About Bapuji

Bapuji (full name: Bapuji Dashrathbhai Patel, lovingly called “Dadaji” by the younger generation) was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat. He spent his childhood in the village of Ambasan, also in the Mehsana district.

In the early part of his life, he was a highly successful lawyer. Later, he devoted his life to realising the supreme spiritual truth and bringing this divine knowledge forward for the welfare of humanity. Today, this supreme knowledge serves as a guiding light for true seekers to realise their ultimate destiny.

Despite being raised in a very poor family and facing challenging circumstances, Bapuji had a deep desire to transform this sorrowful and suffering world into a better place. At the young age of six, he questioned God repeatedly, asking why God remained silent about the suffering of humanity. This intense longing to end human suffering eventually led him to attain the highest level of spirituality later in life.

Even as a child, Bapuji would spend hours alone in the fields. Due to poverty, he walked barefoot, frequently getting pricked by thorns. On his way back home in the evenings, he would sometimes encounter subtle world entities — experiences that sparked his lifelong interest in communicating with souls of the subtle world.

Bapuji was courageous from a young age. Alongside his studies in chartered accountancy, he gave tuition classes to support himself financially. He later completed his Bachelor of Law degree and became a well-known lawyer in Ahmedabad.

In 1997, he established the spiritual institution Vishwa Parivartak Ishwariya Vidhyalay in Chenpur, Ahmedabad, with the mission of transforming this mortal world into an eternal divine realm. Smt. Sushma Tandon, lovingly known as “Maa,” worked alongside Bapuji in this grand divine mission.

To accomplish this mission, Bapuji worked tirelessly, delivering continuous spiritual discourses for up to eighteen hours without rest. In these discourses, he explained the highest dimensions of divine knowledge, realised through deep meditation and divine vision in a state of superconsciousness — knowledge that goes beyond the imagination of the ordinary human mind.

Bapuji’s teachings cover a vast range of topics: the types of celestial creators across different dimensions, the creation of our solar system, galaxy, and universe, and, most importantly, the transcendental knowledge of the multiverse and the realities beyond it. His knowledge is intended for highly evolved seekers, referred to as “*behad* souls,” who will play a key role in transforming this mortal world into an eternal divine realm.

At present, Bapuji remains deeply engaged in intense meditation and samadhi for long hours. He does not meet anyone, as he is continuously immersed in his transcendental mission in a superconscious state.

“Gyan Daan Maha Daan” (*Sharing Knowledge is the highest Charity — share to the maximum extent with all.*)

— Bapuji Dashrathbhai Patel

In today’s world, the word quantum often feels complex, technical and distant from everyday understanding. Yet, when explored deeply, it reveals something profound — that reality is not as solid or fixed as it appears.

This book presents the concept of Quantum Entanglement in a simple and spiritually aligned way, based on the deep explanations shared by Smt. Sakshi Patel. It bridges modern scientific understanding with timeless spiritual wisdom.

This is not just a book to read — it is a perspective shift.

It helps the reader to understand that everything in existence is connected at a deeper level — beyond space, beyond time and beyond physical limitation.

Overview

This book explores:

- What Is The Quantum World
- Difference Between *Sthool Jagat* (Physical Plane) And *Sukshm Jagat* (Subtle Plane)
- Understanding Quantum Entanglement
- Role Of Observation And Consciousness
- Connection Between *Atma* (Soul) And The Source
- Power Of Thought (*Sankalpa*)
- Meditation And Higher Connection

PART ONE

Foundations of Quantum Reality

· ★ ·

Chapter I

Understanding Quantum — The Subtle World

The word quantum refers to the subtle of the subtle — the most refined level of existence, where reality is no longer physical. It becomes energetic and probabilistic.

Everything in the physical world is made of atoms. But beyond atoms lies a deeper level — the subtle dimension, invisible world known in Sanskrit as *sukshm jagat*. This subtle realm operates according to entirely different principles than the world we perceive with our senses. As things become subtler, they behave differently.

In this subtle world:

- Particles behave like wave functions
- Time, space and energy behave differently
- They do not have fixed positions
- They exist in multiple possibilities at once

Thus, the quantum world refers to extremely subtle forces that operate the universe.

Yatha Brahmande Tatha Pinde

As is the universe, so is the Body.

“Yatha Brahmande Tatha Pinde” – whatever exists in the universe also exists within the body.

This idea is explained at the **energy level**. Science also studies reality at the level of energy. Everything in the physical world (gross world) is made of matter, and matter is made of atoms. Atoms are made of smaller components such as electrons, neutrons, protons, photons, etc. Quantum science studies the **smallest possible units**, the extremely

subtle particles and their behavior. Inside an atom, there is a nucleus at the center, and electrons revolve around it.

Smt Sakshi Patel compares this to spiritual teachings where it is said that the **entire universe also has a central creator or center point**, similar to the nucleus inside an atom.

Quantum theory has been studied for about 100 years. In 2022, the Nobel Prize in Physics was awarded to Alain Aspect, John Clauser, and Anton Zeilinger for their pioneering experiments on quantum entanglement. Research on quantum theory has been ongoing since around 1930. Scientists tried to understand how quantum phenomena work through experiments.

Albert Einstein proposed many theories and experiments that contributed significantly to modern science. However, not all of his conclusions are necessarily final truth. Quantum theory was one such concept where final conclusions were difficult to reach, and other scientists continued research afterward. In 1999, Time Magazine selected Albert Einstein as the “Person of the Century” because of his impact on science. Even after Einstein’s death, questions about quantum theory continued. Quantum refers to extremely small levels of existence beyond ordinary perception. Scientists tried to understand the atomic level — electrons, protons, and neutrons — and realized that the microscopic world is beyond our intuitive understanding.

According to spiritual knowledge, Bapuji explained that through divine vision he has perceived higher worlds. Science still does not have evidence of such worlds, because science relies on proof. Obtaining proof of the infinite subtle realm is difficult because it requires merging with the nature of that realm. There are infinite possibilities in that world, and any probability can emerge at any time.

Chapter II

Physical vs Subtle Reality

The physical world (*sthool jagat*) operates on certainty. The subtle world (*sukshm jagat*) operates on infinite possibilities.

In the physical world, things are predictable, measurable, and limited. In the subtle world, nothing is fixed. Everything is dynamic, and infinite possibilities exist simultaneously.

Chapter III

Wave Function & Possibilities

In the quantum world, particles exist in a wave function — meaning they exist in many states at the same time. They are not fixed until something happens.

◆ **Observation**

It is the act of observation that collapses the wave function — bringing one possibility into existence from among the infinite.

Chapter IV

Power of Observation

· ★ ·

In Quantum world Observation is not passive. It is creative. When something is observed, infinite possibilities collapse and one reality is formed.

◆ *This means consciousness shapes reality.*

“Jaisi drishti, waisi srishti.”

As is your vision, so is your creation.

We are constantly creating our world through awareness. Every moment of consciousness is an act of creation.

Chapter V

Classical Physics vs Quantum Physics

In classical physics, events follow predictable mathematical laws.

For example, when a ball is thrown, its speed and motion can be calculated. But in the quantum world, events behave very differently. Certainty disappears. Instead of certainty, there are probabilities. For example, when flipping a coin in the physical world, there are two possible outcomes: head or tail. But at the quantum level, particles behave in ways that cannot be predicted with certainty. Their state keeps fluctuating. Scientists call this behavior the wave function. Einstein studied light and initially described it as a wave. Later, through the photoelectric effect, he discovered that light behaves both as a wave and as a particle.

This describes the nature (*guna*) of light. Similarly, the soul also has a nature described as infinite, peaceful (*Paramshanti*), and blissful.

PART TWO

Quantum Entanglement & Connection

· ★ ·

Chapter VI

Quantum Entanglement

Quantum Entanglement describes a deep, non-local connection. Two particles that have once interacted remain connected forever — regardless of the distance between them.

If one particle changes, the other responds instantly. This connection exists because of a shared origin — what may be called the ***mool srot***, the primordial source.

This principle — deeply studied in modern physics — mirrors ancient spiritual understanding. The bond is not physical. It is rooted in *origin*.

Speaker shares an example of quantum entanglement to emotional connection between mother and child. Often, mothers feel when their child is in distress. Biologically, mother and child share DNA and therefore share qualities. This example is used to explain connection between two entities.

Chapter VII

Conditions of Entanglement

Entanglement exists when certain conditions are met:

- There is a shared origin
- There was interaction
- A subtle connection remains

This applies not only to subatomic particles, but also to souls (*atma*), to consciousness, and to the relationship between creation and the Creator.

Chapter VIII

Spiritual Meaning of Entanglement

The connection between *atma* and the Creator already exists. It is not created — it is *realised*.

This connection becomes active — consciously accessible — when:

- Awareness increases
- Attachment decreases
- Consciousness aligns with the source

PART THREE

Consciousness, Meditation & Creation

· ★ ·

Chapter IX

Role of Meditation

Meditation allows conscious disconnection from the *sthool jagat* and entry into the *sukshm jagat*, the subtle world.

When one stabilises in *atma swaroop* — the soul-conscious state — inner clarity increases and the subtle connection activates.

Chapter X

Thought & Creation

In higher dimensions, reality is created through sankalpa — thought-based intention. Thought is not merely mental activity; it is creative energy.

◆ *When thought aligns with higher truth, it becomes reality.*

Chapter XI

Limits of Science

Science works through measurement, proof, and instruments. These tools are extraordinarily powerful — yet they can only reach so far.

The subtle world requires something different: *anubhav* — lived experience, inner knowing.

“Yeh samajh ke paar hai.”

This is beyond ordinary understanding.

PART FOUR

Soul Journey & Higher Dimensions

· ★ ·

Chapter XII

Memory & Soul Connection

The soul (*atma*) carries deep memory through its subtle bodies — the *karan sharir* (causal body, related to solar system), *mahakaran sharir* (higher causal body, related to Galaxy) and *param mahakaran sharir* (related to Universe).

Bapuji Dashrathbhai Patel have explained about different causal bodies in very many videos earlier.

Even when forgotten at the surface level of consciousness, the connection with the source remains. The thread is never cut — it is merely waiting to be recognised. Two particles can remain connected even if they are separated by large distances (even light years).

Chapter XIII

Higher Dimensions

According to Bapuji's explanation, when the soul awakens its subtle bodies (causal body and higher causal body), it reconnects with higher dimensions. Just as two particles remain connected after interaction, the soul also remains connected with higher realms even after descending into the physical world.

Higher dimensions influence the lower ones. The subtle realm does not merely mirror the physical — it shapes it. Spiritual teachings suggest that souls from higher realms may influence physical beings through subtle connections.

This invisible connection can be compared metaphorically to entanglement. Without a subtle connection, no soul from higher realms can influence a person. Connections may exist with positive or negative influences. This is **why inner transformation** carries the power to change outer reality. When the deeper layers shift, the surface follows.

Chapter XIV

True Manifestation

Manifestation is not about accumulating material gain. It is about alignment with the source.

When the deeper layers of consciousness activate:

- Power increases
- Awareness expands
- Reality shifts

True manifestation is the natural outcome of inner alignment — not the result of technique or desire alone.

Chapter XV

Final Understanding

Quantum Entanglement, at its deepest level, is not merely a scientific phenomenon.

- ◆ *Connection*
- ◆ *Consciousness*
- ◆ *Creation*
- ◆ *Reality*

Everything is interconnected at the deepest level.

The bond between particle and particle, between soul and source — it has never been broken. It simply waits to be rediscovered.

Smt Sakshi Patel Insights

INSIGHT 01

♦ *“Quantum world samajhne ka matlab sirf science ko samajhna nahi hai; yeh samajhna hai ki reality fixed nahi hai, balki har pal consciousness ke through create ho rahi hai.”*

Understanding the quantum world is not merely understanding science; it is understanding that reality is not fixed, but is being created every moment through consciousness.

INSIGHT 02

♦ *“Jab tak hum apne aap ko sirf sthool sharir samajhte hain, tab tak hum limited reality me jeete hain; jaise hi hum sukshma star par jaate hain, possibilities infinite ho jaati hain. Observation sirf dekhna nahi hai; observation ek creative kriya hai, jo decide karti hai ki kaunsi possibility reality banegi.”*

As long as we consider ourselves only the physical body, we live in a limited reality; the moment we move to the subtle level, possibilities become infinite. Observation is not merely seeing; observation is a creative act that decides which possibility becomes reality.

INSIGHT 03

♦ *“Quantum entanglement yeh batata hai ki connection distance se nahi toot ta; asli connection origin se hota hai.”*

Quantum entanglement teaches us that connection is not broken by distance; the true connection is with the origin.

INSIGHT 04

♦ *“Jis tarah particles ek baar judne ke baad hamesha connected rehte hain, usi tarah atma ka sambandh apne source se kabhi toot ta nahi hai.”*

Just as particles remain forever connected once they have interacted, in the same way the soul's bond with its source is never broken.

INSIGHT 05

♦ *“Jab hum sthool jagat se detach hote hain aur atma swaroop me aate hain, tab hi asli connection activate hota hai.”*

Only when we detach from the physical world and come into the soul-conscious state does the true connection become active.

INSIGHT 06

♦ *“Manifestation ka matlab bahar kuch paana nahi hai; manifestation ka matlab hai apne aap ko source ke saath align karna.”*

Manifestation does not mean attaining something outside; manifestation means aligning oneself with the source.

INSIGHT 07

♦ *“Uchch star par creation sankalp se hoti hai; jaisa sankalp, waisi srishti.”*

At higher levels, creation happens through sankalpa (intention); as is the intention, so is the creation.

INSIGHT 08

♦ *“Science sirf wahin tak ja sakta hai jahan tak measurement possible hai; lekin sukshma jagat ko samajhne ke liye anubhav zaroori hai.”*

Science can reach only as far as measurement is possible; but to understand the subtle world, direct experience (anubhav) is essential.

INSIGHT 09

♦ *“Har atma apne andar ek gehra connection lekar chalti hai; chahe yaad ho ya na ho, yeh connection kabhi samapt nahi hota.”*

Every soul carries within itself a deep connection; whether remembered or not, this connection never ends.

INSIGHT 10

♦ *“Jab consciousness uchch hoti hai, tab soch sirf soch nahi rehti — woh creation ban jaati hai.”*

When consciousness becomes elevated, thought is no longer merely thought — it becomes creation.

INSIGHT 11

♦ *“Quantum reality hume yeh sikhati hai ki hum sirf observer nahi hain, hum creator bhi hain.”*

Quantum reality teaches us that we are not merely observers — we are also creators.

Glossary

Quantum — The most subtle level of existence

Quantum Entanglement — A deep connection beyond space and time

Sukshm Jagat — The subtle, invisible world

Sthool Jagat — The physical, material world

Atma — The soul

Atma Swaroop — The soul-conscious state

Sankalpa — Thought-based intention; creative will

Karan Sharir — The causal body

Mahakaran Sharir — The higher causal body

Wave Function — A quantum state of multiple simultaneous possibilities

Observation — The act of turning possibility into a single reality

Mool Srot — The primordial source; origin

Anubhav — Direct experiential knowledge

Yatha Brahmande Tatha Pinde — As is the universe, so is the atom

Quantum Entanglement · Bapuji Dashrathbhai Patel

“Gyan Daan Maha Daan”

Sharing Knowledge is the Highest Charity

— Bapuji Dashrathbhai Patel

Is Everything In Existence Truly Separate... Or Deeply Connected Beyond Space And Time?

This book explores the deeper reality behind Quantum Entanglement - a connection that exists beyond distance, beyond time, and beyond physical limitation. Bridging modern science with spiritual understanding, it reveals how consciousness, observation, and thought influence reality itself. More than a concept, it is a shift in perception - from separation to connection, from observation to creation.
