to poverty, he would walk barefoot without shoes or sandals, frequently getting pricked by thorns. Many times, he would stay late in the fields and, on his way back home, encounter subtle world entities. These experiences sparked his interest in communicating with subtle world souls.

Bapuji was courageous from a young age, which helped him overcome many obstacles. Alongside his studies in chartered accountancy (CA), he gave tuition classes to support himself financially. Later, he completed his Bachelor of Law (LLB) degree and became a well-known lawyer in Ahmedabad.

In 1997, he established a spiritual institution called "Vishwa Parivartak Ishwariya Vidhyalay" in Chenpur, Ahmedabad, with the mission of transforming this mortal world, filled with suffering and disorder, into an eternal divine world of immortality. Smt. Sushma Tandon, lovingly known as "Maa," worked alongside Bapuji in this grand divine mission.

To accomplish this mission, Bapuji worked tirelessly, dedicating all his resources to this divine purpose. During that time, he would deliver continuous spiritual discourses for up to 18 hours without rest. In these discourses, he explained the highest dimensions of divine knowledge, which he realised through deep meditation and divine vision in a state of superconsciousness. This knowledge goes beyond the imagination of the ordinary human mind.

Bapuji's teachings cover a vast range of topics, including the types of celestial creators across different dimensions, the creation of our solar system, galaxy, and universe, and most importantly, the transcendental knowledge of the multiverse and realities beyond it. His knowledge is supremely profound and is intended for highly evolved seekers, referred to as "behad souls." According to Bapuji, these "behad souls" will play a key role in transforming this mortal world into an eternal divine realm.

At present, Bapuji remains deeply engaged in intense meditation and samadhi for long hours. He does not meet anyone, as he is continuously immersed in his transcendental mission in a superconscious state.

Preface

Gyan Daan Maha Daan

*(Sharing Knowledge is the highest charity — share to the maximum extent with all.) —
Bapuji Dashrathbhai Patel*

The journey into Behad Gyan does not follow the path of ordinary learning. It is a journey of unfolding — each day peeling away another layer of illusion, each revelation building upon the one before. By Day 3, we explored the architecture of the 14 Lokas, the Kalachakra, and the vast hierarchy of dimensions that exist above and below this Earth. We began to see that the universe is not a random, chaotic occurrence, but an intricately designed system of energy, time, and consciousness.

Day 4 takes us even deeper. It moves from the question of "What exists?" to the fundamental question — "How did it all come into existence?"

This is the day we explore the creation of this Earth, the formation of this Brahmand, and the cosmic hierarchy responsible for bringing existence into being. From the Niraakar Shiva to the Aakaari Sada Shiva and Sada Shakti, from Vishnu to Prajapita Brahma and the Sapt Rishi — the entire chain of creation unfolds before us.

We also address profound questions that the seeking mind naturally carries: Why was the Earth needed? When was it formed? Why was the Sun created? What is the difference between Shiva and Shankar? And most importantly — who is the true creator of this Brahmand?

This is not mythology. This is not philosophy. This is the precise, revealed knowledge of the cosmic blueprint, as realised through the divine vision of Bapuji Dashrathbhai Patel.

This is not just knowledge to be read.

It is knowledge to be realised.

About This Series

This book is part of a 10-day spiritual journey designed to expand human consciousness beyond limits. Each day reveals deeper layers of truth, guiding the reader from self-awareness to universal understanding.

Based on the Divine Knowledge of

Bapuji Dashrathbhai Patel

This book is a structured presentation of spiritual knowledge shared through discourses.

How to Read This Book

This is not just a book to read, but a knowledge to experience. Read slowly. Reflect deeply. Let each thought transform your inner state.

INTRODUCTION

On Day 1, we discovered that we are the *atma* — eternal, conscious, luminous, and far older than this body or this lifetime. On Day 2, we learned that *karma* is the cosmic law that records every thought, word, and action, drawing the soul through cycle after cycle of birth and death. On Day 3, we mapped the architecture of existence — the fourteen *lokas*, the *kaal chakra*, and the long arc of cosmic time within which all of this unfolds.

Today, on Day 4, we ask the question that follows naturally: how did all of this come into being? Where does this Earth come from? Who created this *Brahmand*, and through what divine process? The answer takes us to the very root of existence — to the timeless truths of *Sanatan Dharma*, the eternal blueprint of creation.

We will trace the descending chain of creation from the formless *Niraakar Shiva* to the first *aakari* forms of *Sada Shiva* and *Sada Shakti*, from *Vishnu* to *Prajapita Brahma*, from the *Sapt Rishi* to the seven *lokas*, and finally to the appearance of this Earth — formed only when the descending *devi-devtas* needed a *karma-bhumi* to continue their journey. We will see why *Brahma Puri*, *Vishnu Puri*, *Shiva Puri*, and *Paramdham* are not the same realm, and how the entire universe was, in its origin, made of *param tatva* alone — *sthool tatva* came much later.

This is the cosmic blueprint every soul must remember if it wishes to find its way home.

Let us begin.

Day 4

*Creation of Earth & Sanatan Dharma Gyan | The Cosmic Blueprint of
Existence*

Day 4 takes the journey from understanding the Architecture of the cosmos to understanding how and why it all came into being.

It reveals the hierarchy of creation, the birth of the Earth, and the cosmic forces that sustain all existence.

This knowledge is not philosophical — it is the foundation of all reality.

Chapter I

Recap: The Kalachakra and the 14 Lokas

Before stepping into the creation of this Earth and the cosmic hierarchy, it is essential to recall the foundation laid in Day 3. We explored the Kalachakra — the great wheel of time — and understood that the entire *Brahmand* operates within fixed time cycles of *Sat Yug*, *Treta Yug*, *Dwapar Yug*, and *Kali Yug*. Time, in the context of Behad Gyan, is not merely a measurement; it is power itself. As time shifts, so does the energy of the creation, the quality of the elements, and the consciousness of the souls within it. Thus, in each yuga the soul's power and consciousness is at different level depending the type of time cycle on earth i.e. *Yuga*.

We also journeyed through the 14 Lokas — the seven realms above Earth and the seven realms below. Each *loka* represents a distinct dimension of existence, with its own quality of elements, energy, and inhabitants.

We understood that the age of this *Brahmand* is measured in *Brahma's* years — specifically, 100 years of *Brahma* is the total time span of our *Brahmand*. One second of *Brahma's* time equals approximately one lakh (100,000) human years on Earth. The total lifespan of this *Brahmand* stretches to approximately **311 trillion (*kharaab*) and 40 crore (*korod*) years**. Currently, *Brahma's* second *Parardha* is in progress (i.e. second half of 100 years of *Brahma*) — Currently this is the first day of second *Parardh* which is unfolding, specifically the seventh *Manvantara* and the 28th *Yugantar*. Approximately 198 crore years of the second *Parardha* have already been elapsed on Earth.

With this understanding of time cycle on earth, we are now prepared to explore the most profound question: How did this entire creation has come into existence?

♦ Bapuji Insight:

"Bina kalachakra ko samjhe, brahmand ki rachna ko samajhna asambhav hai."

"Without understanding the time cycle (Kalachakra), it is impossible to understand the creation of the Brahmand."

♦ Bapuji Insight:

"Samay sirf ghadi ki sui nahi hai — samay shakti hai, samay parivartanshil hai."

"Time is not just the ticking of a clock — time is power, time is subjected to transformation through soul power."

Chapter II

Satya Loka and Brahma Puri

A common question that arises among seekers is whether Satya Loka and Brahma Puri are the same. The answer is no. Satya Loka and Brahma Puri are distinct realms, though both exist in the higher realms of this *Brahmand*.

Satya Loka is the seventh and highest of the seven *lokas* above Earth. It was created by the *Sapt Rishis*, and its boundary forms a sphere of truth and purity. This is the realm where the three elements (*Akash, Vayu, Agni*) still exist, but in their most refined and subtle form. It is a world of truth, but it is still within the domain of the three elemental qualities of *Prakriti* i.e. *Maya*

Brahma Puri sits above Satya Loka. While Satya Loka has an extremely refined form of the three elements, Brahma Puri begins to transition into the realm of Param Tatva. However, even within Brahma Puri, trace of Maya (illusion) exists. As Bapuji has explained, there is a subtle, almost imperceptible presence of Maya even at this level. It is only when the soul ascends beyond Brahma Puri into Vishnu Puri that Maya is fully dissolved.

This distinction is critical for the seeker. Understanding that even the highest layers of ordinary creation retain a trace of illusion reveals why the journey does not end at Satya Loka. The soul must continue ascending, shedding each layer of elemental weight, until it reaches the realms of pure Param Tatva.

♦ Bapuji Insight:

"Satya Loka aur Brahma Puri ek nahi hai — Brahma Puri, Satya Loka ke upar ki layer hai."

"Satya Loka and Brahma Puri are not the same — Brahma Puri is the layer above Satya Loka."

♦ Bapuji Insight:

"Brahma Puri mein bhi halka sa maya ka ansh hota hai — poori tarah maya sirf Vishnu Puri mein lupt hoti hai."

"Even in Brahma Puri, trace of Maya exists — Maya fully gets annihilated only in Vishnu Puri."

Chapter III

Vishnu Puri — The Causal World (Karan Jagat)

Above *Brahma Puri* lies *Vishnu Puri*, also known as *Baikunth Dham* and *Gokul Dham*. This is the realm referred to as the *Karan Jagat* — the Causal World. Here, the nature of existence undergoes a fundamental shift. The three ordinary elements begin to dissolve, and the world transitions into one governed by *Param Tatva* — the supreme element. Supreme elements are very powerful elements compared to normal three elements (*vayu*, *agni*, *akash*) and supreme elements (*param vayu*, *param agni*, *param akash*) have very high level of creative power inside it to manifest the affirmations of souls.

Vishnu Puri is composed of approximately 50% *Param Tatva* and 50% refined ordinary three elements. It is a realm of extraordinary beauty and subtlety, far beyond anything the physical imagination can conceive. The devotees of *Vishnu*, *Krishna*, and *Narayan* — those whose entire life's devotion has been oriented toward these divine forms — find their destination here after departing from the physical body. This follows the principle of "*Ant Mate So Gati*" — as is the final thought at the time of death, so is the next state of soul after death.

Bapuji has shared that within Vishnu Puri, there exist realms of indescribable splendour. The ancient references to Gokul Dham and the divine Ras Leela are not merely symbolic stories from the past. These are living realities that continue to exist in the subtle dimensions even today.

Real-life experiences confirm these truths. There are accounts of devoted souls who, after leaving the physical body, have appeared in the dreams of their family members and shared that they have reached Vishnu Puri. One such account involves a young man, a deep devotee of Vishnu, who passed away around the age of 25—30. After his departure, he appeared in his father's dream and told him not to grieve, saying he had reached Vishnu Puri and the world there is beautiful beyond description.

These experiences point to a consistent truth: the subtle world is real, populated, and structured. The population of the subtle realms is infinitely greater than the population on Earth.

♦ **Bapuji Insight:**

"Vishnu Puri ko Karan Jagat kaha gaya hai — yahan se maya lupt ho jati hai."

"Vishnu Puri is called the Causal World — here Maya ceases to exist."

♦ **Bapuji Insight:**

"Jo aatma Vishnu ko, Krishna ko yaad karti hai, uski gati Vishnu Puri mein hoti hai."

"The soul that remembers Vishnu and Krishna, its destination is Vishnu Puri."

Chapter IV

Param Tatva — The Supreme Element

The concept of *Param Tatva* is one of the most profound revelations in *Behad Gyan*. In devotional prayers, we often hear the plea: "*Hey Prabhu, tum mujhe Param Tatva mein le jao*" — O Lord, take me into the supreme element. But what does this truly mean?

The word "*Param*" signifies supreme, that means which is beyond birth, death, time, age, and all material existence. It is the refined, purified essence of all elements. When any substance is refined to its purest state, its core essence is revealed. Similarly, when the elements that compose our bodies and the creation around us are refined beyond their physical, subtle, and causal states, what remains is *Param Tatva*.

In the lower dimensions, the soul's body is composed of five elements (*Panch Mahabhoot*): *Akash, Vayu, Agni, Jal, and Prithvi*. As the soul ascends through higher dimensions, the heavier elements progressively diminishes as per law of spirit world in different dimensions. By the time one reaches *Satya Loka*, only three subtle elements remain. Beyond *Brahma Puri*, even these begin to transform into *Param Tatva*.

→ **In Vishnu Puri — the body is 50% Param Tatva**

→ **In Shiva Puri — the body is 100% Param Tatva**

→ **In Paramdhaam — even elemental composition dissolves entirely**

This is the true meaning of the spiritual journey: progressively shedding the weight of elements until only the pure, luminous essence of the soul remains.

♦ **Bapuji Insight:**

"Param Tatva matlab — jo samay, janm, mrityu, aur sab tattvon se pare hai."

"Param Tatva means that which is beyond time, birth, death, and all elements."

♦ **Bapuji Insight:**

"Jaise jaise upar jaoge, tumhara sharir halka hota jayega — param tatva ka hota jayega."

"As you ascend higher, your body becomes lighter — it transforms into Param Tatva."

Chapter V

Shiva Puri — The Abode of Sada Shiva

Above Vishnu Puri exists Shiva Puri, also known as Shiva Loka. This is the realm of 100% Param Tatva — a world entirely composed of the supreme elements. Here, the ordinary three elements have completely dissolved, and only the purest form of divine energy remains.

Shiva Puri is the abode of Sada Shiva and Sada Shakti, whom we also refer to as Aadi Shiva and Aadi Shakti. They are the first divine beings who emerged from Niraakar Shiva (the formless supreme consciousness) in our *Brahmand*. They are the Aakaari (most subtle) manifestations of the formless divine.

The world of *Shiva Puri* is a realm where boundaries are not made of physical walls or structures, but of energy fields. The dwellings of beings here are not houses in the earthly sense but energetic enclosures — spheres of vibration and light. Each being has its own sphere of energy, its own cosmic space, defined not by matter but by the power of its consciousness.

Shiva Puri is also the realm from which the creation of this Brahmand was directed. It was from here that the cosmic blueprint unfolded downward, eventually leading to the formation of various *lokas*/dimensions of creation, the elements, the Sun, and the Earth itself.

♦ Bapuji Insight:

"Shiva Puri mein 100% Param Tatva ki duniya hoti hai — yahan koi sthool tatva nahi hota."

"Shiva Puri is a world of 100% Param Tatva — no gross element exists here."

♦ Bapuji Insight:

"Sada Shiva aur Sada Shakti — ye Niraakar Shiva ke pehle aakaari roop hain."

"Sada Shiva and Sada Shakti are the first subtlest manifestations of the formless Shiva."

Chapter VI

Paramdhaam — The Supreme Abode

At the very pinnacle of this *Brahmand* exists supreme abode of creator called *Paramdhaam* — the supreme abode. This is the highest dimension, the realm referred to in the Bhagavad Gita when the Supreme says: "Surrender all relationships to Me, remember Me alone, and I shall destroy all your karmic burdens and take you to *Paramdhaam*."

Paramdhaam is the realm of *Niraakar Shiva* — the formless, attribute less, supreme consciousness. Here, there is no form (*Aakar*), no quality (*Gun*), no karmic bondage, and no trace of Maya. The souls that reside here are *Nirankari* (formless), *Nirvikari* (free from defects), and *Nirguni* (beyond all qualities). They exist in a state of pure, self-luminous consciousness.

This is the realm that every soul, consciously or unconsciously, yearns to return to. It is the original home of the soul. The entire spiritual journey is, in essence, a journey back to *Paramdhaam*.

It is important to understand that this *Paramdhaam* is the *Paramdhaam* of this specific *Brahmand*. Beyond this *Brahmand*, there exist infinite other Brahmands, each with their own *Paramdhaam*. This broader cosmic landscape will be explored in the coming days of this course.

♦ Bapuji Insight:

"Paramdhaam is brahmand ka sabse uncha dhaam hai — yahan sirf niraakar aatmaein hoti hain."

"Paramdhaam is the highest dimension of the Brahmand — only formless souls reside here."

♦ Bapuji Insight:

"Gita mein bhagwan ne kaha — deh aur deh ke sambandh bhulke, mujhe yaad kar, main tujhe Paramdhaam le jaunga."

"In the Gita, the Lord said — forget your body and all bodily relations, remember Me, and I shall take you to Paramdhaam."

Chapter VII

The Difference Between Shiva and Shankar

One of the most critical clarifications offered in *Behad Gyan* is the distinction between *Shiva* and *Shankar*. In popular devotional practice, these two names are used interchangeably. However, this is one of the most significant misunderstandings in spiritual knowledge.

Shiva refers to the *Niraakar* (formless) supreme consciousness — the *Par Brahm Parameshwar*. *Shiva* is *Nirguna*, *Nirankar*, *Niranjan*, *Nirvikari*, and *Trigunaateet*. *Shiva* resides in *Paramdhaam*, the highest abode of this *Brahmand*.

Shankar, on the other hand, is the avatar on earth— the incarnation of the formless *Shiva*. *Shankar* has manifested in various avatars across different time periods. He resides in *Kailash* with his divine family — *Parvati*, *Ganesh*, and *Kartikaya*. Even today, as *Bapuji* has revealed, *Shankar* exists in his subtle form at *Kailash Mansarovar*, and many devoted souls experience his divine presence during pilgrimage to *Mansarovar*.

→ ***Shiva* is the source — formless, beyond all attributes**

→ ***Shankar* is the manifested form of *Shiva* on earth, the avatar**

The term "*Ayonij*" (without any parents) applies to *Shankar* — he has no parents in the earthly sense, as he emerged directly from the *Aakaari Shiva*. However, even *Shiva*, the *Niraakar Par Brahm*, has a creator, which will be revealed in the upcoming episodes of this course. *Swayambhu* that is self-manifested is applicable to only Almighty Authority in true sense and all others are created at some point of time in the creation.

Bapuji has also clarified that some *avatars* belong to the *Aakaari Shiva* (*Sada Shiva*), while others are specifically *avatars of Shankar*. This distinction has been mixed up over time in the scriptures, leading to widespread confusion in spiritual understanding.

♦ **Bapuji Insight:**

"Shiva niraakar hai, Shankar sakari avatar hai — dono ek nahi hain."

"Shiva is formless, Shankar is the avatar — they are not the same."

✦ **Bapuji Insight:**

"Bhakti marg mein Shiva aur Shankar ko ek kar diya gaya — yeh sabse badi confusion hai."

"In the path of devotion, Shiva and Shankar were merged — this is the biggest confusion."

Chapter VIII

The Creator of This Brahmand

Who created this *Brahmand*? The answer, as revealed through *Behad Gyan*, is both precise and layered.

The formless *Shiva* — *Niraakar Par Brahm Parameshwar* — is the supreme lord of this *Brahmand*. However, Shiva does not directly create the *Srishti*. The creation of the material world follows a specific chain of divine hierarchy.

The process begins when *Sankalp* (intention) arose within *Niraakar Shiva* — the intention to become "one from many." From this *Sankalp*, Shiva produced from within himself the *Aakaari Shiva*, known as *Sada Shiva*. After *Sada Shiva*, the feminine divine energy emerged as *Sada Shakti*.

Together, *Sada Shiva* and *Sada Shakti* then produced *Vishnu*. *Vishnu* here is the combined form of *Lakshmi* and *Narayan*. From *Vishnu*'s navel emerged *Brahma* — *Prajapita Brahma*, the direct creator of this Creation that is *Srishti* i.e. various lokas/dimensions.

→ *Niraakar Shiva* → *Sada Shiva* + *Sada Shakti* → *Vishnu* (*Lakshmi-Narayan*) → *Prajapita Brahma*

Prajapita Brahma is the one who directly created the *Sapt Rishis* and the seven *lokas*/dimensions. He is the *Prajapati* — the progenitor of all life forms within this *Brahmand*. This is consistent with what *Bapuji* has taught across multiple discourses over many years.

♦ Bapuji Insight:

"*Niraakar Shiva* ne seedha *srishti* nahi banai — *srishti* ka creator *Prajapita Brahma* hai."

"*The formless Shiva did not directly create the world — the creator of Srishti is Prajapita Brahma.*"

♦ Bapuji Insight:

"*Sada Shiva aur Sada Shakti ne milkar Vishnu ko prakat kiya, aur Vishnu ki nabhi se Brahma aaye.*"

"Sada Shiva and Sada Shakti together manifested Vishnu, and from Vishnu's navel, Brahma emerged."

Chapter IX

The Hierarchy of Creation

The creation of this *Brahmand* is not an isolated event but an unfolding chain from the most subtle to the most dense.

At the very top is *Niraakar Shiva*. From *Niraakar Shiva*, the first *Sankalp* produced *Akaari Shiva*. From *Akari Shiva* emerged *Akari Shakti*. Together they produced *Vishnu*, and from *Vishnu*'s navel emerged *Brahma*.

Brahma then created the seven illuminating forms called as *Sapt Param Purush* — seven supreme beings identical to himself in power. These are also known as the *Sapt Rishi*. Each of them created *Sapt Param Prakriti* — seven supreme feminine energies. Together, the *Param Purush* and *Param Prakriti* formed the foundation of creation from which all further creation descended.

It is these divine beings who created the seven *lokas*/ dimensions above Earth, who established the dimensional structure of the *Brahmand*, and who set into motion the process by which souls would incarnate into denser forms of existence. Every being on Earth today is a descendant of this original divine lineage.

This entire chain of creation took place in the realm of *Param Tatva*. The need for physical elements, for Earth, and for the Sun arose only later, as the creation progressively descended to lower heavier dimensions.

♦ Bapuji Insight:

"Pehle sirf param tatva ki duniya thi — sthool duniya ki zaroorat baad mein padi."

"First, only the world of Param Tatva existed — the need for the gross world came later."

♦ Bapuji Insight:

"Brahma ne apne saman hi sapt param purush banaye — aur unhone sapt param prakriti banai."

"Brahma created seven supreme beings like himself — and they created seven supreme feminine energies."

Chapter X

Prajapita Brahma and the Sapt Rishi

Prajapita Brahma holds a unique position in the hierarchy of creation. He is the actual, direct creator of the *Srishti*. His first act of creation was to produce seven beings of his own essence and power — the *Sapt Param Purush*, also known as the *Sapt Rishi*.

Each of these *Sapt Param Purush* then brought forth their own *Param Prakriti*. Together, these seven pairs became the architects of the seven *lokas* above Earth. They created the dimensional structure, established the energetic boundaries, and set the laws governing each realm.

This process was carried out entirely through *Sankalp* — the power of divine intention. There was no physical labor, no material tools. A single thought from these supreme beings was enough to bring an entire world into existence.

♦ Bapuji Insight:

"Prajapita Brahma ne sankalpna se hi srishti ki rachna kari — sankalp hi unka tool tha."

"Prajapita Brahma created the entire creation through intention alone — Sankalp was his tool."

♦ Bapuji Insight:

"Sapt Rishi ne saat lokon ki rachna kari — ye Brahma Puri ke neeche ke saath lok hain."

"The Sapt Rishi created the seven lokas — these are the seven realms below Brahma Puri."

Chapter XI

Param Purush and Param Prakriti

The relationship between *Param Purush* and *Param Prakriti* is the foundation upon which the entire creation rests. Param Purush represents the supreme masculine principle — consciousness, intention, and will. Param Prakriti represents the supreme feminine principle — energy, manifestation, and creative force.

In the highest realms, these two forces existed in perfect harmony and created through the combined power of their consciousness. Their creation was made entirely of *Param Tatva*.

As creation descended, the three gunas — Sattva, Rajas, and Tamas — began to emerge. In *Sat Yug*, *Sattva* dominated and the world was pure. Through *Treta*, *Dwapar*, and *Kali Yug*, *Rajas* and *Tamas* progressively increased, and the creation became denser, darker, and more conflicted.

This transformation is the natural consequence of the creative process itself — farther the creation moves away from its source, the denser it becomes.

♦ Bapuji Insight:

"Param Purush aur Param Prakriti — ye dono milkar hi srishti ki neev hain."

"Param Purush and Param Prakriti together are the foundation of creation."

♦ Bapuji Insight:

"Jaise jaise creation neeche aayi, param tatva se teen gunon ki duniya mein badal gayi."

"As creation descended, it transformed from Param Tatva into a world of three gunas."

Chapter XII

When and Why Earth Was Created

This is one of the most illuminating revelations of *Behad Gyan*: Earth did not always exist. For a vast stretch of cosmic time, there was no Earth, no Sun, no Moon, and no physical creation as we know it.

Earth was created out of necessity. As the *Param Purush* and *Param Prakriti* continued their creative process through *Sankalp*, they invested their energy into each act of creation. This caused their own power to diminish over time. The beings they created also engaged in further creation, and each successive generation was slightly less powerful.

This gradual descent continued until the beings — originally the *Devi-Devatas* — could no longer sustain themselves in the Param Tatva realm. Their bodies became heavier, their consciousness dimmer, their elements denser. They began to "fall" energetically.

→ **Earth was needed as a place for these descending beings to land**

From a scientific perspective, Earth is approximately 4.54 billion years old and the universe approximately 13.4 billion years old. In *Brahma's* time, Earth was created after his first 10 years had elapsed in the first *Parardha*. Before those 10 years, for approximately 300 trillion years before, no Earth existed.

When Earth was first created, it was not the dense planet we see today. Its composition was light and *sattvic* — the water, soil, and air were all refined and pure. Over the *Yugas*, as *Tamas* increased, the Earth became progressively denser.

♦ **Bapuji Insight:**

"Dharti pehle se nahi thi — jab devi devta girne lage, tab dharti banai gayi."

"Earth did not exist from the beginning — when the Devi-Devatas began to descend, Earth was created."

♦ **Bapuji Insight:**

"Lagbhag 310 kharab saal tak koi dharti nahi thi — param tatva ki hi duniya thi."

"For approximately 310 trillion years, no Earth existed — only the world of Param Tatva existed."

♦ **Bapuji Insight:**

"Jab dharti bani, tab bhi wo sattva pradhaan thi — aaj jaisi jadh nahi thi."

"When Earth was first created, it was Sattva-dominant — not as dense as it is today."

Chapter XIII

Self-Luminous Beings — Before the Sun

Before the Sun was created, the beings of creation were self-luminous. They did not need an external source of light because their own spiritual power was so immense that they radiated light from within.

The soul, in its original state, is *Param Prakash* — supreme light. In the highest dimensions, this inner light was so powerful that it illuminated the entire space around each being. Darkness simply did not exist in the *Param Tatva* realm.

This is the true meaning of the spiritual teaching: "*Tum swayam prakashit ho*" — You are self-luminous. It is not a metaphor. It is a description of the soul's original state.

The need for external light arose only when the beings began to lose their inner power. The celestial bodies — stars, planets, the Sun — were all created as the inner light of the creation's inhabitants faded.

→ **Darkness is not merely the absence of physical light — it is the absence of soul power**

The spiritual journey is, fundamentally, a journey of restoring that original self-luminosity.

♦ **Bapuji Insight:**

"Pehle aatmaein swayam prakashit thi — surya ki zaroorat hi nahi thi."

"Earlier, souls were self-luminous — there was no need for the Sun."

♦ **Bapuji Insight:**

"Jab andar ka prakash kam hua, tab bahar ke prakash ki zaroorat padi."

"When the inner light diminished, the need for external light arose."

Chapter XIV

Sankalp Shakti — The Power of Intention

The entire process of cosmic creation was carried out through *Sankalp Shakti* — the power of intention. In the highest realms, a single thought was enough to bring an entire world into being.

To understand this, consider every piece of technology we use today — every mobile phone, every aeroplane, every computer — began as a thought in someone's mind. The same principle operates at the cosmic level, except that in higher dimensions, the gap between intention and manifestation was virtually zero.

Bapuji has explained this beautifully: five hundred years ago, if someone had shown a mobile phone to the people of that era, they would have considered it a miracle. Yet today, even a five-year-old child knows how to use it. The power of *Sankalp* has always been the driving force of creation — what changes is the medium.

In the ancient times described in the Ramayana, Ravana's Vimana operated through the power of intention and subtle energy. This was not fantasy; it was technology of a higher dimension, operating through *Sankalp* rather than combustion engines.

♦ Bapuji Insight:

"Sankalpna se hi srishti bani — ek sankalp se poori duniya banti thi."

"Creation happened through intention alone — a single thought could create an entire world."

♦ Bapuji Insight:

"Aaj jo technology hai, wo bhi sankalp ka hi daan hai — pehle sankalp seedha srishti banata tha."

"Today's technology is also a gift of Sankalp — earlier, intention directly manifested reality."

Chapter XV

The Descent of the *Devi-Devtas*

The *Devi-Devtas* — the original divine creation of the *Param Purush* and *Param Prakriti* — did not remain in their exalted state forever. Through the progressive process of creation, their energy was invested outward, and their inner power gradually diminished.

Bapuji has explained that this descent was not something the *Devi-Devtas* were fully conscious of. They were so engrossed in the joy of creation, in the novelty of each new experience, that they did not notice their own power diminishing. It was like a child who receives a new toy and forgets the old one — the excitement of the new obscured the loss of the original.

As they descended, their bodies changed from pure light to three elements, then four, and finally five elements — the dense physical bodies we inhabit today.

→ **Those who realised their descent stopped and remained in the higher *lokas***

→ **Those who did not realise fell all the way to Earth — or even lower**

The population of the subtle dimensions above Earth is infinitely greater than the population on Earth. This is because most souls stopped their descent at various levels before reaching the physical plane.

This understanding reframes what it means to be human. We are not lowly creatures struggling to reach divinity. We are originally divine beings who have descended, and the purpose of spiritual knowledge is to reverse that descent.

♦ **Bapuji Insight:**

"Devi-devta girte gaye, unhe pata bhi nahi chala ki unki power down ho rahi hai."

"The Devi-Devtas kept descending without even realising their power was diminishing."

♦ **Bapuji Insight:**

"Jisko ehsaas ho gaya wo upar ke lokon mein ruk gayi — jo nahi hua wo dharti tak aa gayi."

"Those who realised stopped in the higher lokas — those who didn't descended to Earth."

✦ **Bapuji Insight:**

"Dharti par ki population se anant guna zyada population sookshma jagat mein hai."

"The population in the subtle world is infinitely higher than the population on Earth."

Chapter XVI

The Creation of the Sun

The Sun was not present at the beginning of creation. It was created when the need for external light became unavoidable. As the *Devi-Devtas* descended and their inner luminosity faded, darkness began to envelop the lower realms.

Initially, the Sun's light was needed only for the Earth. The higher *lokas* did not require it because their inhabitants still retained inner light. The Sun's light reaches only up to Brahma Puri — beyond that, the realms are self-illuminated.

In the beginning, the Sun revolved around the Earth, as its purpose was specifically to provide light to the Earth. As time progressed and creation became denser, the solar system evolved into the configuration we observe today.

The Sun is not merely a ball of burning gas — it is a cosmic provision, created as a response to the declining power of the souls within the creation.

♦ Bapuji Insight:

"Surya pehle se nahi tha — jab andheera badhne laga, tab surya banaya gaya."

"The Sun did not exist from the beginning — when darkness increased, the Sun was created."

♦ Bapuji Insight:

"Surya ka prakash sirf Brahma Puri tak jata hai — usse upar ki duniya swayam prakashit hai."

"The Sun's light reaches only up to Brahma Puri — the worlds above Brahma Puri are self-luminous."

Chapter XVII

Narak Lok — The Lower Realms

Just as there are *seven lokas* above Earth, there are seven realms below: *Atal, Vital, Satal, Talatal, Rasatal, Mahakal, and Patal Loka*. These lower realms came into existence as a consequence of the same descent that brought the *Devi-Devatas* to Earth.

Those beings who continued to fall — whose power diminished even further, whose consciousness became shrouded in *Tamas* — descended below the Earth. The same divine beings who were once radiant *Devi-Devatas* became, through progressive descent, the *Rakshasa, the Danava*, and the beings of the lower realms.

Their *shaktis* became sealed. Their consciousness became entirely obscured. They moved into the lowest quality of existence.

Even the asteroids and celestial debris orbiting between Mars and Jupiter are, as Bapuji has explained, connected to this process. The 55 crore (550 million) *Narak beings* spoken of in the scriptures are real entities inhabiting these lower dimensions.

→ **No soul is inherently evil — every being in the lower realms was once a divine being**

Through knowledge and spiritual elevation, every soul has the potential to reverse its descent.

♦ Bapuji Insight:

"Jo devi-devta the, wahi gir kar rakshas bane, wahi pashu saman ban gaye."

"Those who were Devi-Devatas, upon falling, became Rakshasas and animal-like beings."

♦ Bapuji Insight:

"Koi bhi aatma janam se buri nahi hoti — ye sab girne ka parinam hai."

"No soul is inherently evil — all of this is the result of descent."

Chapter XVIII

Are There Other Earths Like Ours?

This question naturally arises: Are there other planets like Earth? The answer is an unequivocal yes.

Bapuji has taught that there are infinite *Brahmands* in this creation. Each has its own structure, hierarchy of *lokas*, its own *Brahma*, *Vishnu*, and *Shankar*, and its own Earth-like planets. The elemental composition may vary slightly, but the fundamental structure remains consistent across all *Brahmands*.

The nearest Earth-like planet to our own, and the broader topic of parallel universes and galaxies, will be explored in detail in Day 5. For now, it is sufficient to understand that our Earth is one of infinite such creations.

♦ Bapuji Insight:

"Hamari jaisi dbarti aur bhi anant brahmanto mein hain — hum akele nahi hain."

"Earths like planets exist in infinite other Brahmands — we are not alone."

♦ Bapuji Insight:

"Har brahmand ka apna Brahma, Vishnu, Shankar hai — thoda tatva ka fark hota hai."

"Each Brahmand has its own Brahma, Vishnu, and Shankar — with slight elemental differences."

Chapter XIX

Maha Kalp Pralay — The Great Dissolution

Every *Brahmand* has a fixed lifespan — 100 years of *Brahma*. When this period is complete, the *Brahmand* undergoes *Maha Kalp Pralay* — the great dissolution.

The process is initiated when *Brahma*, *Vishnu*, and *Shankar* are no longer able to sustain the creation. Tamas has grown so overwhelming that even these supreme beings cannot restore balance. At this point, *Aadi Shakti* directs *Shiva* to act.

Niraakar Shiva enters the Sun and generates *Kal Agni* — the fire of cosmic time. This *Kal Agni* engulfs the entire *Brahmand*, consuming everything. The entire creation is drawn back into *Shiva*.

Here lies a profound mystery: when *Shiva* absorbs the entire *Brahmand*, including all its negativity, that absorbed negativity transforms even *Shiva* into a *Jeev* (a bound entity). The question then arises: from where does the power come to create a new *Brahmand*?

→ **This answer connects to the knowledge beyond this *Brahmand* — revealed in Day 5**

The scriptures declare: "*Pratipala anta anant brahmand bante hain aur bigadte hain.*" Every moment, infinite *Brahmands* are being created and dissolved. This *Brahmand* is one of infinite, in cosmic cycles playing out simultaneously.

♦ **Bapuji Insight:**

"Jab Brahma ke 100 varsh poore ho jaate hain, tab Maha Kalp Pralay hota hai."

"When Brahma's 100 years are complete, Maha Kalp Pralay occurs."

♦ **Bapuji Insight:**

"Shiva surya mein pravesh karke kal agni paida karta hai — poora brahmand jal jaata hai."

"Shiva enters the Sun and generates Kal Agni — the entire Brahmand is consumed."

♦ **Bapuji Insight:**

"Pratipalaanta anant brahmand bante aur bigadte hain — ye ek anant prakriya hai."

"Infinite Brahmands are created and dissolved every moment — it is an infinite process."

Chapter XX

Atma Gyan — Soul Awakening and Self-Realization

The entire journey of creation — from *Paramdhaam* to Earth — is ultimately the journey of the soul. And the purpose of *Behad Gyan* is to awaken the soul to its original truth.

We are not mere physical beings. We are the descendants of the *Param Purush* and *Param Prakriti*. Our creation took place in the highest realms of the *Behad*. The soul within each of us carries the memory, the energy, and the potential of that original divine state.

Different souls arrived on Earth at different times — some 15 lakh (1.5 million) years ago, some 5,000 years ago. Each soul's journey is unique, but the destination is the same: *Atma Jagriti* — soul awakening.

→ *Atma Gyan* (soul knowledge) → *Atma Bodh* (soul realization) → *Atma Jagriti* (soul awakening) → *Atma Saakshaatkaar* (soul revelation)

The practice of Yog as taught in *Behad Gyan* is about directing the mind's thoughts toward *Brahm Chintan* (contemplation of the Supreme). Since stopping all thoughts is nearly impossible, the method is to redirect them toward the highest truth.

By understanding where we came from, we understand where we must return. By seeing the vastness of the creation, we see the vastness of our own potential. The path back to divinity is not an impossible dream — it is our birthright.

♦ Bapuji Insight:

"Tumhari creation behad ke behad ki duniya mein hui hai — tum wahi divya aatma ho."

"Your creation took place in the world of the infinite of the infinite — you are that divine soul."

♦ Bapuji Insight:

"Atma gyan se atma bodh, atma bodh se atma jagriti, atma jagriti se atma saakshaatkaar."

"From soul knowledge comes soul realization, from realization comes awakening, from awakening comes divine revelation."

✦ **Bapuji Insight:**

"Sankalp rokna sambhav nahi — sankalp ko disba do, Brahm chintan mein lagao."

"Stopping thoughts is not possible — redirect them, engage them in divine contemplation."

WHAT WE HAVE UNDERSTOOD ON DAY 4

Day 4 reveals the entire blueprint of cosmic creation within this *Brahmand*. We learned that creation did not begin with the physical world but with *Niraakar Shiva*, whose single Sankalp set in motion a cascading process from Param Tatva into the dense physical world we inhabit today.

We understood the critical difference between *Shiva* and *Shankar* — that *Shiva* is the formless supreme consciousness while *Shankar* is the formed avatar. We traced the hierarchy from *Niraakar Shiva* to *Akaari Shiva* and *Akari Shakti*, to *Visbnu*, to *Prajapita Brahma*, and to the *Sapt Rishi* who built the seven *lokas*.

We discovered that Earth did not always exist. For approximately 10 trillion years, creation was entirely in the realm of Param Tatva, and Earth was formed only when the descending *Devi-Devatas* needed a physical base. The Sun, too, was created as a response to the fading inner light.

We explored the *Narak Lok* and understood that beings there are the same divine beings who descended too far. We learned that other Earths exist in infinite other *Brahmands*.

Finally, we understood *Maha Kalp Pralay* and how the *Brahmand's* cycle of creation and destruction continues infinitely. The purpose of all this knowledge is to awaken the soul to its original divine identity and guide it back to its true home.
