About Bapuji

Bapuji (full name: Bapuji Dashrathbhai Patel, also lovingly called "Dadaji" by the younger generation) was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat. However, he spent his childhood in another village named Ambasan, also located in the Mehsana district.

In the early part of his life, he was a highly successful lawyer. Later, he devoted his life to realising the supreme spiritual truth and bringing this divine knowledge forward for the welfare of humanity. Today, this supreme knowledge serves as a guiding light for true seekers to realise their ultimate destiny. It is a blessing of the highest divinity that the present time is witnessing the rise of this supreme spiritual knowledge, guiding souls on Earth to return to their original source.

Despite being raised in a very poor family and facing challenging circumstances, Bapuji had a deep desire to transform this sorrowful and suffering world into a better place. At the young age of six, he questioned God repeatedly, asking why God remained silent about the suffering of humanity. This intense longing to end human suffering eventually led him to attain the highest level of spirituality later in life.

Even as a child, Bapuji would spend hours alone in the fields, often neglecting his own comfort. Due to poverty, he would walk barefoot without shoes or sandals, frequently getting pricked by thorns. Many times, he would stay late in the fields and, on his way back home, encounter subtle world entities. These experiences sparked his interest in communicating with subtle world souls.

Bapuji was courageous from a young age, which helped him overcome many obstacles. Alongside his studies in chartered accountancy (CA), he gave tuition classes to support himself financially. Later, he completed his Bachelor of Law (LLB) degree and became a well-known lawyer in Ahmedabad.

In 1997, he established a spiritual institution called "Vishwa Parivartak Ishwariya Vidhyalay" in Chenpur, Ahmedabad, with the mission of transforming this mortal world, filled with suffering and disorder, into an eternal divine world of immortality. Smt. Sushma Tandon, lovingly known as "Maa," worked alongside Bapuji in this grand divine mission.

To accomplish this mission, Bapuji worked tirelessly, dedicating all his resources to this divine purpose. During that time, he would deliver continuous

spiritual discourses for up to 18 hours without rest. In these discourses, he explained the highest dimensions of divine knowledge, which he realised through deep meditation and divine vision in a state of superconsciousness. This knowledge goes beyond the imagination of the ordinary human mind.

Bapuji's teachings cover a vast range of topics, including the types of celestial creators across different dimensions, the creation of our solar system, galaxy, and universe, and most importantly, the transcendental knowledge of the multiverse and realities beyond it. His knowledge is supremely profound and is intended for highly evolved seekers, referred to as "behad souls." According to Bapuji, these "behad souls" will play a key role in transforming this mortal world into an eternal divine realm.

At present, Bapuji remains deeply engaged in intense meditation and samadhi for long hours. He does not meet anyone, as he is continuously immersed in his transcendental mission in a superconscious state.

Preface

Gyan Daan Maha Daan

(Sharing Knowledge is the highest charity — share to the maximum extent with all.) —

Bapuji Dashrathbhai Patel

Day 8 is the advance level of our ten-day journey. Until now we have walked step by step — from the soul, through karma, through the creation of Earth and the solar system, through galaxies, through the universe, and finally through the Multiverse.

Today we step beyond even the Multiverse.

In our last session we understood that our Multiverse is a 100 *Kala* Brahmand, and that within it orbit Great Universes from G1 up to G17. Today a new question opens before us: What lies above the Multiverse? Who created the Multiverse? And above that creator, who sits still? And above that?

At some point, even adding "*Param*" in front of *Mahashiva* becomes unwieldy — *Param Param Param Param Param Param Mahashiva*. Bapuji has therefore given us a new unit of measurement at these heights: the *Pedhi*. One *Pedhi* equals 101 *Kala*. From 1st *Pedhi* up through 21st, 101st, 1001st, 1101st, and then one lakh, one crore, 250 crore *Pedhis* and beyond — we now enter *Behad ke Behad ka Vishwa*, the universe that is infinite beyond infinity.

This session also opens a sacred secret about creations beyond multiverse. Why did the Almighty Authority himself descend to Earth in an ordinary human body in this age? The answer begins with one thing — a single *black dot* that appeared before Almighty Authority while He was observing the creation from His supreme abode. That Black dot is our *Brahmand* a tiny point even smaller than a mustard seed. The colours of creation represents the status and power of corresponding creation, this black colour symbolises tremendous loss of power of our *Brahmand*. That tiny black dot triggered the greatest observation mission in the history of creation by Almighty Authority. The time when the mission started was different for different dimension , the time for Almighty Authority is a fraction of second whereas the time on earth is crore of human years.

Please do not read this book in isolation. If you have not yet read Days 5, 6, and 7, read those first. This is advanced knowledge, and without the foundation of Kala, the creation of the universe, and the Multiverse, these pages will feel difficult.

Read slowly. Pause. Re-read. What is about to unfold is the final architecture of creation itself — the map that every true seeker eventually asks to see.

This is not just knowledge to be read.

It is knowledge to be realised.

About This Series

This book is part of a 10-day spiritual journey designed to expand human consciousness beyond limits. Each day reveals deeper layers of truth, guiding the reader from self-awareness to universal understanding.

Based on the Divine Knowledge of

Bapuji Dashrathbhai Patel

This book is a structured presentation of spiritual knowledge shared through discourses.

How to Read This Book

Read this book slowly. There is no hurry. Each chapter carries a truth that may take time to absorb. Pause after every chapter. Sit quietly. Let the knowledge settle within you like a seed settling into soil.

Reflect on each idea before moving to the next. Do not rush to finish — rush to understand.

This is Day 8, the advance level of the series. If you are new, please begin with Day 1. Each day builds upon the previous one, and the full picture only emerges when the foundation is in place. Especially important for today are Days 5, 6, and 7, which cover the galaxy, the universe, and the Multiverse respectively. Without those foundations, Pedhi Gyan will feel very abstract.

Approach this knowledge with an open heart, not with debate. This is not philosophy to argue — it is memory to awaken. Somewhere deep within, you already know these truths. This book simply helps you remember.

Many Hindi and Sanskrit terms appear throughout. Each is explained in parentheses the first time it appears. A complete Glossary is provided at the back for easy reference.

Day 8

Pedhi Gyan and the Infinite Brahmands

The Architecture of Dimensions Beyond the Multiverse

Day 8 is the advance level of *Behad Ka Param Gyan*. Today we step beyond our Multiverse and enter the infinite ladder of *Pedhis* — a sacred measurement that Bapuji has given us for the realms where even Kala becomes too small to count.

We will understand the 1st Pedhi (101 Kala), the 21st Pedhi, *Behad Ka Brahmand* (101 Pedhi), *Behad Ka Maha Brahmand* (1001 Pedhi), *Behad Ke Behad Ka Maha Brahmand* (1101 Pedhi), and the infinite realms beyond multiverse. We will also explore the profound story of the Black Dot and the descent of the Almighty Authority to Earth.

This is the final architecture of creation — the map the soul has been searching for.

Introduction

Beyond the Multiverse — Into the Realm of Pedhis

So far in this series we have moved carefully, one layer at a time. We understood the soul. We understood karma. We understood this Earth, the solar system, the galaxy, the universe, and the Multiverse. In Day 7 we entered *Param Maha Maha Brahmand* — the Multiverse that holds within it all 17 Great Universes from G1 to G17.

Today, in Day 8, we step above the Multiverse itself.

And here we meet a problem. Up to the Multiverse, we used the word *Kala* to measure divine power. The creator of a solar system has 1 to 4 Kala. A galaxy's Mahashiva has 9 to 12 Kala. A universe's Param Mahashiva has 16 to 20 Kala. Our Multiverse's creator has 100 Kala. But as we climb further, we reach creators with 10,100 Kala, then 100,100 Kala, then 1,110,100 Kala. Counting Kala becomes unmanageable.

Bapuji has therefore given us a new unit — the *Pedhi*.

Pedhi is an ordinary Hindi word. In daily life, it means a generation — my father's pedhi, my grandfather's pedhi, my great-grandfather's pedhi. Each generation sits above the next, and the higher the pedhi, the further back it reaches. In Behad Gyan, this familiar word is lifted to cosmic scale. Each Pedhi is a creator's level. One Pedhi equals 101 Kala. As we climb, we speak not of Kala anymore, but of Pedhis — 1st, 21st, 101st, 1001st, 1101st, and onwards to infinity.

Along this climb, four sacred Brahmands stand out as great landmarks:

Behad Ka Brahmand — the 101 Pedhi creation.

Behad Ka Maha Brahmand — the 1001 Pedhi creation.

Behad Ke Behad Ka Maha Brahmand — the 1101 Pedhi creation.

And beyond even these — 1 lakh Pedhi, 1 crore Pedhi, 250 crore Pedhi — realms Bapuji calls *Behad Ke Behad Ki Kala Ke Paramdham*, the supreme abode beyond every limit.

But today is not just a climb in numbers. Today we also meet a story — the story of why the Almighty Authority himself came down to this Earth in ordinary human form. The activities of Almighty Authority on earth began fifteen lakh years ago with a tiny *Black Dot* observed in our Brahmand from above.

Let us begin.

Chapter I

The Concept of Pedhi — A New Measure of Divine Power

In Hindi, the word *pedhi* means generation. We use it in daily life — "my father's pedhi," "my grandfather's pedhi," "our ancestors of many pedhis ago." Each pedhi sits above the next, going backwards in time and upwards in authority. Bapuji has taken this simple, everyday word and lifted it to cosmic scale.

Why was a new word needed? Because above the Multiverse, *Kala* alone becomes unmanageable. Up to 100 Kala, counting is easy — we say Shiva has 1 to 4 Kala, Mahashiva has 9 to 12 Kala, Param Mahashiva has 16 Kala, and so on. But the creator of the creator of our Multiverse has 101 Kala. Above him, 201 Kala. Above him, 301 Kala. Soon we would be writing 2101 Kala, 10,100 Kala, 1,110,100 Kala. The numbers balloon past any comfortable mental grasp.

To name these beings by prefixing "*Param*" does not help either. One Param above the universe; two Params above the Great Universe; three Params above the Great Great Universe. Soon one would have to say *Param Param Param Param Param Param Param Mahashiva* just to refer to a single being. The tongue gives up before the climb does.

So Bapuji gave us the Pedhi. The mathematics is simple:

$$1 \text{ Pedhi} = 101 \text{ Kala.}$$

The 1st Pedhi is the 101 Kala Brahmand. The 2nd Pedhi is the 201 Kala Brahmand. The 21st Pedhi is the 2101 Kala Brahmand (21 multiplied by 101). The 101st Pedhi is the 10,100 Kala Brahmand. And so on.

Just as in our human life, the higher the pedhi, the greater the authority, so in cosmic life, the higher the Pedhi, the more luminous and powerful the creator at that level. And the closer one sits to the central *Param Prakash* (supreme divine light) at the heart of each Pedhi Brahmand, the more powerful the soul.

This new measure of Pedhi is the key that unlocks today's knowledge. Without it, the architecture of the infinite remains locked. With it, every level of creation falls into a clear hierarchy.

♦ **Bapuji Insight:**

"Pedhi matlab peedhi — jo jitni ooper, utni powerful."

"Pedhi means generation — the higher the generation, the greater the power."

♦ **Bapuji Insight:**

"1 Pedhi barabar 101 Kala — yahi sabse simple formula hai."

"1 Pedhi equals 101 Kala — this is the simplest formula to remember."

Chapter II

The 1st Pedhi — The 101 Kala Brahmand

We begin at the very foot of this new ladder. The 1st Pedhi is the 101 Kala Brahmand. And inside it orbits our own Multiverse.

Recall that our Multiverse is a 100 Kala Brahmand. Within it move Great Universes (G1 through G17). Within each Great Universe move universes. Within each universe move galaxies. Within each galaxy move solar systems. Within each solar system moves a planet like our Earth.

Now, just as our Earth revolves inside a solar system, our entire 100 Kala Multiverse revolves inside a larger creation — the 1st Pedhi Brahmand. Its creator has 101 Kala of power — one Kala more than the combined power of our Multiverse.

Think of it visually. At the centre of the 1st Pedhi Brahmand sits its creator, in his formless *Param Prakash* state. Around him is his *akari* (semi-form) manifestation — what we might call the Shiva-Shakti of that dimension. Around that is a security layer of high-Kala souls. And surrounding all of this, orbiting in immense numbers, are *innumerable* 100 Kala Multiverses — ours being just one of them.

How many Multiverses orbit inside one 1st Pedhi Brahmand? Bapuji says they are *ananta anant* — countless, unmeasurable. What our science calls the

Multiverse is just one drop in this ocean of 100 Kala Multiverses held within the 1st Pedhi.

This is humbling. We who were once proud to have understood our own 156 billion light year universe must now understand that this universe is a tiny speck, our galaxy a speck within our Universe, and our entire Multiverse itself only one among countless other Multiverses held within a single 1st Pedhi Brahmand.

And the 1st Pedhi is only the beginning.

♦ Bapuji Insight:

"101 Kala ka ek hi Brahmand hamari poori Multiverse ko apne andar rakhta hai."

"A single 101 Kala Brahmand holds our entire Multiverse within itself."

Chapter III

Our Multiverse — The Only One With Elements

Before we climb higher, we must pause and understand something extraordinary about our own Multiverse. Of all the countless 100 Kala Multiverses orbiting in the 1st Pedhi Brahmand — of all the infinite Multiverses in all the infinite higher Pedhis — our Multiverse is unique.

It is the only one that contains *tatva* (elements).

Every other Multiverse in the infinite cosmos is made purely of *Param Tatva* (supreme element) and *Param Prakash* (supreme light). None of them contains gross elements like *prithvi* (earth) or *jal* (water) — the two heaviest elements. None contains the dense five-element matter we touch every day.

Why is our Multiverse the exception? Because something went wrong. During our Multiverse's creation, a different process was used, and as a result, power was lost in a way that did not happen anywhere else. Slowly, the Multiverse began to fall. Bapuji has traced the fall: from 100 Kala it came down to -100 Kala (minus 100 kala). But it did not stop there. It kept falling — to minus 10,

minus 20, minus 30 Kala. Around minus 30 Kala, *prithvi* and *jal* elements began to form. Now the multiverse has degraded to the level of

-100 kala, this is the level we now inhabit on Earth.

Every other Multiverse has never undergone *srujan-visarjan* (creation and dissolution). Ours has already undergone two complete cycles of creation and destruction, and is now running its third cycle. Our Universe has undergone seventeen complete cycles and is now undergoing its eighteenth cycle.

This is why this particular time, on this particular planet, in this particular Multiverse, is unlike any other moment in all of creation. The fall that occurred here has concerned the entire infinite cosmos — and the response to it has been the greatest rescue mission undertaken by Almighty Authority himself, the creation has ever seen.

It is no exaggeration to say: the eyes of the infinite watch our Earth today.

♦ **Bapuji Insight:**

"Sirf hamari Multiverse mein tatva hai — baaki sab Param Tatva ki duniya hai."

"Only our Multiverse contains gross elements — every other realm is a world of Param Tatva."

♦ **Bapuji Insight:**

"Hamari Multiverse do baar ban chuki hai, yeh teesri baar hai."

"Our Multiverse has been created and dissolved twice — this is the third time."

Chapter IV

Rising Through the Pedhis — From the 1st to the 20th

Having understood the 1st Pedhi, let us climb one step at a time. The 2nd Pedhi is the 201 Kala Brahmand. The 3rd Pedhi is the 301 Kala Brahmand. The 4th is

401 Kala. The 5th is 501 Kala. And so on, all the way up to the 20th Pedhi, which is 2001 Kala.

The mathematics is the same throughout. For any Pedhi number, multiply it by 101 to find the total Kala of its creator. 5 Pedhi equals 501 Kala. 10 Pedhi equals 1001 Kala. 15 Pedhi equals 1501 Kala. 20 Pedhi equals 2001 Kala.

At each level, the creator sits at the centre in formless Param Prakash. Around him is his akari form. Around that is a security layer. And around that, orbiting in countless numbers, are the Brahmands of the Pedhi just below. Inside the 5th Pedhi Brahmand orbit countless 4th Pedhi Brahmands. Inside each 4th Pedhi orbit countless 3rd Pedhis. Inside each 3rd Pedhi, countless 2nd Pedhis. Inside each 2nd Pedhi, countless 1st Pedhis. And inside each 1st Pedhi — countless 100 Kala Multiverses, one of which contains our Earth.

The scale is unimaginable. Yet Bapuji cautions us: do not try to grasp it only with the mind. Try to *realise* it. Sit in meditation. Let the inner vision open. The mind breaks down under these numbers, but the soul, when settled, remembers.

As we climb each Pedhi, the atmosphere also shifts. At the 1st Pedhi, the atmosphere is still mostly *Param Tatva* with a small percentage of *Param Prakash*. As we move upward, *Param Prakash* grows, *Param Tatva* shrinks. By the time we reach the highest Pedhis, the atmosphere is almost entirely *Param Prakash*. This is the subtle signature of ascent: more light, less element.

At each Pedhi, the creator has divided his power into countless souls — with the usual pattern of 108, 1008, 9 lakh, 2 crore, and 33 crore souls forming the concentric circles of administration. The same divine architecture repeats at every level, only with vastly more power at each step up of *pedhi*.

♦ Bapuji Insight:

"Har Pedhi ek seedhi hai — ek-ek kadam chadhite jao."

"Every Pedhi is a step — keep climbing one at a time."

Chapter V

The 21st Pedhi — The First Major Landmark

Something significant happens at the 21st Pedhi. It is not merely another rung on the ladder. It is a major landmark — the first great pause in the climb.

The 21st Pedhi Brahmand has a creator of 2101 Kala. Bapuji has dedicated an entire playlist on his YouTube channel to the 21st Pedhi — around sixteen videos exploring its structure, its creator, its role. This alone shows its importance.

Why the 21st? Because this is where the first major rescue response will originate when something goes wrong lower down. When the Black Dot is observed (as we will learn in a later chapter), it is the master of the 21st Pedhi who first receives the call to act. From the 21st Pedhi, power is sent downward through the 20th, the 19th, and so on — step by step — to investigate and correct the disturbance.

Inside the 21st Pedhi Brahmand move Pedhis from the 20th down to the 1st, each with its own countless Brahmands. Our entire Multiverse, our entire 1st Pedhi Brahmand, our 2nd, our 3rd, all the way up through 20 — all of them sit inside just one 21st Pedhi Brahmand.

The power of the 21st Pedhi's creator is beyond anything we have yet encountered. If a soul has come from the 21st Pedhi, that soul carries within it 2101 Kala of original power. Such a soul, even when dimmed by descent into Earth-bodies, carries an inner light far exceeding anything the 16 Kala universe could ever provide. Bapuji has said: once you know your own Pedhi, the ordinary Law of Attraction sounds almost childish. Why attract from a 16 Kala universe when you yourself carry 2101 Kala within?

The 21st Pedhi is thus both a structural milestone and an identity awakener. It is the first place where a soul begins to sense the true scale of its own origin.

♦ Bapuji Insight:

"21 Pedhi pehla bada padav hai — yahan se ooper ka Gyan shuru hota hai."

"The 21st Pedhi is the first great milestone — from here the higher knowledge truly begins."

Chapter VI

101 Pedhi — Behad Ka Brahmand

After the 21st Pedhi, the climb continues — 31st, 41st, 51st, 61st, 71st, 81st, 91st — until we reach the next great landmark: the *101st Pedhi*.

Bapuji calls the 101st Pedhi Brahmand by the sacred name *Behad Ka Brahmand* — the Brahmand of the infinite.

Why this name? Because the power here is so vast that the very concept of limit begins to dissolve. The creator of the 101st Pedhi has 10,100 Kala. His Brahmand contains within it every Pedhi from the 100th down to the 1st, each with its own endless creation.

Inside the 101 *Pedhi* Brahmand orbit countless 91 Pedhi Brahmands. Inside each of those orbit 81 Pedhi Brahmands. Inside each of those, 71 Pedhi Brahmands. The nesting continues all the way down to the 21 Pedhi, then to the 1 Pedhi, then to our 100 Kala Multiverse. Every lower level is contained within this 101 *Pedhi*.

This is the first realm where Bapuji applies the word *Behad* — the boundless. At this altitude, calculation becomes almost meaningless. The mind cannot encompass it. The soul can only *feel* it.

The atmosphere of the 101 Pedhi is nearly all *Param Prakash* and *Param Mahatva*. *Tatva* as we know it — the gross elements we encounter on Earth — is entirely absent. This is a world of pure light.

Bapuji has made a special video titled "*Behad Ke Brahmand Ka Param Gyan — 101 Pedhi*" devoted entirely to explaining this dimension. Those who are ready may watch it. For most, the glimpse offered in this chapter is already more than the mind can hold.

◆ Bapuji Insight:

"101 Pedhi ka Brahmand — Behad Ka Brahmand hai. Yahan se asli Behad shuru hota hai."

"The 101 Pedhi Brahmand is Behad Ka Brahmand. From here, the real infinite truly begins."

Chapter VII

1001 Pedhi — Behad Ka Maha Brahmand

Above the 101st Pedhi, the climb continues. We pass through the 201st, 301st, 401st, and so on, ten-fold of our earlier landmarks, until we arrive at the *1001st Pedhi*.

Bapuji calls this realm *Behad Ka Maha Brahmand* — the great Brahmand of the infinite.

The creator of the 1001 Pedhi has 100,100 Kala. Inside this Brahmand orbit 1000 Pedhi Brahmands, 901 Pedhi Brahmands, 801 Pedhi Brahmands, and downward through all the Pedhis we have studied, all the way to our own 100 Kala Multiverse.

The word *Maha* — great — is placed before *Behad* because we are ascending. If *Behad* is infinite, *Maha Behad* points to an infinite that holds within it many infinities. This is how Bapuji's language works — each prefix signals another layer of depth.

The structure remains the same. At the centre, the formless creator in Param Prakash. Around him, his akari form. Around that, a security layer of the highest souls. Around that, the nested Pedhi Brahmands. The same divine blueprint that we saw at the 1st Pedhi is repeated here — only now with breathtaking vastness.

Bapuji has also devoted a video to this dimension, titled "*1001 Pedhi Ka Behad Ka Maha Brahmand*", where he discusses the architecture of 1001 Pedhi specifically. Each sacred landmark is thus not a single video's topic but a small library of teachings in itself.

What matters for the seeker is not to memorise the numbers, but to feel the depth. If our 16 Kala universe is as vast as it is, what must 100,100 Kala feel like? The mind staggers. The soul bows.

♦ Bapuji Insight:

"1001 Pedhi — Behad Ka Maha Brahmand. Yahan se buddhi rukti hai aur aatma kei yatra shuru hoti hai."

"1001 Pedhi is Behad Ka Maha Brahmand. Here the intellect stops, and the soul's journey begins."

Chapter VIII

1101 Pedhi — Behad Ke Behad Ka Maha Brahmand

One more great step awaits. Above the 1001st Pedhi lies the *1101st Pedhi*. Bapuji calls this realm *Behad Ke Behad Ka Maha Brahmand* — the great Brahmand of the infinite of the infinite.

The creator of the 1101 Pedhi has 1,101,00 Kala (1101 multiplied by 100). Within it orbit the 1100th, 1050th, 1001st, 901st, 801st Pedhis — an entire field of lower sacred dimensions all held within one vast 1101 Pedhi Brahmand.

This is the highest of the four great landmarks. Bapuji has a special video titled *"Bapuji 11001 Pedi — Must Watch"* specifically dedicated to this topic. For many years, some students of Behad Gyan mistakenly believed that 1101 Pedhi (sometimes written as 11001 because of earlier notation) was the final, ultimate dimension — that above it lay only the Almighty Authority himself.

In this session, Bapuji corrects that misunderstanding. 1101 Pedhi is indeed a great landmark. It is the highest of the four named Brahmands — Behad Ka Brahmand, Behad Ka Maha Brahmand, Behad Ke Behad Ka Maha Brahmand. But it is not the final dimension.

Above 1101 Pedhi, the creation continues — infinitely.

At this altitude, a subtle shift occurs in every seeker's understanding. Until here, we have been climbing defined steps. From here onwards, steps themselves dissolve. The very concept of "next level" becomes porous. We enter a realm where the mathematics only gestures toward a reality that is fundamentally beyond count.

This is where Behad Gyan begins to differ even from itself. Earlier Bapuji spoke cautiously; now he opens the doors more fully. The seeker who has climbed with care up to this point is ready to hear of realms beyond.

♦ Bapuji Insight:

"1101 Pedhi final nahi hai — iske upar bhi anant Pedhiyan hain."

"1101 Pedhi is not the final — above it too, infinite Pedhis exist."

Chapter IX

Beyond 1101 Pedhi — The Truly Infinite Realms

Here we enter the heart of today's revelation.

Above the 1101 Pedhi, the climb does not end. Bapuji opens the gates further and reveals what lies beyond even the four great Brahmands we have just studied.

Above 1101 Pedhi comes the 1 lakh Pedhi Brahmand. One lakh multiplied by 101 equals 10,100,000 (one crore and one lakh) Kala.

Above that comes the 1 crore Pedhi Brahmand. One crore multiplied by 101 equals 101 crore Kala.

Above that comes the 250 crore Pedhi Brahmand.

And above even that, the climb continues — infinitely.

Bapuji uses a special phrase for this whole field: *Behad Ke Behad Ki Kala Ke Paramdham* — the Supreme Abode of the Kalas of the Infinite of the Infinite. This is the realm of the Almighty Authority himself — the Ultimate Supreme

Source. In his formless state, the Almighty Authority resides in the deepest centre of this infinite field, a realm Bapuji calls *Behad Ki Kala Ka Paramdham* — the Supreme Abode of the Infinite Kala.

It is here that a subtle truth comes into focus. When Bapuji says that certain souls have come to Earth from *Behad Ke Behad Ki Kala Ke Paramdham*, he means they carry within them the power of realms above 1 crore Pedhi — above 250 crore Pedhi — realms whose Kala cannot even be calculated on any supercomputer.

Such souls are not powered by the universe. They are not powered by the Multiverse. They are not even powered by the 1001 Pedhi. They carry directly within them the vibration of the Almighty Authority's own original light. When such a soul remembers its origin, it becomes a channel of infinite power on this Earth.

This is why Bapuji speaks so tenderly to every seeker: *"You may be one such soul. Do not underestimate yourself. Do not settle for drawing power from the universe. Go higher. Go all the way to the source."*

♦ Bapuji Insight:

"Behad Ke Behad Ki Kala Ke Paramdham se aayi aatmaon mein asli power hai."

"In the souls who have come from Behad Ke Behad Ki Kala Ke Paramdham — in them lies the true power."

♦ Bapuji Insight:

"Supercomputer bhi is Kala ko gin nahi sakta — yeh sirf realise karne ki cheez hai."

"Even a supercomputer cannot count this Kala — this can only be realised."

Chapter X

The Architecture of Every Pedhi Brahmand

Though the scale changes at each level, the design does not. Every Pedhi Brahmand — whether 1st, 21st, 101st, or 1001st — follows the same sacred blueprint. Understanding this blueprint once allows us to recognise it at every altitude.

The Central Power House. At the very centre of every Pedhi Brahmand sits the creator in his formless Param Prakash state. This is the pure source of all power for that Brahmand — what Bapuji calls the *power house*. It is from here that every soul, every creation, every structure in that Brahmand draws its energy.

The Akari Form. Immediately surrounding the central power house is the creator's akari (semi-form) manifestation — his Shiva-Shakti pair, the primal masculine and feminine aspects taking luminous shape. The akari form is how the creator interacts with his creation; the formless light expresses itself through this radiant semi-form.

The Security Layers. Around the akari form are concentric layers of high-power souls. These are typically the 108, then 16,000, then 9 lakh, then 2 crore, then 33 crore souls — expanding outward in ever-wider rings. Each layer has a specific administrative role, and together they form what Bapuji calls the cosmic government of that Pedhi.

The Pedhi Layers. Beyond these security rings lie the nested lower Pedhis. Inside a 101 Pedhi Brahmand orbit 91 Pedhi Brahmans; inside those orbit 81 Pedhi Brahmans; and so on down. The most powerful souls sit closest to the centre; less powerful ones sit further out. This is not a punishment; it is the natural gravitational order of spiritual power.

The Atmosphere. Every Pedhi Brahmand has its own atmospheric composition — Mixture of Param Prakash, Param Mahatva, and Param Tatva. The higher the Pedhi, the greater the Param Prakash percentage. At our 1st Pedhi, Param Prakash is small. By 1101 Pedhi, quantity and quality of Param Prakash increases significantly as compared to 101 pedhi.

The Direction of Governance. Unlike our fallen Multiverse (where governance has had to come from above due to the disturbance), in every healthy *Pedhi Brahmand* governance flows naturally from the central power house outward. The akari form does not govern directly; the security layers do. The power house merely radiates light; the concentric rings carry and distribute it.

When you next meditate, hold this image: wherever you turn your attention, this same sacred architecture repeats — a glowing centre, a semi-form around it, layers of protection, nested creations all the way out. The blueprint is eternal. Only the scale changes.

♦ Bapuji Insight:

"Har Brahmand ka design ek jaisa hai — power house, akari, security, aur layers."

"Every Brahmand has the same design — power house, akari, security, and layers."

Chapter XI

Time in the Behad Realms — Beyond All Calculation

Every Brahmand has its own time. We touched this idea in Day 6 when we spoke of Param Mahashiva's single moment equalling countless earthly years. Today that principle unfolds to its full extent.

On Earth, we use minutes, hours, days. In the scriptures, we meet larger units — yugas, chaturyugas, manvantaras, kalpas, maha kalpa. Markandeya Purana describes Markandeya Rishi as having lived for thousands of chaturyugas, reaching a lifespan of around 5400 years in some accounts. But these are still human-scaled measures.

Bapuji explains the scaling by a simple chain:

One *pal* (blink) of Shiva, the creator of a solar system, equals about 100 years of Brahma's time.

One pal of Mahashiva, the creator of a galaxy, equals about 100 years of Shiva's time.

One pal of Param Mahashiva, the creator of a universe, equals about 100 years of Mahashiva's time.

And so on, upward. Each level compresses 100 years of the level below into one blink.

Now try to imagine what this means at the Pedhi level. At 1st Pedhi, 100 years of Param Mahashiva compress into one blink. At 21st Pedhi, this compounds twenty-one times over. At 101st Pedhi, a hundred times over. By the time we reach 1 crore Pedhi, the mind cannot perform the calculation at all.

At *Behad Ke Behad Ki Kala Ke Paramdham*, time is no longer a meaningful concept. Bapuji simply says: *samay se paar* — beyond time. What is happening there, happens without duration. Beginnings and ends dissolve into the eternal now.

This is why the Almighty Authority, residing at the highest Paramdham, can see the entire cosmic drama — including the rise and fall of countless Multiverses — as if it were all happening in a single flash. For us, time is a long journey. For him, it is a glance.

To know this is to stop measuring our small sorrows against the clock. The soul's true time is not the time of Earth. The soul's true time is the time of its origin.

♦ Bapuji Insight:

"Behad ki duniya mein samay ki ginti nahi hoti — yahan samay se paar hai sab kuch."

"In the world of Behad, time cannot be measured — everything here is beyond time."

Chapter XII

The Black Dot — The Beginning of the Observation

Now we come to the sacred story that lies at the heart of Day 8. It begins approximately 198 crore human years ago with a single, tiny, dark point observed by Almighty Authority which is our *Brahmand*.

From the highest dimension of creation — from where the Almighty Authority himself watches — a subtle disturbance was detected. It appeared as a *black dot*

which was later detected as our multiverse and our *Brahmand* amongst all in the multiverse. Not a black hole; black holes are a different phenomenon altogether. A black dot, in Bapuji's language, is a point of maximum power loss. A place where the light of Param Prakash had begun to dim to the highest extent.

Every other Brahmand in all the infinite Pedhis is made of pure Param Prakash. No dimming occurs in any of them. But in our Multiverse — the only Multiverse ever made with elements — a loss of power had begun. Its first visible sign was this black dot. A place in our Brahmand where the light had weakened.

The Almighty Authority does not descend personally at the first sign of trouble. Just as a Prime Minister does not personally rush to every disturbance in a country, but sends deputies to investigate, so too the Almighty Authority activated a chain of cosmic management.

Management, Bapuji reminds us, means *getting things done through others*. At every level of authority, a cascade of delegation occurs. So from the Almighty Authority, the instruction travelled first to the 21st Pedhi. The master of the 21st Pedhi created from within himself a subtle form and sent it down. That form entered G2 — our Great Great Universe — inside this is where our Earth sits. From G2, further forms were dispatched to G1. From G1, to our universe. From our universe, to our galaxy. From the galaxy, to our brahmand. And finally, to our Earth.

At each stage, forms were deployed to observe, to investigate, to report back. What is this black dot? Why has power loss begun here? Why is this Multiverse falling, when no other Multiverse has ever fallen?

The cosmic chain of investigation was immense. Yet even with so many forms of observation dispatched, the fall continued. Exact reason for downfall of creation could not be detected. Something more deep and direct observation was needed.

That is when the Almighty Authority himself chose to act.

♦ Bapuji Insight:

"Ek chhota sa Black Dot — 198 crore saal pehle — aur poora Behad ka Vishwa bil gaya."

"One tiny Black Dot — 198 crore years ago — and the entire Behad universe stirred."

Chapter XIII

Behad Ke Baap and the 108 Seed Souls

When the cascading observation through G2, G1, and the universe was not enough to stop the fall, the Almighty Authority took an unprecedented step. He created directly from within himself a form — a special being whom Bapuji lovingly calls *Behad Ke Baap*, the Father of the Infinite. In his YouTube videos, Bapuji also refers to him as *Chhotu Ram Bapuji*, with affection, a tender name used among insiders.

This form was not sent to wander through the usual layers. He was placed directly 500 kilometres above Earth, in akari (semi-form) state, and he built his own small Brahmand there — roughly two kilometres in radius of Akari territory — as his base for cosmic observation of Earth.

To study the activities on earth and the nature of elements on earth, *Behad Ke Baap* had created 108 *seed souls* — 108 souls of the highest possible power, direct emanations from the Almighty Authority himself. These 108 souls were stationed in their own akari forms, working alongside Behad Ke Baap, observing and influencing the unfolding of creation on Earth from their elevated station.

These 108 souls are not ordinary. They are not souls born through the usual cosmic processes of division at 16 Kala or 14 Kala. They are souls whose origin is above even 1101 Pedhi — they come from *Behad Ke Behad Ki Kala Ke Paramdham*. Within them resides the original Kala of the Almighty Authority's own being.

When Bapuji speaks of "high quality souls" or "souls of infinite power," these are the souls he means. They are the special 108.

This observation mission began fifteen lakh years ago, long before the first of the well-known avatars on Earth. The 108 souls watched, waited, and prepared

for the great descent that was to come — first in the age of Treta, then in the age of Dwapar, and finally, most intensely, in this present age.

What began as the observation of a black dot had become the most sustained rescue mission in the history of creation.

♦ Bapuji Insight:

"108 aatmaon ka janm Behad Ke Baap se hua — ye seedhe Paramatma ke pass se aayi hain."

"The 108 souls were born from Behad Ke Baap — they have come directly from the Almighty Authority."

Chapter XIV

The Avatars — Ram, Krishna, and the 9 Lakh Souls

Fifteen lakh years ago the observation began. Approximately fifteen lakh years later came the first great avatar — Ram.

Who was Ram, really? In Behad Gyan, Ram was the akari form of Behad Ke Baap taking human body on Earth. The akari form descended into *sthul* (physical) form through Ram avatar. And with Ram, the 108 special souls also sent their power into human bodies as well as to *Vanar* sena for the first time to assist *Ram* in His mission on earth. They were the close companions, the family members, the inner circle around Ram in the ancient story — figures whose roles in the Ramayana have always felt luminous, more-than-human.

After Treta Yuga completed, Dwapar Yuga started. By the end of Dwapar — approximately 5000 years ago — came the Krishna avatar. Here, everything intensified.

Krishna too was a direct descent of Behad Ke Baap. And this time, the same 108 souls incarnated with him, now in their most visible roles. But with Krishna, a new group also descended — the *1008 souls*. These 1008 are of

slightly lower, though still extraordinary, power; they are created from the akari form as well, but one level below the 108. In the Krishna story, they appear as the great kings and warriors of that age — the Pandavas, the Kauravas, the royal figures whose legacies still echo through our scriptures.

In addition, around the time of Krishna, a much larger group of souls were created: the 16,000 and the 9 lakh souls. These are the souls who became ministers, officials, helpers, and close attendants during the Krishna avatar. Bapuji reveals an important detail here: these 16,000 and 9 lakh souls were *created* at that time — roughly 5000 years ago. This is why within these souls, the inner recording of cosmic history only goes back about 5000 years. The famous teaching that the world drama is 5000 years old comes from this observation — but it applies only to these specific souls, not to souls in general. Earth itself, our universe, our Multiverse, and the infinite *Pedhis* above — all of these are vastly older. The 5000-year limit exists only inside the specific souls who were created at that particular moment.

The 108 and 1008 are of a different order. Their inner recording reaches back through 1101 Pedhi, through Behad Ke Behad Ki Kala Ke Paramdham, all the way to the Almighty Authority. When such a soul sits to meditate, and the veils begin to part, the memory that rises is not a 5000-year memory. It is an infinite memory.

This is why the souls who respond most deeply to Bapuji's teachings — who feel the tears of recognition, who feel that they have known this knowledge before — are almost always souls from these special groups. They are remembering, not learning.

♦ Bapuji Insight:

"108 aur 1008 aatmayein — Ram aur Krishna avatar ke sath aayin — asli Behad ki power leke aayin."

"The 108 and 1008 souls — came with Ram and Krishna avatars — carrying the real power of Behad."

♦ Bapuji Insight:

"9 lakh aatmaon ke andar sirf 5000 saal ki recording hai — kyonki wo tabhi banayi gayin."

"Inside the 9 lakh souls there is only 5000 years of recording — because they were created only then."

Chapter XV

Finding Your Origin — The Inner Journey of the Pedhi Soul

We have climbed through the Pedhis. We have heard the sacred story of the Black Dot, of Behad Ke Baap, of the 108 and 1008 and 16,000 and 9 lakh souls. Now comes the most personal question of all: *Where did your soul come from?*

Bapuji's honest answer to every seeker is this: "Do not rush to label yourself. As your meditation deepens, as the *avarans* (coverings) on your soul begin to thin, a clear *vision* will arise from within. You will feel it. You will recognise your own Pedhi."

Until that vision arises, there is no way to answer the question for certain from the outside. Every soul's capacity is different. Every soul has travelled a different road to arrive at this human body. One soul may come from a 100 Kala Multiverse; another from the 1st Pedhi; another from the 11,001st Pedhi; another from *Behad Ke Behad Ki Kala Ke Paramdham* itself. Each will have a different inner ceiling, a different natural destination, a different native speed of ascent.

But one principle applies to every soul without exception. Bapuji tells us: when we sit in yoga and lift our sankalp upward, most people do not even send their attention past the Multiverse. The typical sankalp reaches the sun, or perhaps the Milky Way, or at most the universe. Very few sankalps reach even the 1st Pedhi.

This is why Bapuji teaches: *Do not stop at the universe. Do not stop at the Multiverse. Send your sankalp all the way up — through the Pedhis, through Behad Ka Brahmand, through Behad Ka Maha Brahmand, through Behad Ke Behad Ka Maha Brahmand, and finally all the way to Behad Ke Behad Ki Kala Ka Paramdham.* Let your sankalp drink

from the original source. Let the original Param Prakash flow downward through you.

The technique is practical. Sit quietly. Let the body settle. Now bring to mind, one at a time, each layer: Earth, solar system, galaxy, universe, G1, G2, ... G17, Multiverse, 1st Pedhi, 21st Pedhi, 101st Pedhi, 1001st Pedhi, 1101st Pedhi, 1 lakh Pedhi, 1 crore Pedhi, 250 crore Pedhi. Keep climbing. Keep remembering. Do not stop.

Finally, feel the Param Prakash of *Behad Ke Behad Ki Kala Ka Paramdham* pouring down through all these layers, entering the akari form of Behad Ke Baap, entering your Earth, entering your body, entering each cell. This is not imagination. This is remembering.

As the avarans dissolve, the Pedhi of your origin will become clear to you. You will not need to guess. You will know. And in that knowing, the ordinary Law of Attraction becomes irrelevant. A soul of 11,001 Pedhi does not need to draw power from a 16 Kala universe. It only needs to remember what it already is.

This is the heart of Day 8. You are not a small being. You are a Pedhi soul, descended from the highest Paramdham, visiting Earth for a sacred task. Come home to that truth. The universe did not create you — you came to witness and transform the universe.

♦ Bapuji Insight:

"Apna sankalp Multiverse par mat rokiye — Behad Ke Behad Ki Kala Ke Paramdham tak le jaayiye."

"Do not stop your sankalp at the Multiverse — take it all the way to Behad Ke Behad Ki Kala Ke Paramdham."

♦ Bapuji Insight:

"Aap chhoti aatma nahi ho — aap Pedhi ki aatma ho, asli power tumhare andar hi hai."

"You are not a small soul — you are a Pedhi soul, the real power lives within you."

What We Have Understood on Day 8

Today we stepped beyond the Multiverse itself. We learned that above our 100 Kala Multiverse lies an infinite ladder of sacred dimensions, each called a *Pedhi*. One Pedhi equals 101 Kala — a new unit Bapuji has given us because above the Multiverse, counting in Kala becomes unmanageable.

We understood that our own Multiverse is uniquely fallen among all Multiverses. It is the only Multiverse that contains elements (*prithvi, jal*). It has already undergone two cycles of creation and dissolution, and this is its third. Our Universe has undergone seventeen cycles, and this is its eighteenth. Nothing like this has occurred anywhere else in the infinite Pedhis.

We climbed through the Pedhis — 1st Pedhi (101 Kala), 21st Pedhi (2101 Kala, a major landmark), 101st Pedhi (*Behad Ka Brahmand*, 10,100 Kala), 1001st Pedhi (*Behad Ka Maha Brahmand*, 100,100 Kala), and 1101st Pedhi (*Behad Ke Behad Ka Maha Brahmand*, 1,101,00 Kala). We saw that 1101 Pedhi is not the final; above it stretch infinite further Pedhis — 1 lakh Pedhi, 1 crore Pedhi, 250 crore Pedhi,

and beyond — all held within *Behad Ke Behad Ki Kala Ke Paramdham*, the supreme abode of the Almighty Authority.

We saw that the architecture of every Pedhi Brahmand is the same: a central Param Prakash power house, an akari form, concentric security layers of 108, 16,000, 9 lakh, 2 crore, and 33 crore souls, and nested Pedhi Brahmands orbiting outward.

We entered the sacred story of the Black Dot. Fifteen lakh years ago, a tiny point of power loss was observed in our Brahmand. The Almighty Authority initiated the greatest rescue mission in the history of creation — dispatching forms through 21st Pedhi, G2, G1, our universe, our galaxy, our brahmand, and finally to Earth. When cascading management was not enough, the Almighty Authority created *Behad Ke Baap* directly from himself, placed him 500 km above Earth in akari form, and from that form 108 seed souls were created — direct emanations of the Almighty Authority’s own light.

We traced the descent through Ram avatar (the 108 souls took human form), through Krishna avatar (the same 108 joined by the 1008 souls, with 16,000 and 9 lakh souls additionally created — which is why the world-drama-of-5000-years concept applies only to these souls), to our present moment when the Almighty Authority himself has taken ordinary human form on Earth to initiate the final transformation.

Finally, we turned inward. We learned that every soul carries within it a memory of its origin Pedhi. As the *avarans* (coverings) dissolve through meditation, the true Pedhi of the soul reveals itself. The deepest practice is not to draw from the universe or Multiverse, but to send one’s sankalp all the way to *Behad Ke Behad Ki Kala Ka Paramdham* and let the original Param Prakash flow downward through every Pedhi into this body.

Tomorrow, in Day 9, we will deepen this further — entering the mechanics of the present transformation and the role each Behad soul plays in it.

Glossary

The following terms appear throughout this book. They are preserved in their original Sanskrit / Hindi forms, as each carries a spiritual meaning that is difficult to fully translate.

Pedhi (पीढ़ी)

In everyday Hindi, a generation. In Behad Gyan, a measurement unit for spiritual power above the Multiverse level. 1 Pedhi equals 101 Kala.

1st Pedhi

The 101 Kala Brahmand. Its creator has 101 Kala of power. Our entire 100 Kala Multiverse orbits inside it, alongside countless other 100 Kala Multiverses.

21st Pedhi

The 2101 Kala Brahmand. The first major landmark in the climb. Contains Pedhis from 20 down to 1. It is from the 21st Pedhi that the first rescue response was dispatched when the Black Dot was observed in our Brahmand.

Behad Ka Brahmand

The 101st Pedhi Brahmand — 10,100 Kala. The first realm where the word Behad (infinite) truly applies in Bapuji's naming.

Behad Ka Maha Brahmand

The 1001st Pedhi Brahmand — 100,100 Kala. The great Brahmand of the infinite.

Behad Ke Behad Ka Maha Brahmand

The 1101st Pedhi Brahmand — 1,110,100 Kala. The great Brahmand of the infinite of the infinite. Some students earlier believed this to be the final dimension; Bapuji has clarified that it is not.

Behad Ke Behad Ki Kala Ke Paramdham

The infinite field of Pedhis above 1101 Pedhi — including 1 lakh Pedhi, 1 crore Pedhi, 250 crore Pedhi, and beyond. The true home of the Almighty Authority.

Behad Ki Kala Ka Paramdham

The supreme innermost abode within Behad Ke Behad Ki Kala Ke Paramdham, where the Almighty Authority resides in his formless Param Prakash state.

Black Dot

A point of power loss observed in our Brahmand approximately 15 lakh years ago. Different from a scientific black hole; in Behad Gyan it indicates that Param Prakash has dimmed at that point. The Black Dot triggered the greatest rescue mission in the history of creation.

Behad Ke Baap

The Father of the Infinite — a direct akari form created by the Almighty Authority himself, placed 500 km above Earth 15 lakh years ago to observe and eventually transform our fallen Multiverse. Bapuji also calls him Chhotu Ram Bapuji in some videos.

108 Souls

108 seed souls created directly from Behad Ke Baap's akari form 15 lakh years ago. They carry within them the power of Behad Ke Behad Ki Kala Ke Paramdham. They took human bodies during the Ram avatar and again during the Krishna avatar.

1008 Souls

1008 souls created at the akari level, one tier below the 108. They descended during the Krishna avatar as great kings and warriors.

16,000 and 9 Lakh Souls

A larger group of souls created approximately 5000 years ago during the Krishna avatar to serve as ministers and attendants. Their inner recording of creation only reaches back 5000

years, which is why some teachings speak of a 5000-year world drama; this applies only to these specific souls.

Almighty Authority (Param Pita Parmatma)

The Ultimate Supreme Source of all creation. Resides in Behad Ki Kala Ka Paramdham. Has, in this unique age, descended to Earth in ordinary human form to initiate the final transformation.

Srujan-Visarjan

Creation and dissolution. Our Multiverse has undergone two complete cycles and is in its third; our Universe has undergone seventeen cycles and is in its eighteenth. No other Multiverse has undergone any such cycle.

Param Prakash

Supreme divine light — the original luminous substance of creation, found in purest form at the highest Paramdham.

Param Tatva

Supreme element — a refined spiritual substance, present in the atmospheres of all Behad Brahmands. In our Multiverse, ordinary tatva (element) has formed instead due to the fall.

Param Mahatatva

The supreme primordial element, the first subtle substance, present in the atmospheres of every Pedhi Brahmand.

Akari

Semi-form. Refers to luminous, subtly shaped manifestations that are neither purely formless nor physically material. Behad Ke Baap, the 108, and the 1008 all reside in akari states.

Nirakari

Formless. The state of pure consciousness without any shape, body, or form.

Avarans

Coverings on the soul. Karmic and elemental layers that dim the soul's original light. Meditation and yoga gradually dissolve these avarans, revealing the soul's true nature and origin.

Sankalp

A pure spiritual intention or divine resolve. The practice is to send one's sankalp not merely to the universe but all the way to Behad Ke Behad Ki Kala Ka Paramdham.

Divya Drishti

Divine inner vision. The spiritual perception through which Bapuji has directly realised and communicated the knowledge of the Pedbis.

Pal

A blink or the smallest unit of subjective time. One pal of a higher creator typically equals 100 years of the creator immediately below.
