About Bapuji

Bapuji (full name: Bapuji Dashrathbhai Patel, also lovingly called “Dadaji” by the younger generation) was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat. However, he spent his childhood in another village named Ambasan, also located in the Mehsana district.

In the early part of his life, he was a highly successful lawyer. Later, he devoted his life to realizing the supreme spiritual truth and bringing this divine knowledge forward for the welfare of humanity. Today, this supreme knowledge serves as a guiding light for true seekers to realize their ultimate destiny. It is a blessing of the highest divinity that the present time is witnessing the rise of this supreme spiritual knowledge, guiding souls on Earth to return to their original source.

Despite being raised in a very poor family and facing challenging circumstances, Bapuji had a deep desire to transform this sorrowful and suffering world into a better place. At the young age of six, he questioned God repeatedly, asking why God remained silent about the suffering of humanity. This intense longing to end human suffering eventually led him to attain the highest level of spirituality later in life.

Even as a child, Bapuji would spend hours alone in the fields, often neglecting his own comfort. Due to poverty, he would walk barefoot without shoes or sandals, frequently getting pricked by thorns. Many times, he would stay late in the fields and, on his way back home, encounter subtle world entities. These experiences sparked his interest in communicating with subtle world souls.

Bapuji was courageous from a young age, which helped him overcome many obstacles. Alongside his studies in

chartered accountancy (CA), he gave tuition classes to support himself financially. Later, he completed his Bachelor of Law (LLB) degree and became a well-known lawyer in Ahmedabad.

In 1997, he established a spiritual institution called “Vishwa Parivartak Ishwariya Vidhyalay” in Chenpur, Ahmedabad, with the mission of transforming this mortal world, filled with suffering and disorder, into an eternal divine world of immortality. Smt. Sushma Tandon, lovingly known as “Maa,” worked alongside Bapuji in this grand divine mission.

To accomplish this mission, Bapuji worked tirelessly, dedicating all his resources to this divine purpose. During that time, he would deliver continuous spiritual discourses for up to 18 hours without rest. In these discourses, he explained the highest dimensions of divine knowledge, which he realized through deep meditation and divine vision in a state of superconsciousness. This knowledge goes beyond the imagination of the ordinary human mind.

Bapuji’s teachings cover a vast range of topics, including the types of celestial creators across different dimensions, the creation of our solar system, galaxy, and universe, and most importantly, the transcendental knowledge of the multiverse and realities beyond it. His knowledge is supremely profound and is intended for highly evolved seekers, referred to as “behad souls.” According to Bapuji, these “behad souls” will play a key role in transforming this mortal world into an eternal divine realm.

At present, Bapuji remains deeply engaged in intense meditation and samadhi for long hours. He does not meet anyone, as he is continuously immersed in his transcendental mission in a superconscious state.

— by Bapuji Dashrathbhai Patel

This book is written for those who say they do not believe in existence of Almighty or God — and it is written with love.

Bapuji does not argue with the one who denies God. He explains, with great patience and great affection, because he knows that the one who denies God has usually only denied his own self first. The person who cannot accept that he is a soul will naturally find it impossible to accept the Supreme Soul.

So there is no quarrel here, and no demand to believe. There is only a quiet invitation: look once at this systematic creation, look once at your own self, and ask honestly who made it. To believe in God is not blind faith. It is the final destination of clear thinking.

Read it slowly. Let the intellect open on its own. Behad ki Param Maha Shanti.

Chapter I

A Word of Love for the One Who Does Not Believe

There is a question that rises in almost every mind: Is there really a God? Is there any proof that God exists? Can the existence of God be proved at all?

Before answering, one thing must be understood with love. Atheist, does not begin by denying God. He begins by denying himself. He does not accept that he is a soul. He believes that when the body ends, he ends, that nothing of him remains. Modern science does not even use the word soul; it says *consciousness*, and holds that this awareness simply switches off at death.

Now, if a person will not accept that he himself is a soul, how will he ever accept a Supreme Soul? When one denies existence of soul (*atma*), then Supreme divine soul (*Paramatma*) has already been placed far away.

This is why these matters are explained here not with anger but with great affection. There is no fight, no debate, no weapon. There is only one honest question worth discussing: who created my soul, and how will my soul finally be saved? On that, every human being should think.

Believe or do not believe — that remains your freedom. But at least look once, with an open intellect, at what is being shown.

Chapter II

Have You Ever Seen God?

The atheist says: “I have not seen God with my eyes, so I do not accept Him.” The same difficulty is raised about the soul.

But consider honestly what these eyes have actually seen. Did your eyes ever see the whole universe? Did they see which galaxy was formed first? The eye cannot see even one kilometre ahead. Its capacity is extremely limited. Claiming that something does not exist simply because it has not been seen by the human eye is a very weak argument.

Electricity is not seen by the eye. Yet hold two live wires and you will know at once whether it exists. Air is not seen, yet no one can deny it. The one who runs this very body is not visible — but he is there, and only because of him is the body moving. So that which is not seen is not therefore non-existent. The argument “invisible, therefore unreal” is simply wrong.

Gita says the same thing in a clear way: what is visible is perishable, and what is not visible is the truth. That is why it tells the soul not to grieve over the seen, but to care for the unseen — to care for the *atma*.

Bapuji Insight

“Jo dikhta hai woh nashwant hai, jo nahi dikhta woh satya hai.”

“What is visible is perishable; what is not visible is the truth.”

Chapter III

God of Every Level

God is not of one level only. There is a different God for every category of creation.

The one who made a solar system is also God — he is the creator of that solar-system (*Brahmand*). The one who made a galaxy (*maha- brahmand*) is the owner of that galaxy; he is *Mahashiv*, God of the galaxy. And there are billions of galaxies, so there is *mahashivs* over billions of galaxies as well. Within a single galaxy there are billions of solar systems. Beyond the galaxy lies the universe, in which countless galaxies are turning, and each galaxy is about one hundred thousand light-years across — some larger, some smaller.

All of this is running with astonishing order. Billions of solar systems revolve within one galaxy. The Sun itself moves through our galaxy at a speed of about two hundred and fifty kilometres in a single second, and everything is held and carried by its gravity. Gravity here means power. That power belongs to controller/ creator seated at the centre-point of the galaxy. Every controller resides at the centre-point and, by his gravity-power, turns everything around him.

When a system this vast is running this systematically, there must be one who runs it. Without a creator, no such ordered world can run by itself.

Chapter IV

Everything is Interconnected

To understand whether God exists, first understand a simple truth: in this world, nothing stands by itself. Everything is interconnected

Did you make yourself? Does a tree grow by itself? Does a mobile phone appear on its own? Ask of any object how it came, and a chain of dependence appears. The phone came from a factory; human beings built the factory; those human beings came from their parents; parents from those before them and so the chain runs back through endless generations. A bulb glows because of electricity; the electricity comes from a power station; the power station runs by machines. A tree depends on seed, water and soil. A house depends on bricks and a labourer. The Earth depends on the Sun and on gravity. Had the Earth been a little nearer the Sun, or a little farther, it could not have run at all. See with how much intelligence it has been arranged.

Because each of these things could have been otherwise — it could have existed or not existed — each one is dependent. This is what is meant by contingency: dependence. And a chain of dependent things cannot stretch back forever without any beginning. If there were no beginning at all, the mobile would never have reached your hand.

So if everything is dependent, there must be one who is not dependent — one who is complete in himself. That one is called *Swayambhu*, the self-existent. He is the first foundation, the first cause, on whom everything rests while he rests on nothing.

Chapter V

God Is Not a Person in the Sky

Most people reject God for one reason: they imagine God to be a person. They picture an old man seated in the sky, or a magician who performs miracles, and decide that this must be God. But God is not a person, not an old man above the clouds.

God is the ultimate cause, the first cause, from whom everything has come and who himself has come from no one. He is self-existent. People ask: if God exists, why does He not simply make an announcement from the sky? Why does Brahma not call out, “I am your creator, listen to Me,” so that eight hundred crore people would be forced to hear?

The answer is that the Creator does not work in the open. He works in the subtle, hidden form. He is *gupt*, *avyakt* — unmanifest. No one can claim to have caught him with these physical eyes.

There is a simple way to see it. The owner of a vast company does not come to the petrol pump to fill petrol himself; his workers, and their workers, carry out the work. In the same way the Supreme does not appear directly in physical form before everyone. Yet his creation, and the creation within that creation, stands before us at every moment.

Chapter VI

Then Who Made God?

The cleverest objection of all is this: “If everything has a creator, then who created God?”

Bapuji firmly answers this, that which was made cannot be God. God is precisely the one who was not made. This is why the scriptures themselves say that whatever is created is also destroyed; God is beyond that.

Now, in this knowledge the definition of God expands. *Shiv*, the creator of a solar system, is called self-existent — yet his creator is *Maha Shiv*, the creator of the galaxy. The creator of *Maha Shiv* is *Param Maha Shiv*, the creator of the universe. And it does not stop there. Place five hundred zeros after Shiv, and still there are creators above creators. There are countless solar systems, galaxies, universes. In the observable universe alone there are about two trillion galaxies — which means two trillion *Mahashiv*. So which one do you worship?

You will naturally turn towards your own father, not the neighbour's. But how can you turn to a forefather you have never seen? This is the very limit of the human being. One cannot search their own soul creator how will they find their grandfather's soul or anybody 'else' Creator. Bapuji assures that God will find you. With which instrument would you go searching? There is no thermometer, no barometer, no machine for it. He will search for you. Your work is only to become worthy, and to turn — with full freedom of choice — toward the one who created you.

Bapuji Insight

“Jo banaya gaya woh Ishwar nahi; Ishwar wahi hai jo banaya nahi gaya.”

“That which was made is not God; God is the one who was never made.”

Chapter VII

Suffering Does Not Mean There Is No God

The atheist points to the pain of the world and asks: if there is a God, why is there so much suffering? When thousands of children die, people cry out, “Why did God not see? Why did He not save them?”

But suffering is not proof that God does not exist. Suffering is proof that this world is not the final truth. We do not know the truth, and so we form such opinion. We are unaware of original, divine form of God and so we keep arguing , when the real matter lies elsewhere.

Understand this clearly: suffering is not the absence of God; suffering is the presence of *karma*. Where a person is seen suffering, who is responsible behind it? His *karma* — not God. And who made that *karma*? The very one who is suffering. No one is willing to take on another's illness or another's *karma*.

God neither perform nor stops individual *karma* from happening. What he always does is give knowledge that shows the path to break the karmic bondage. After that He simply watches. He neither laughs nor weeps, neither claps nor grieves. He gave the knowledge through *sankalp* and finished His part. The rest is left to you.

Bapuji Insight

“Dukh Ishwar ki anupasthiti nahi; dukh karma ki upasthiti hai.”

“Suffering is not the absence of God; suffering is the presence of karma.”

Chapter VIII

First, Know Your Own Self

If you wish to reach the Supreme, the first step is not the Supreme at all. The first step is knowing oneself. You must first realise: who am I?

I am a soul. Until you experience your own soul-consciousness, your *atma swaroop*, you cannot know God. Until you know yourself — *khud* — you cannot know *Khuda*, the Lord. So first know yourself, accept yourself, and experience yourself as a soul.

When you experience yourself as a soul, the realisation of the Supreme Soul follows on its own, automatically. For the soul is the creation of the Supreme Soul; the child naturally finds its source.

This is exactly what the Gita teaches. Forget the body and all its relations, established oneself in the soul-consciousness, and remember , the Supreme. Then, supreme shall destroy all your sins, and in the end Supreme will carry you to the supreme abode.

The knowledge of the Gita is the crown of all scriptures, given by the Almighty Authority Himself.

Bapuji Insight

“Khud ko jano, tabhi Khuda ko janoge.”

“Know your own self; only then will you know the Lord.”

Chapter IX

Qualities of Souls

Souls are not all of one kind. They are of many different qualities, and this is why they respond so differently to the same truth.

Some souls are formed of the ether element; some, like small insects and moths, are formed of the air element. Some are made of *Param Agni*, supreme fire; some of *Param Aakash*, supreme ether; and some of *Param Prakash*, supreme light. The higher the quality of the soul, the more it is drawn to seek the Almighty.

A high-quality, *behad* soul will reflect, will search, will ask who the Great Great- Great Grandfather of all creation is. But a soul of the lowest quality lives like an animal — eat, drink, sleep, earn, and die — with no urge for truth, no longing for the self or the Supreme. The atheist-category soul does not even accept the soul; that is why it cannot rise to such thoughts.

This is not said to insult anyone. It is said so that a soul may recognise where it stands and choose to rise. Even now the gates are open. A soul of small capacity today can, through knowledge and effort, awaken its hidden power and lift itself. The classification is not a wall; it is a call to climb.

Chapter X

What Science Cannot Answer

The scientist says the universe began with the Big Bang — a great explosion of light from which galaxies and solar systems were formed. But examine the word itself. “Bang” means a collision. And a single thing cannot collide; one hand cannot clap. For a collision there must be two things.

So who made those two things? Who caused them to come into being? In whose mind did the thought arise that two galaxies should strike? What was there before the Big Bang? Who made the laws that govern it all? To these questions science has no answer. It has a theory that someone once wrote down, and the whole world is now holding on to it.

There is the other theory too — that life began as a drop in the ocean, became an insect, then slowly, by Darwin's idea of evolution, the human being arose from the animals. But this is wrong. Today's science is itself *nastik*; it does not accept the soul, and where the soul is not accepted, the Supreme Soul is out of the question. Such a science can only speak of the gross, physical world; the subtle and the supreme-subtle lie far beyond it.

Even a single strand of DNA, science cannot yet fully understand. Every human being's DNA is different; no two faces and figures match among all the billions on Earth. What natural marvel arranges this? Who gives energy to the neutron, the proton, the electron? Physics cannot say. We say simply: the one who gives that power is there — and Him we call God.

Chapter XI

Scientists and Their Hidden Helpers

Consider the great scientists — Galileo, Newton, Einstein, Tesla, Ramanujan, Hawking. These were not ordinary souls. They came from far away — from other dimensions, other planets, other universes — and they were not all of one category. One came from a galaxy, another from a universe, another from still higher.

In their souls they already carried advanced knowledge, far beyond what exists here. That is why their work was to find and bring out the new. But here on Earth the atmosphere and the body had changed for them, so the work was difficult, and they would often slip away into deep thought, into solitude, lost in their own minds even while sitting among others.

Behind them worked the inspiration-souls of the subtle realm. These souls strike a inspirational influence upon the mind of the scientist, force a thought into him, compel him to think in a new direction toward a new discovery. Ramanujan received his equations in dreams; the deity of his family, Namagiri, would appear and show him the formulas, and he would write them down on waking — equations that have still not all been decoded. Tesla was certain that other beings existed and that he was in contact with them. Hawking's body was paralysed and only his brain worked; ordinarily such a life does not continue long, yet the subtle-realm beings kept his brain alive and active so that his knowledge could come out.

But here lies the great wound. Most of these scientists — nearly ninety percent — did not accept God. Hawking said openly that there is no such thing as God, that the universe is only light in which an explosion occurred. When such a

towering figure denies God, ordinary people deny Him too. Science gave the world its instruments and comforts, but alongside, it left a heavy negative effect: it spread *nastik-vaad*, atheism, across the Earth.

Chapter XII

How Atheism Spreads

Atheism is not new and it is not accidental. It has been spread deliberately, from very ancient times.

Even long ago there were great sages who spread it — sages who could speak in such a way that the finest of men would turn atheist. Some among them taught, “Borrow if you must, but drink and enjoy yourself,” meaning live for pleasure alone. The source of this lies in the subtle realm. There, the *nastik*-vaad souls are *bhogi* — pleasure-seeking — and what they want is enjoyment.

According to this understanding, some subtle-realm souls influence weak and lower-capacity human minds, making them deny karma and deny God. Such people become focused only on pleasure and temporary enjoyment, saying, “Eat, drink, and enjoy — who has seen tomorrow?” Because of this mindset, they are unable to absorb or understand higher spiritual knowledge. Even though they live in human bodies, their consciousness remains limited, and they continue spreading atheistic thinking on Earth.

In this way, atheist groups or sects have existed in every religion and tradition throughout history. Even highly educated scholars can become atheists. Today, crores of people across different faiths do not believe in God or spiritual laws. In many European countries, for example, churches have become empty as large numbers of former Christians have turned atheist. According to this perspective, such changes are influenced by subtle-realm souls, and therefore it is not considered a great mystery.

Chapter XIII

Law of Karma

A butcher's work, day and night, is to kill animals and to sell their flesh. Does such work create *vikarma*, sin? It does. Every soul that commits violence against any creature-cow, buffalo, goat, fowl, any being-falls into the bondage of *karma*. No one is spared.

Is it truly necessary to fill the stomach by becoming a butcher? One can do honest labour instead and fill the stomach without sin. To kill a hundred lives by day and then remember God by evening-how can that be accepted? *Ahimsa paramo dharma*: non-violence is the highest *dharma*. The practice of animal sacrifice, *bali pratha*, is something Bapuji firmly opposes.

There is a simple test for eating flesh. You do not offer non-vegetarian food to the deities you worship. If you cannot offer it to God, how can you eat it yourself? Eat the grain that God has made.

Karma does not give results immediately. Actions from many births accumulate as *sanchit karma* and return at the proper time. This is why some wicked or *asur-like* people may seem happy and successful for a while — their past merit is still supporting them. But when that merit ends, the consequences of their actions appear. Seeing this, many good people lose faith and question God. Yet one should never leave the path of goodness. Everyone faces the results of karma eventually. Still, there is hope: even a demon-like soul can change, gain knowledge, realise the self, and connect with the Almighty for guidance and shelter.

Bapuji Insight

“Ahimsa paramo dharma.”

“Non-violence is the highest dharma.”

Chapter XIV

Realms Above Earth

The idea of heaven and hell is accepted in every faith. But where is heaven? It is not on this Earth. Some teachers fool people by saying heaven and hell are here on Earth among human beings. Heaven lies above, in the third realm.

According to this spiritual view, above Earth are higher realms called Bhuloka, Bhuvarka, and Swargaloka (heaven). The deities of heaven are believed to have subtle bodies made of ether, air, and fire, while humans have bodies made of five elements, which is why Earth is called the mortal world (mrityu lok).

The deities of heaven are described as enjoyers (bhogi), not seekers of higher spiritual knowledge (yogi). Because they remain attached to pleasure, their spiritual power slowly decreases, and after their merit ends, they are born again as humans. Even heavenly beings are not permanent.

Above these realms are Vaikunth, Vishnupuri, and finally Paramdham or Shivruri — the incorporeal, deathless realm. Therefore, the soul's true goal is not only to reach heaven, but to realise its highest spiritual nature and unite with the supreme eternal state.

Chapter XV

Comic time and its Impact

According to Behad Gyan, the soul has been moving through the four ages — *Satyug, Treta, Dwapar and Kalyug* — for countless births. Most souls remain trapped in this cycle because they forget their true spiritual nature. Above the Earth are many higher realms such as Swargaloka, Maharloka, Vishnupuri, Shivpuri, and finally Paramdham, the supreme incorporeal realm. The soul can rise to these higher states through spiritual knowledge, soul-consciousness, and connection with the Almighty power.

Behad Gyan explains that ancient seekers tried to reach liberation through meditation, kundalini awakening, and tapasya, but many paths remained incomplete. Over time, as souls became more body-conscious and materialistic, atheism increased. People stopped believing in karma, higher worlds, and the existence of the soul because their spiritual power declined and they became trapped only in physical pleasures and worldly thinking.

According to this understanding, atheism spreads when souls lose connection with higher knowledge and forget their divine origin. The true way out is to realise the self as a soul, purify karma, connect with the Supreme Power, and rise again toward the eternal source, Paramdham.

According to Bapuji's spiritual experiences in the formless state, souls are not limited only to Earth but travel through galaxies, universes, and even the multiverse in subtle spiritual vehicles. These are not physical machines, but vehicles of Param Prakash (supreme light) created through sankalp — pure spiritual resolve. Behad Gyan teaches that the soul's return journey begins with true knowledge. First, one must realise the self as a soul, free oneself from the

bondage of karma, and connect with the Almighty Power-house to receive spiritual strength. As the soul again becomes pure and *sato pradhan*, it gradually rises back toward its original eternal source, Paramdham.

Chapter XVI

Why God Must Now Intervene

A question arises: why does Shiv, or *Maha Shiv*, or *Param Maha Shiv* not simply turn this mortal world into a deathless one at once, and end the whole cycle of births and deaths?

The reason is that none of them now has enough soul power left to build a fresh world of *Param Tatva*. As a *Brahmand* runs, the power of Shiv himself slowly diminishes, for the entire *Brahmand* runs upon his formless power. The same falling has happened at the level of the galaxy and the universe. When a creation fell, its keeper could have drawn it back early, before it sank into the mortal condition — but it was allowed to fall, and so the mortal world formed.

According to this understanding, the Almighty Himself has now taken responsibility for transforming creation. From the highest Paramdham, He saw that the world had become spiritually dark and deeply trapped in the mortal condition. Therefore, He entered this Brahmand in a hidden way. He is said to work through the formless state, through subtle aakari forms across the multiverse, and even through physical forms that ordinary people cannot recognise.

The purpose is not to destroy the world, but to transform it. Behad Gyan teaches that there will not be complete destruction or a Third World War, because the divine plan is based on transformation, purification, and awakening. This change is believed to affect not only Earth, but the entire Brahmand and the wider multiverse.

For this, the souls of Infinite were created. Many of them are now in human form; some work in *physical body* some in *light body* from higher realms. Through them the hidden work is being carried out, and the change will surely come. But the Almighty's wish alone cannot accomplish it. The

behad souls (limitless-infinite soul) themselves must do the *purusharth* — the effort of becoming established in the soul-consciousness. Through YouTube, *behad* souls are being sought out from all over the world; as each comes into connection and dives again and again into the ocean of knowledge, the first subject, knowledge, is completed, the Almighty Authority is known, the connection of *Yog* is made, power enters the soul, and self-transformation begins. The gates are open to all souls

Chapter XVII

Path Home — Knowledge and Yog

Whoever wishes to return must begin with knowledge. Knowledge is the first subject. To become a doctor or an engineer, a person studies for half a lifetime; the worldly degree, however, will not travel to the next birth. So learn instead the *spiritual* study, the supreme learning, which does serve the soul beyond death.

First know the self as a soul. Then know the Almighty Authority — He is the Great-Great-Great Grandfather of every soul, dwelling in the *behad ki kala ka Paramdham*, the supreme abode of infinite power, whose incarnations are Shri Ram and Shri Krishna. Do not worship only the form; reach for the original source, the supreme light from which all has come. Connect to Him through the intellect, through *buddhi Yog*, and draw power directly.

When that power enters, the soul that had become *tamo pradhan* (negative) slowly turns *sato Pradhan* (positive) again. The supreme light awakens within, ignorance is dissolved, and self-transformation begins — and from self-transformation comes world-transformation. The whole creation. multiverse, will be made new.

So know self and connect. Almighty does His work in His own time, and He gives shelter to every soul that turns to Him. As much love as you give, the universe returns to you; whatever you ask with capacity, you receive. Therefore become an ocean of infinite love.

Akash Tattva — Ether element

Akash — Ether; the subtlest of the five gross elements. Souls of certain categories are composed of ordinary Akash.

Janlok — One of the higher celestial realms in the fourteen-tier universal structure.

At the time of Mahakaal Pralaya, even souls in Maharloka are pushed upward by the force of dissolution.

Manvantar — A great cosmic era. A Manvantar is a vast unit of cosmic time. One Manvantar contains 71 smaller time cycles. In each Manvantar, seven Brahm Rishis descend from seven other solar systems to transmit knowledge. fourteen manvantars make one kalp.
