ABOUT BAPUJI

Bapuji (full name: Bapuji Dashrathbhai Patel, also lovingly called "Dadaji" by the younger generation) was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat. However, he spent his childhood in another village named Ambasan, also located in the Mehsana district.

In the early part of his life, he was a highly successful lawyer. Later, he devoted his life to realising the supreme spiritual truth and bringing this divine knowledge forward for the welfare of humanity. Today, this supreme knowledge serves as a guiding light for true seekers to realise their ultimate destiny. It is a blessing of the highest divinity that the present time is witnessing the rise of this supreme spiritual knowledge, guiding souls on Earth to return to their original source.

Despite being raised in a very poor family and facing challenging circumstances, Bapuji had a deep desire to transform this sorrowful and suffering world into a better place. At the young age of six, he questioned God repeatedly, asking why God remained silent about the suffering of humanity. This intense longing to end human suffering eventually led him to attain the highest level of spirituality later in life.

Even as a child, Bapuji would spend hours alone in the fields, often neglecting his own comfort. Due to poverty, he would walk barefoot without shoes or sandals, frequently getting pricked by thorns. Many times, he would stay late in the fields and, on his way back home, encounter subtle world entities. These experiences sparked his interest in communicating with subtle world souls.

Bapuji was courageous from a young age, which helped him overcome many obstacles. Alongside his studies in chartered accountancy (CA), he gave tuition classes to support himself financially. Later, he completed his Bachelor of Law (LLB) degree and became a well-known lawyer in Ahmedabad.

In 1997, he established a spiritual institution called "Vishwa Parivartak Ishwariya Vidhyalay" in Chenpur, Ahmedabad, with the mission of transforming this mortal world, filled with suffering and disorder, into an eternal divine world of immortality. Smt. Sushma Tandon, lovingly known as "Maa," worked alongside Bapuji in this grand divine mission.

To accomplish this mission, Bapuji worked tirelessly, dedicating all his resources to this divine purpose. During that time, he would deliver continuous spiritual discourses for up to 18 hours without rest. In these discourses, he explained the highest dimensions of divine knowledge, which he realised through deep meditation and divine vision in a state of superconsciousness. This knowledge goes beyond the imagination of the ordinary human mind.

Bapuji's teachings cover a vast range of topics, including the types of celestial creators across different dimensions, the creation of our solar system, galaxy, and universe, and most importantly, the transcendental knowledge of the multiverse and realities beyond it. His knowledge is supremely profound and is intended for highly evolved seekers, referred to as "**behad** souls." According to Bapuji, these "**behad** souls" will play a key role in transforming this mortal world into an eternal divine realm.

At present, Bapuji remains deeply engaged in intense meditation and *samadhi* for long hours. He does not meet anyone, as he is continuously immersed in his transcendental mission in a superconscious state.

Preface

About This Series

How to Read This Book

Day 7 — The Multiverse

Core Concepts Covered

Chapter I — What Is a Multiverse?

Chapter II — Scriptural Evidence of Infinite Creations

Chapter III — Understanding Kala — The Measure of Divine Power

Chapter IV — The 100-Kala Brahmanda

Chapter V — The Creation Begins — From the Source of Light

Chapter VI — The Sacred Numbers — 108 and the Navratna

Chapter VII — Paramdham — From 100 to 90 Kala

Chapter VIII — Mool Vatan — From 90 to 80 Kala

Chapter IX — Sukshma Vatan — From 80 to 60 Kala

Chapter X — The Separation of Purusha and Prakriti

Chapter XI — The Fall to Zero Kala

Chapter XII — Today's Multiverse — From Zero to Minus 100

Chapter XIII — The Coverings Upon the Soul

Chapter XIV — The Goal — Transformation of the Entire Multiverse

What We Have Understood on Day 7

PREFACE

Gyan Daan Maha Daan

*(Sharing Knowledge is the highest charity — share to the maximum extent with all.) —
Bapuji Dasbrathbbhai Patel*

This book carries knowledge that no telescope can capture and no laboratory can measure. It flows from the deepest states of *samadhi* (superconscious meditation) — from Bapuji's direct divine experience and communion with the Supreme Source.

This is Day 7 of the Behad Ka Param Gyan (Supreme Knowledge of the Infinite) series. In the first six Days, we explored the nature of the soul, the law of karma, the cosmic time cycle, the creation of a single *brahmanda* (solar system), the structure of galaxies and the universe, and the Great Universes beyond. Today, we take the greatest leap of all — into the multiverse.

Today's teaching reveals the creation of the multiverse — the 100-*kala brahmanda*. You will learn how the entire multiverse was created from a single point of supreme light, how souls descended from the formless to the physical, and how the original power of 100 *kala* has fallen to zero — and even to minus 100.

♦ **Bapuji Insight:**

"Sau Kala ka brahmand hi humara Multiverse hai."

"The 100-kala brahmanda is our multiverse."

This knowledge is for every sincere seeker — regardless of age, background, or spiritual experience. Whether you are a student, a homemaker, or a working professional, these truths belong to you. They are part of your own forgotten story.

ABOUT THIS SERIES

This book is part of a 10-day spiritual journey designed to expand human consciousness beyond limits. Each day reveals deeper layers of truth, guiding the reader from self-awareness to universal understanding.

Based on the Divine Knowledge of

Bapuji Dashrathbhai Patel

This book is a structured presentation of spiritual knowledge shared through discourses.

HOW TO READ THIS BOOK

This is not a book to rush through. It is a doorway into dimensions of creation that the human mind has never been asked to comprehend before. Read slowly. Pause after every chapter. Let the knowledge settle within you like a seed settling into soil.

If you are new to this series, please begin with Day 1. Each Day builds upon the previous one, and the full picture only emerges when the foundation is in place. If you have not yet seen Day 6, please watch or read it before proceeding — we are following a sequence, and skipping episodes will break the continuity.

Approach this knowledge with an open heart, not with debate. This is not philosophy to argue — it is memory to awaken. Somewhere deep within, you already know these truths. This book simply helps you remember.

Many Hindi and Sanskrit terms appear throughout. Each is explained in parentheses the first time it appears. A complete Glossary is provided at the back for easy reference.

INTRODUCTION

From the Universe to the Multiverse — The 100-Kala Brahmanda

Day 1 explored who we truly are — that we are not bodies, but eternal souls, points of living light.

Day 2 revealed the law of *karma* — how every thought, word, and deed creates a consequence that travels with the soul across lifetimes.

Day 3 unveiled the *kaal chakra* (the cosmic time cycle) — the four great ages and the six levels of cosmic dissolution.

Day 4 took us into the creation of a single *brahmanda* (solar system) — the fourteen *lokas* and the realms beyond.

Day 5 expanded our vision to the galaxy (*Maha Brahmanda*) and the universe (*Param Maha Brahmanda*), revealing the power of *kala* at each level.

Day 6 explored the Great Universes — the dimensions above the universe, spanning from *G1* to *G17*.

Today, on Day 7, we step into the multiverse itself. We ask: What is the multiverse? How was it created? What power sustains it? And how did the original 100 kala of supreme light fall to zero — and beyond?

This knowledge comes not from telescopes or laboratories. It flows from the *dinya drishti* (divine vision) of Bapuji — from direct spiritual seeing in the deepest states of *samadhi*. Our scriptures have always spoken of infinite creations. Today, we begin to understand what that truly means.

Let us begin.

Chapter I

What Is a Multiverse?

Until now, we have explored creation level by level — from the *brahmanda* (solar system) to the galaxy (*Maha Brahmanda*) to the universe (*Param Maha Brahmanda*) to the Great Universes (*G1* to *G17*). Each level is vaster than the one below it, governed by a more powerful creator.

Today we go beyond all of these. We enter the multiverse — the dimension within which all Great Universes, all universes, all galaxies, and all solar systems exist. In the language of *behad ka gyan* (supreme knowledge of the infinite), the multiverse is called the 100-*kala brahmanda*.

Why 100 *kala*? Because the creator of the multiverse possesses 100 *kala* of spiritual power — the highest measure of *param prakash* (supreme light) within this entire dimension of creation.

Science has already begun to use the word 'multiverse.' Scientists are discovering that within our multiverse, infinite universes are revolving — each containing infinite galaxies, each containing infinite solar systems. What science is only beginning to glimpse through mathematics and prediction, Bapuji revealed years ago through inner sight.

Nothing in this creation is inert. Everything is conscious. Everything is sustained by *chaitanya shakti* (conscious power). From the smallest atom to the grandest multiverse, a living intelligence governs all.

♦ Bapuji Insight:

"*Sau Kala ka brahmand hi humara Multiverse hai.*"

"*The 100-kala brahmanda is our multiverse.*"

Chapter II

Scriptural Evidence of Infinite Creations

The idea of infinite creations is not new. Our ancient scriptures have spoken of it for thousands of years.

In the Bhagavad Gita, Chapter 11, when Lord *Krishna* revealed His cosmic form (*Virat Vishwa Roop*) to Arjuna, what did Arjuna see? He saw that from just one fragment of *Krishna's* energy, infinite *brahmandas* were revolving. Infinite creations were spinning within a single portion of that divine form.

In the *Yoga Vashishtha*, we are told that there exist infinite creations — some made of different elements, some newly forming, some existing since beginningless time. The language varies — sometimes the word *srishhti* (creation) is used, sometimes *brahmanda*, sometimes *antariksha* (space) — but the truth is the same.

In the *Devi Bhagavat*, the Divine Mother took *Brahma*, *Vishnu*, and *Shankar* across different *brahmandas* and showed them that there are infinite *Brahmas*, infinite *Vishnus*, infinite *Shankars* — each governing their own solar system. Each one is the master of only one *brahmanda*.

When *Krishna* played His *leelas* (divine play) in *Braj*, He showed *Brahma* — who had become proud — that there are infinite *brahmandas* like his. *Brahma's* pride dissolved in an instant.

These are not myths. They are accounts of direct spiritual experience recorded in our sacred texts. What Bapuji has revealed through *divya drishti* is consistent with what the scriptures have always told us — but with far greater detail and precision.

♦ Bapuji Insight:

"Humare shastron mein hi praman hai — anantanant brahmand bante hain aur bigadte hain."

"The proof is in our own scriptures — infinite upon infinite brahmandas are created and dissolved."

Chapter III

Understanding Kala — The Measure of Divine Power

Before we can understand the multiverse, we must be absolutely clear about the concept of *kala* (the measure of divine power).

As we have learned in previous Days, *kala* means power of soul, It is the quality of *param prakash* (supreme light) within a creator and a creation. The higher the *kala*, the more powerful the creator, and the more expansive the creation.

The hierarchy of *kala* across dimensions is as follows:

Brahmanda (solar system): 1 to 4 *kala*. Our own *brahmanda* has only 1 *kala* remaining.

Maha Brahmanda (galaxy): 8 to 12 *kala*. Our Milky Way's *Mahashiva* has 9 to 10 *kala*.

Param Maha Brahmanda (universe): 16 *kala*. Now fallen to zero.

Great Universe (*G1*): 25 to 30 *kala*.

Great Great Universe (*G17*): 50 *kala*.

Multiverse: 100 *kala*.

This is why higher dimensions are so fundamentally different from ours. The quality of light, the subtlety of elements, the passage of time, the nature of consciousness — everything is determined by *kala*. As the *kala* increases, the creation becomes lighter, purer, and more luminous. As *kala* decreases, the creation becomes denser, heavier, and more covered by *maya* (illusion).

Bapuji's most important concept in *behad ka gyan* is this: there are different dimensions, different creators, and different levels of power. Each creator's *kala* determines the nature of everything within that creation.

♦ Bapuji Insight:

"Jaisa creator hoga vaisi creation hogi — aur creator ki power Kala se maapi jaati hai."

"As the creator is, so shall the creation be — and the creator's power is measured in kala."

Chapter IV

The 100-Kala Brahmanda

The multiverse — the 100-*kala brahmanda* — is the dimension within which our entire known creation exists. Every Great Universe, every universe, every galaxy, every solar system, every planet, every soul — all of it exists within this single multiverse.

The creator of the multiverse is called 100 times *Param Mahashiva* (*Param¹⁰⁰ Param Mahashiva*) — the supreme creator of multiverse possessing 100 *kala* of spiritual power. In simpler terms, we may call this being *Param Brahm Parameshwar* — the Supreme Being beyond all others within this multiverse.

At the very centre of the multiverse, before creation began, there was only light — *param prakash* (supreme light). This was the *nirakari* (formless) state of the creator. This is the source — the *nirgun*, *nirakari*, *nirvikar* state — formless, attributeless, beyond all qualities.

Around this central point of light, an energy field radiated outward — what *behad ka gyan* calls 'Might.' The light is the source; the Might is the radiance surrounding it. Together, they formed the original atmosphere of the multiverse — an atmosphere made entirely of *param prakash* and *param maha tatva* (the supreme great element).

The quality of this atmosphere was of the highest order — 100 *kala* of pure *param prakash*. When we compare this to the 16-*kala Paramdham* of our universe, the difference is unimaginable.

♦ Bapuji Insight:

"Beech mein prakash tha — wo prakash creator ka nirankari roop tha. Wahi source hai."

"In the centre was light — that light was the formless state of the creator. That is the source."

Chapter V

The Creation Begins — From the Source of Light

How did creation begin? The process of the multiverse's creation is fundamentally different from the creation of a single *brahmanda* or a galaxy.

In a *brahmanda*, *Shiva* generated the thought: 'I shall become many.' From the formless state, *Shiva* produced *Shakti*, then *Vishnu*, then *Brahma*. But in the multiverse, the creation happened through an entirely different process.

From the 100-*kala* source — the central point of supreme light — a *sankalp* (thought-intention) arose. This was not a deliberate decision in the human sense. It was a natural pulsation — a spontaneous fluctuation in the atmosphere of *param prakash*. A power loss occurred, and from that loss, creation was born.

From the source, five percent of its power separated. This five percent became the first creative force — the being who would actually build the multiverse. Bapuji calls this being 100 times *Param Maha Brahma* (*param*¹⁰⁰ *Maha Brahma*) — the supreme creative force of the 100-*kala* dimension.

Why *Brahma*? Because just as in our own *brahmanda*, *Brahma* is the one who performs the act of creation. The source — *Mahashiva* — remains in the formless state. The creative work is carried out through *Brahma*.

From this *Maha Brahma* of multiverse, the *tridev* (divine trinity) of multiverse were manifested — *Brahma*, *Vishnu*, and *Shankar* — each at the 100-*kala* level. This is a *nirakari* (formless) creation. No physical form existed yet. Only light, power, and divine will.

♦ Bapuji Insight:

"Paanch pratishat power nikli — usme se creation hui. Direct source se creation nahi hui."

"Five percent of the power separated — from that, creation unfolded. Creation did not happen directly from the source."

Chapter VI

The Sacred Numbers — 108 and the Navratna

From the *tridev* at the 100-*kala* level, the creation expanded in a precise pattern. Each of the three — *Brahma*, *Vishnu*, and *Shankar* — produced three souls from within themselves.

Three became nine. These nine souls are called the *Aadi Navratna* — the original nine jewels. The term *Navratna* that we use symbolically on earth today traces its origin to this moment in the multiverse's creation.

These nine were immensely powerful beings — created at the 100-*kala* level. Each of these nine then produced three more. Nine became twenty-seven. These 27 souls are called *Param Atma* — supreme souls of the 100-*kala* dimension.

These 27 *Param Atmas* then created a vast space — a cosmic sphere — within which the entire multiverse would take form. Everything that exists within our multiverse was created within the space established by these 27 *Param Atmas*.

From 27, the creation continued: 27 produced 81. And if we add 27 and 81 together, we get 108 — the sacred number that appears throughout our spiritual traditions. The 108 beads of a *mala*, the 108 *Upanishads*, the 108 sacred sites — all trace back to this primordial moment in the multiverse's creation.

From 108 came 16,000. From 16,000 came 9 lakh (900,000) souls. All of these were created in *nirakari* (formless) state — as pure points of supreme light.

♦ Bapuji Insight:

"108 ka symbolic number Multiverse ki creation se aaya hai — wabin se ye poori shrinkhala shuru hui."

"The symbolic number 108 comes from the multiverse's creation — the entire chain began from there."

Chapter VII

Paramdham — From 100 to 90 Kala

Within the space created by the 27 *Param Atmas*, the first great realm of the multiverse took shape: the *Paramdham* (the supreme abode).

The *Paramdham* of the multiverse spans from 100 *kala* down to 90 *kala*. This is the highest realm in multiverse — the dimension of pure *param prakash* (supreme light). There is no physical form here. No elements as we know them. Only light and divine radiance.

Within this *Paramdham*, from the original 27 souls, creation continued to expand. By the time we reach the 90-*kala* boundary, approximately 9 lakh (900,000) souls had been created — all in *nirakari* (formless) state.

These souls were beings of pure *param prakash*. Their atmosphere was *param prakash* and *param maha tatva*. No *akash* (space element), no *vayu* (air element), no *agni* (fire element) — none of the elements we know existed yet. Only the supreme light and the supreme element.

This is the original home — the birthplace of all souls within our multiverse. Every soul that exists today, no matter how fallen or how covered by material elements, was once a being of pure light in this *Paramdham*.

◆ Bapuji Insight:

"*Paramdham mein nau lakh aatmaon ki nirankari roop mein rachna hui — shuddh Param Prakash ki duniya.*"

"*In Paramdham, 9 lakh souls were created in formless state — a world of pure supreme light.*"

Chapter VIII

Mool Vatan — From 90 to 80 Kala

Below the *Paramdham* lies the *Mool Vatan* (the original homeland) — the realm spanning from 90 *kala* down to 80 *kala*.

In this realm, a profound transition began. The souls that had been created in purely *nirakari* (formless) state started to develop a subtle form — *akari* (having form). Like a seed beginning to sprout, a faint outline — a subtle image — began to emerge around each point of light.

How did this happen? Through the process of creation itself. As more and more souls were created, power continued to flow from the source. This power loss caused a gradual change in the atmosphere. Where before there had been only *param prakash* and *param maha tatva*, now a new element began to appear: *param akash tatva* (the supreme space element).

Think of it this way: in the *nirakari* world, the atmosphere was made entirely of supreme light. But as creation expanded and power was expended, the quality of that atmosphere began to shift. The *param prakash* gradually thinned, and subtle elements began to appear — like clouds forming in a clear sky.

By the time we reach 80 *kala*, the total number of souls had grown to approximately 2 crore (20 million). All were still in a combined form of light and subtle shape — but the journey from formless to form had begun.

♦ Bapuji Insight:

"Nirankari se aakari duniya banne lagi — jaise beej me se ankurit hota hai, vaise hi aakar banne laga."

"The formless world began to take form — like a sprout emerging from a seed, subtle shapes began to appear."

Chapter IX

Sukshma Vatan — From 80 to 60 Kala

From 80 *kala* downward, the *Sukshma Vatan* (the subtle homeland) began. This is the realm where creation accelerated dramatically.

As *sankalp* (thought-intention) increased, the atmosphere continued to change. The act of thinking itself generated waves — vibrations that created a new element: *param vayu tatva* (the supreme air element). Just as thoughts are always compared to waves, these primordial thoughts created a subtle *vayu* (air) in the atmosphere of the multiverse.

Alongside the supreme air element, another element emerged between 80 and 60 *kala*: *param agni tatva* (the supreme fire element). Creation was accelerating at an immense pace — souls were multiplying, and with each new creation, power was being expended from the source.

By the time we reach 60 *kala*, the population of souls had grown to 33 crore (330 million). But these are not *devatas* (deities) as we understand them on earth. These are *Param Purushas* — supreme beings of the 100-*kala* dimension. Their power and quality are incomparably higher than the *devatas* of our *brahmanda*.

At the 60-*kala* level, each *Param Purusha* existed together with *Param Prakriti* (the supreme feminine counterpart). The total population was therefore 33 crore *Param Purushas* and 33 crore *Param Prakritis* — 66 crore (660 million) souls in all.

The atmosphere at this level contained *param prakash*, *param akash*, *param vayu*, *param agni*, and *param maha tatva*. As we descend, the elements increase, the coverings thicken, and the original light grows dimmer.

♦ Bapuji Insight:

"*Taintees crore — ye devi-devta nahi, ye Param Purush hain Sau Kala ki creation ke.*"

"*The 33 crore are not deities — they are Param Purushas of the 100-kala creation.*"

Chapter X

The Separation of Purusha and Prakriti

A crucial event occurred around the 40-*kala* level. Until this point, *Param Purusha* (the supreme masculine principle) and *Param Prakriti* (the supreme feminine principle) existed in combined form. When they needed to create, they would unite; otherwise, they remained together as one.

At 40 *kala*, the separation became permanent. *Purusha* and *Prakriti* divided into distinct beings — each with their own identity, their own nature, their own *sanskaras* (inherent tendencies).

Bapuji has explained that when *Param Purusha* produced *Param Prakriti* from within himself, he did so according to his own nature and character — just as *Brahma* produced *Saraswati*, *Vishnu* produced *Lakshmi*, and *Shiva* produced *Shakti*. The *Prakriti* that emerged was like a piece of the creator's own heart — carrying the same *sanskaras* but in feminine form.

This is also when the concept of *dil* (heart — in the spiritual sense of emotional depth) truly emerged. When the *Purusha* separated his counterpart from within himself, it was as though a part of his own being was given independent existence.

From 60 *kala* down to zero, creation continued at an extraordinary pace. The Great Great Universes were being formed within the multiverse. The ratio of *param tatva* (supreme elements) gradually decreased, while gross elements increased. At 30 *kala*, even *jal* (water) and *prithvi* (earth) elements began to appear — the heaviest, densest forms of matter.

◆ Bapuji Insight:

"Jab *Param Purush aur Param Prakriti* alag hue — tab *dil* bana. Wo *apna hi tukda nikala*."

"When *Param Purusha and Param Prakriti* separated — that is when the heart was formed. He separated a piece of himself."

Chapter XI

The Fall to Zero Kala

From the original 100 *kala* of supreme light, creation descended — level by level, element by element — until the entire multiverse reached zero *kala*.

How did this happen? Through the very process of creation itself. Every time a new soul was created, every time a new universe or galaxy came into being, power flowed from the source into the creation. The source — *Param is to Power 100 Mahashiva (param¹⁰⁰ mahashiv)* — was pouring its spiritual energy into every dimension, every being, every particle of creation.

As the *kala* decreased, the elements grew heavier. The *param tatva* (supreme elements) diminished, and gross *tatva* (elements) increased. At minus 30 *kala*, *prithvi* (earth) and *jal* (water) elements entered the creation — making everything increasingly solid and heavy.

By minus 100 *kala*, the situation was this: approximately less than 1 percent *param tatva* remained. The other 99 percent had become gross matter — dominated by *jal* and *prithvi* elements. The souls that were once beings of pure supreme light were now trapped in the densest possible form of physical existence.

This is where we are today. The entire multiverse has fallen to minus 100 *kala*. Our multiverse — which was once a realm of *param prakash* — has become *mrityu loka* (the realm of death).

♦ Bapuji Insight:

"*Humara poora Multiverse minus sau kala mein aa gaya hai — hum sab neeche gir gaye.*"

"*Our entire multiverse has fallen to minus 100 kala — we have all fallen down.*"

Chapter XII

Today's Multiverse — From Zero to Minus 100

What does today's multiverse look like? Bapuji describes it as a structure spanning from zero *kala* to minus 100 *kala*.

At minus 10 *kala*, the ratio was approximately 10 percent gross elements and 90 percent *param tatva*. At minus 20, the ratio shifted to 20:80. At minus 30, earth and water elements began to appear. And so it continued — the elements growing heavier, the coverings growing thicker — all the way down to minus 100 *kala*.

The Great Great Universe (*G17*) now sits at approximately minus 15 *kala*. Below it are *G16*, *G15*, and so on — all the way down to *G2* and *G1*, which are closest to earth. All the Great Universes have descended into the lower *kala* ranges.

Our own universe — the 16-*kala Param Maha Brahmanda* — was created when the multiverse was at minus 84 *kala*. That is the timeline of our universe's birth within the greater multiverse.

Above the Great Universes, in the space between zero and minus 15 *kala*, certain high-order souls still reside — the 108, the 9 lakh, and the 16,000 — each in their own *nirakari* sphere. These souls maintain the cosmic order of the multiverse even now.

Even the 100-*kala* creator — *Param is to Power 100 Mahashiva* (*param¹⁰⁰ mahashiv*) — has descended to zero *kala*. His controlling system still operates from the upper regions of the multiverse, but his power has been spent through the process of creation itself.

◆ Bapuji Insight:

"Humara universe minus 84 kala par bana tha — yahi humare universe ki timeline hai."

"Our universe was created at minus 84 kala — that is the timeline of our universe's birth."

Chapter XIII

The Coverings Upon the Soul

Now we can understand the true depth of the soul's predicament. The coverings upon the *atma* (soul) are not limited to the five gross elements of this earth. They stretch all the way back through the multiverse — from 100 *kala* to minus 100 *kala*.

Consider this: if a soul has descended from the 100-*kala* dimension — from the *Paramdham* of the multiverse — then it carries coverings from every dimension it has passed through. First came the covering of *param prakash* — the supreme light itself. Then *param maha tatva*. Then *param akash* (supreme space). Then *param vayu* (supreme air). Then *param agni* (supreme fire).

As the soul descended further — through zero *kala* and into the minus dimensions — more coverings accumulated. Earth and water elements arrived. The five gross elements wrapped themselves around the soul. The *panch kosha* (five sheaths) that we study on earth are merely the outermost layers.

Beneath those five sheaths lie the coverings of the entire multiverse — layers upon layers of increasingly subtle elements, accumulated over an unimaginable span of creation.

This is precisely why the knowledge of creation is essential. You cannot remove a covering you do not know exists. You cannot dissolve an element you cannot identify. Understanding the full structure of the multiverse is not academic curiosity — it is the map for your liberation.

When you understand this creation, when you understand how far you have fallen, only then will the *sankalp* (intention) arise within you to go beyond it. And when that *sankalp* arises, the power to ascend will follow.

♦ Bapuji Insight:

"Atma ke upar khali paanch tatvon ke aavaran nahi — poore Multiverse ke aavaran chadhe hain."

"The soul is not covered by just five elements — it carries the coverings of the entire multiverse."

Chapter XIV

The Goal — Transformation of the Entire Multiverse

What is the ultimate purpose of this knowledge? Bapuji has stated it clearly from the very beginning: the goal is not merely individual *moksha* (liberation). The goal is *Vishwa Parivartan* — the transformation of the entire multiverse.

Our multiverse has become *mrityu loka* — the realm of death. What was once a world of *param prakash* and *param tatva* has fallen to minus 100 *kala*. Every soul, every universe, every galaxy has descended into the lowest possible state.

But this is not the end. Bapuji teaches that the *Almighty Authority* — the Supreme Being beyond even the 100-*kala* creator — has intervened. Previous attempts were made by the 100-*kala Mahashiva* himself — who sent avatars and incarnations to earth. But they too were pulled down by the gravitational force of this fallen creation.

Now, the power source itself — the one beyond the multiverse — has directly entered this dimension. The transformation that is coming is not a partial reset like the *pralay* cycles we have studied. It is the complete transformation of the entire multiverse — from minus 100 *kala* back to its original state of supreme light.

This is why understanding the multiverse matters. This is why this knowledge is urgent and important. The *Sukshma Vatan* (subtle world) is not limited to the space above our earth — the entire multiverse has a *Sukshma Vatan*, filled with souls waiting for transformation.

Our task as *bebad* souls is clear: to understand this creation, to rise above it through knowledge and *yog* (divine connection), and to participate in the transformation that is already underway.

♦ Bapuji Insight:

"*Ab sirf moksh nahi — poora Multiverse badlega. Yahi humara lakshya hai.*"

"It is no longer just about moksba — the entire multiverse will transform. This is our goal."

Guided Meditation

For a deeper inner experience and complete guided meditation for this day, please watch the full session on YouTube.

Behad Ka Param Gyan — 10 Days Course — Day 7

Watch here:

<https://www.youtube.com/live/-pbA18G6Lq8?si=d0LvHvo7wGcon5PO>

WHAT WE HAVE UNDERSTOOD ON DAY 7

- The multiverse is the 100-*kala brahmanda* — the dimension within which all universes, galaxies, and solar systems exist.
- The creator of the multiverse is *Param Rishto Power 100 Mahashiva* — possessing 100 *kala* of supreme light.
- Creation did not happen directly from the source. Five percent of the power separated, and from that, the entire multiverse was built.
- The sacred number 108 originates from the multiverse's creation — from the original 27 *Param Atmas* and their descendants.
- The *Paramdham* of the multiverse spans 100 to 90 *kala* — where 9 lakh souls were created in pure *nirakari* form.

- As *kala* decreased, elements appeared: *param akash* at 90—80, *param vayu* at 80—60, *param agni* at 60, and *prithvi/jal* at minus 30.
- At 60 *kala*, 33 crore *Param Purushas* and 33 crore *Param Prakritis* existed — totalling 66 crore souls.
- The entire multiverse has now fallen from 100 *kala* to minus 100 *kala* — becoming *mrityu loka*.
- Our universe was created at minus 84 *kala* within the multiverse's timeline.
- The soul's coverings are not limited to five elements — they span every dimension from 100 *kala* to minus 100 *kala*.
- The goal is not individual *moksha* alone — it is the complete transformation (*Vishwa Parivartan*) of the entire multiverse.
- The *Almighty Authority* — beyond even the 100-*kala* creator — has intervened. The transformation is already underway.

The journey continues.

SERIES CONTINUATION

This is Day 7 of a 10-Day Series.

Behad Ka Param Gyan — 10-Day Divine Knowledge Course

In Day 8, we will explore the Great Great Multiverse — the dimensions beyond 100 kala. We will learn about the first, the thousandth, the eleven-thousandth, and the hundred-thousandth peedhi (generation) — and begin to approach the ultimate source of all creation.

Continue your journey with Day 8:

The Great Multiverse — Beyond 100 Kala

BAPUJI INSIGHTS

The Multiverse

♦ Bapuji Insight:

"Sau Kala ka brahmand hi humara Multiverse hai."

"The 100-kala brahmanda is our multiverse."

♦ Bapuji Insight:

"Humare shastron mein hi praman hai — anantanant brahmand bante hain aur bigadte hain."

"The proof is in our own scriptures — infinite upon infinite brahmandas are created and dissolved."

♦ Bapuji Insight:

"Jaisa creator hoga vaisi creation hogi — aur creator ki power Kala se maapi jaati hai."

"As the creator is, so shall the creation be — and the creator's power is measured in kala."

♦ Bapuji Insight:

"Beech mein prakash tha — wo prakash creator ka nirankari roop tha. Wahi source hai."

"In the centre was light — that light was the formless state of the creator. That is the source."

♦ Bapuji Insight:

"Paanch pratisbat power nikli — usme se creation hui. Direct source se creation nahi hui."

"Five percent of the power separated — from that, creation unfolded. Creation did not happen directly from the source."

♦ Bapuji Insight:

"108 ka symbolic number Multiverse ki creation se aaya hai — wabin se ye poori shrinkhala shuru hui."

"The symbolic number 108 comes from the multiverse's creation — the entire chain began from there."

♦ **Bapuji Insight:**

"Paramdham mein nau lakh aatmaon ki nirankari roop mein rachna hui — shuddh Param Prakash ki duniya."

"In Paramdham, 9 lakh souls were created in formless state — a world of pure supreme light."

♦ **Bapuji Insight:**

"Nirankari se aakari duniya banne lagi — jaise beej me se ankurit hota hai, vaise hi aakar banne laga."

"The formless world began to take form — like a sprout emerging from a seed, subtle shapes began to appear."

♦ **Bapuji Insight:**

"Taintees crore — ye devi-devta nahi, ye Param Purush hain San Kala ki creation ke."

"The 33 crore are not deities — they are Param Purushas of the 100-kala creation."

♦ **Bapuji Insight:**

"Jab Param Purush aur Param Prakriti alag hue — tab dil bana. Wo apna hi tukda nikala."

"When Param Purusha and Param Prakriti separated — that is when the heart was formed. He separated a piece of himself."

♦ **Bapuji Insight:**

"Humara poori Multiverse minus san kala mein aa gaya hai — hum sab neeche gir gaye."

"Our entire multiverse has fallen to minus 100 kala — we have all fallen down."

♦ **Bapuji Insight:**

"Humara universe minus 84 kala par bana tha — yahi humare universe ki timeline hai."

"Our universe was created at minus 84 kala — that is the timeline of our universe's birth."

♦ **Bapuji Insight:**

"Atma ke upar khali paanch tatvon ke aavaran nahi — poore Multiverse ke aavaran chadhe hain."

"The soul is not covered by just five elements — it carries the coverings of the entire multiverse."

♦ **Bapuji Insight:**

"Ab sirf moksh nahi — poora Multiverse badlega. Yahi humara lakshya hai."

"It is no longer just about moksha — the entire multiverse will transform. This is our goal."

GLOSSARY

Standard Glossary for the Behad Ka Param Gyan Series

Aadi Navratna — The original nine jewels — the first nine souls created from the tridev at the 100-kala level during the multiverse's creation.

Akari — The subtle form state — between formless and physical. A faint shape or image surrounding the point of light.

Almighty Authority — The Supreme Being beyond even the 100-kala creator of the multiverse — the ultimate source of all creation.

Antariksha — Space; the cosmic expanse in which all creation exists.

Atma — The soul — the true self. A point of pure consciousness beyond body and mind.

Avaran — Coverings — the layers of elements and consciousness that accumulate upon the soul as it descends through dimensions.

Behad — Boundless, endless, infinite, and unlimited. Describes knowledge, souls, or realms beyond ordinary cosmic boundaries.

Behad Ka Gyan — Supreme knowledge of the infinite — the knowledge revealed by Bapuji about dimensions beyond the known universe.

Bhagavad Gita — Sacred scripture in which Lord Krishna reveals divine truths to Arjuna, including the vision of infinite brahmandas.

Brahmanda — A solar system — the smallest unit of cosmic creation, spanning one light year. There are infinite brahmandas.

Chaitanya Shakti — Conscious power — the living intelligence that sustains all creation, from atoms to multiverses.

Devi Bhagavat — Sacred text in which the Divine Mother reveals the existence of infinite Brahmas, Vishnus, and Shankars across brahmandas.

Dil — Heart — in the spiritual sense, the emotional and conscious core that emerged when Purusha and Prakriti separated.

Divya Drishti — Divine vision — the inner spiritual sight through which Bapuji perceives the subtle and cosmic worlds.

G1 to G17 — The hierarchy of Great Universes within the multiverse, each progressively vaster and more powerful.

Gravitational Waves — Ripples in the fabric of space-time, predicted in 1916 and observed in 2015, which confirm the interconnected nature of cosmic energy.

Jal Tatva — Water element — one of the five gross elements that appeared at approximately minus 30 kala in the multiverse's descent.

Kala — The unit measuring the power of supreme light (param prakash) in a creator. Higher kala means more powerful creation.

Leela — Divine play — the sacred activities of divine beings such as Krishna.

Light and Might — The two aspects of the supreme source: Light is the central point of param prakash; Might is the radiant energy field surrounding it.

Maha Brahmanda — Galaxy — a cluster of infinite brahmandas. Our Milky Way contains approximately 800 billion solar systems.

Mahashiva — The Great Shiva — the creator of a galaxy, possessing 8 to 12 kala of supreme light.

Mala — A string of 108 beads used for spiritual practice — the number 108 originates from the multiverse's creation.

Maya — The cosmic illusion — the veil that makes the soul forget its true divine nature.

Moksha — Liberation — freedom from the cycle of birth and death; in behad ka gyan, the goal extends to transforming the entire multiverse.

Mool Vatan — The original homeland — the realm spanning 90 to 80 kala in the multiverse, where the transition from formless to subtle form began.

Mrityu Loka — The realm of death — the current state of the multiverse, having fallen to minus 100 kala.

Multiverse — The 100-kala brahmanda — the dimension containing all universes, galaxies, and solar systems within it.

Navratna — Nine jewels — the nine souls created from the tridev at the 100-kala level. The symbolic use of navratna on earth traces back to this creation.

Nirakari — Formless — the soul's original, pure state beyond body and mind. The highest state of the soul's being.

Nirgun — Without attributes — a description of the supreme source in its original, uncreated state.

Nirvikar — Beyond all distortion — a quality of the supreme source in its formless state.

Panch Tatva — The Five Elements — Earth, Water, Fire, Air, and Space — that make up the physical world.

Param Agni Tatva — The supreme fire element — appeared in the multiverse between 80 and 60 kala.

Param Akash Tatva — The supreme space element — the first element to appear in the multiverse, at the Mool Vatan level (90-80 kala).

Param Atma — Supreme soul — refers to the 27 original souls of the 100-kala dimension who created the space for the entire multiverse.

Param Brahm Parameshwar — The Supreme Being — a simplified name for the 100-kala creator of the multiverse.

Param Maha Brahmanda — The Supreme Great Cosmic System — the universe. Created with 16 kala of power.

Param Maha Tatva — The Supreme Great Element — the highest form of elemental energy, existing in the atmosphere of the multiverse's Paramdham.

Param Prakash — Supreme Divine Light — the energy or power of a soul in incorporeal form, measured in terms of kala.

Param Prakriti — The Supreme Feminine Principle — the counterpart of Param Purusha, carrying the same sanskaras in feminine form.

Param Purusha — The Supreme Masculine Principle — the beings of 100-kala power who existed before the separation of Purusha and Prakriti.

Param Rishto Power 100 Mahashiva — The supreme creator of the multiverse — possessing 100 kala of spiritual power.

Param Shanti — Supreme Peace — the original state of the soul when initially created.

Param Tatva — Supreme Element — subtler than the five physical elements; the building block of higher-dimensional existence.

Param Vayu Tatva — The supreme air element — appeared in the multiverse between 80 and 60 kala, generated by the vibrations of thought.

Paramatma — The Supreme Soul — also known as Parmatma or Super Soul.

Paramdham — The Supreme Abode — the highest realm of any creation. In the multiverse, it spans 100 to 90 kala.

Peedhi — Generation — used to describe levels of creation beyond the multiverse (101 kala = first peedhi, 1001 = second, etc.).

Prakriti — Nature — the feminine creative principle; the counterpart of Purusha.

Prithvi Tatva — Earth element — one of the five gross elements that appeared at approximately minus 30 kala.

Purusha — The masculine principle — consciousness; spirit. In the multiverse, Param Purusha refers to supreme beings of 100-kala power.

Samadhi — A deep state of superconscious meditation — where the mind becomes still and the soul connects directly with divine truth.

Sankalp — Thought-intention — the creative will through which all creation comes into being.

Sanskaras — Inherent tendencies and impressions carried by the soul — the character recorded in the causal body.

Shiva — The Transformer — the supreme being of a brahmanda, possessing 1 to 4 kala of power.

Srishti — Creation — the act of bringing a world into existence through divine will.

Sukshma Vatan — The Subtle Homeland — the realm spanning 80 to 60 kala in the multiverse, where creation accelerated dramatically.

Tridev — The Divine Trinity — Brahma (creator), Vishnu (sustainer), and Shankar (transformer).

Virat Vishwa Roop — The cosmic universal form — revealed by Krishna to Arjuna, showing infinite brahmandas within a single fragment of divine energy.

Vishwa Parivartan — World Transformation — Bapuji's mission to transform the entire multiverse from mrityu loka back to its original state.

Yog — Divine connection — the practice of linking the soul with the supreme source to receive higher power.

Yoga Vashishtha — Ancient scripture describing infinite creations made of different elements across beginningless time.
