About Bapuji

Bapuji (full name: Bapuji Dashrathbhai Patel, also lovingly called “Dadaji” by the younger generation) was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat. However, he spent his childhood in another village named Ambasan, also located in the Mehsana district.

In the early part of his life, he was a highly successful lawyer. Later, he devoted his life to realizing the supreme spiritual truth and bringing this divine knowledge forward for the welfare of humanity. Today, this supreme knowledge serves as a guiding light for true seekers to realize their ultimate destiny. It is a blessing of the highest divinity that the present time is witnessing the rise of this supreme spiritual knowledge, guiding souls on Earth to return to their original source.

Despite being raised in a very poor family and facing challenging circumstances, Bapuji had a deep desire to transform this sorrowful and suffering world into a better place. At the young age of six, he questioned God repeatedly, asking why God remained silent about the suffering of humanity. This intense longing to end human suffering eventually led him to attain the highest level of spirituality later in life.

Even as a child, Bapuji would spend hours alone in the fields, often neglecting his own comfort. Due to poverty, he would walk barefoot without shoes or sandals, frequently getting pricked by thorns. Many times, he would stay late in the fields and, on his way back home, encounter subtle world entities. These experiences sparked his interest in communicating with subtle world souls.

Bapuji was courageous from a young age, which helped him overcome many obstacles. Alongside his studies in

chartered accountancy (CA), he gave tuition classes to support himself financially. Later, he completed his Bachelor of Law (LLB) degree and became a well-known lawyer in Ahmedabad.

In 1997, he established a spiritual institution called “Vishwa Parivartak Ishwariya Vidhyalay” in Chenpur, Ahmedabad, with the mission of transforming this mortal world, filled with suffering and disorder, into an eternal divine world of immortality. Smt. Sushma Tandon, lovingly known as “Maa,” worked alongside Bapuji in this grand divine mission.

To accomplish this mission, Bapuji worked tirelessly, dedicating all his resources to this divine purpose. During that time, he would deliver continuous spiritual discourses for up to 18 hours without rest. In these discourses, he explained the highest dimensions of divine knowledge, which he realized through deep meditation and divine vision in a state of superconsciousness. This knowledge goes beyond the imagination of the ordinary human mind.

Bapuji’s teachings cover a vast range of topics, including the types of celestial creators across different dimensions, the creation of our solar system, galaxy, and universe, and most importantly, the transcendental knowledge of the multiverse and realities beyond it. His knowledge is supremely profound and is intended for highly evolved seekers, referred to as “behad souls.” According to Bapuji, these “behad souls” will play a key role in transforming this mortal world into an eternal divine realm.

At present, Bapuji remains deeply engaged in intense meditation and samadhi for long hours. He does not meet anyone, as he is continuously immersed in his transcendental mission in a superconscious state.

Preface

“Gyan Daan Maha Daan”

(Sharing Knowledge is the highest charity — share to the maximum extent with all.)

— Bapuji Dashrathbhai Patel

This book contains no invention, no addition, no interpretation. Every word you are about to read was spoken — as it came, in the living moment — by Bapuji Dashrathbhai Patel at Paramshanti Bhawan, Ahmedabad. These are the words of direct experience, not of scholarship.

For thousands of years, humanity has spoken of karma. Philosophers have debated it. Saints have sung of it. Scriptures have pointed toward it. Yet the full secret of karma’s cosmic motion — how it is recorded across every Universe, every Galaxy, every Bramand; how it travels with the soul across infinite lifetimes and infinite realms; and how it can, at last, be completely erased — has never been laid out in its totality. Until now.

What you hold in your hands is not merely a book about karma. It is a map of the soul’s entire journey — from its origin in the highest realms of light, through its descent into the Multiverse, through countless lives and cosmic cycles, and back to its ultimate home. It is the knowledge of “Behad” (बेहद, pronounced: “bay-hud”): Meaning = The Unlimited.

Bapuji teaches that the soul carries its record everywhere — inscribed not just in one Physical body, but in the Kaaran Sharir, the Maha Kaaran Sharir, the Param Maha Kaaran Sharir, and beyond. That record is held not just within the soul’s own bodies, but in the Akashic fields of every Universe the soul has ever inhabited, in the five elements of

every world it has ever touched. There is no escape from this record — except one. That one exception is the subject of this book Power of Meditation (Yog-Bal). The power of direct Union with the Almighty known as “Behad Parmapita” who is only source of supreme divine light “Paramprakash”, powerful enough to dissolve the record in causal body what has accumulated across eternity during the journey of soul.

Bapuji does not ask you to take this on faith. He asks you to know it — through knowledge (Gyan), deep knowledge that opens Third Eye, that transforms understanding into direct experience Knowledge is not the obstacle to divine union. It is the very door.

According to Bapuji’s teaching, humanity now stands at a spiritually significant moment in the great cosmic cycle. The cycle of Complete Cosmic Dissolution (“Mahakaal Pralay”) is described as a vast unfolding within this multiverse, of which our solar system is only a minuscule part. The path of karmic dissolution through meditation (Yog-Bal) is, as Bapuji teaches, open in this very lifetime, on this Earth plane. Those who understand what is shared here and who walk this path — through knowledge, meditation and selfless service (“Gyan, Yog and Seva”) — find their way to inner peace and liberation.

Read these pages slowly. Return to them. Let them dissolve into you as Supreme Divine Light “Paramprakash” dissolves karma. This is not information. It is Liberation.

Chapter I

Hidden Law

Why the Secret of Karma's Motion Must Be Known

Paramshanti. Today I shall reveal the profound secret of Karma's hidden motion of deep and subtle movement of karma " Karmo ki Guhya Gati". Without knowing this, one cannot comprehend how Solar-system, Galaxy, Universe, Great-Universe, Great-Great Universe, Multiverse truly operate.

Today's human being acknowledges karma only at its surface. In Bharat, those following Sanatan Dharma accepts karma. Yet Christianity, Islamic, Buddhist, etc and those of other faiths do not — they do not accept the cycle of rebirth, the wheel of birth and death.

Even among those who call themselves Sanatan, fails to understand deeper truth(Ati Guhya, extremely deep), the most secret dimension of karma's motion. And it must be known.

Akashic Records are described in spiritual traditions as a universal field of knowledge where every thought, action, emotion and events of every souls is recorded. According to many spiritual teachers, the entire cosmos operates within an intelligent field of consciousness that preserves the history of all creation. This concept suggests that nothing in existence is ever truly lost; instead, every experience becomes part of an eternal record maintained at the highest level of reality.

The idea of Akashic Records are often connected with the Supreme Formless Creator ("Nirakar Parmeshwar"), the Almighty Authority who governs infinite creations. Just as modern technology stores information in digital clouds,

spiritual science suggests that the universe itself functions like a vast storage system where every movement in creation are continuously recorded.

Chapter II

The Cosmic Structure of Record

From Earth to the Great-Great Universe — Nothing Is Forgotten

· ★ ·

Within our existing bodies — Gross Physical body ('Sthool Sharir'), the Subtle body ("Sukshma Sharir") and Causal body("Kaaran Sharir")— everything are inscribed. wherever soul has travelled or done any action anywhere in this creation , in all fourteen realms, every movement and act are recorded in respective Causal body("Kaaran Sharir").

The soul (atma) is described in advanced spiritual philosophy as traveling across vast cosmic levels such as the Galaxy (Milky Way / Akash Ganga / "Maha Bramand"), Universe ("Param Maha Bramand"), and even beyond into higher multiversal structures. As the soul journeys through these immense fields of existence, its karmic impressions, experiences, and vibrational memories are preserved in increasingly subtle causal bodies known as Kaaran Sharir layers. When soul travels within Galaxy, the karmic record related to galactic experiences is stored in the "Maha Kaaran Sharir." When the soul descends from the Universe into the Galaxy and Solar System, deeper universal karmic impressions are inscribed in the Param Maha Kaaran Sharir. These causal layers act as spiritual archives that maintain continuity of consciousness across cosmic evolution, indicating that the soul's journey is not limited to Earth but spans multiple dimensions of existence.

Beyond the universal level, even more subtle bodies are described: "Param-Param Maha Kaaran Sharir," connected with the Great Universe, and "Param-Param-Param Maha Kaaran Sharir," associated with the Great-Great Universe or multiversal scale. These layers represent extremely ancient

karmic memory fields, suggesting that the soul carries impressions accumulated across immense cosmic cycles beyond ordinary human perception of time and creation. This hierarchical structure illustrates that spiritual evolution involves purification of karmic records across progressively subtler bodies, ultimately guiding the soul toward liberation (moksha). In this understanding, realization of Paramshanti (supreme peace) is associated with transcending these layered karmic imprints and returning to the soul's original state of pure, eternal consciousness.

Each level of soul-journey leaves its permanent imprint.

Akashic Records and Consciousness

According to spiritual teachings, consciousness plays a key role in accessing deeper layers of universal knowledge. Every soul possesses the potential to expand awareness through meditation, self-realization and connection with the Supreme Almighty Authority/ Supreme Creator/ Behad ke Parampita. As consciousness becomes more refined and purified, the soul may become capable of perceiving subtle truths about existence. Ancient sages/rishis are often described as individuals who had developed highly elevated states of awareness. Through meditation and spiritual discipline, they were -believed to gain insight into hidden aspects of the universe and share this wisdom for the benefit of humanity. Spiritual texts often mention that higher consciousness enables perception beyond ordinary sensory limits. This expanded awareness is sometimes referred to as the awakening of the “third eye,” symbolizing intuitive knowledge and deeper perception of reality.

Chapter III

Understanding Akashic Records and Soul Journey

How Karma Is Recorded Across the Entire Cosmos

· ★ ·

Image: AI-generated (GPT Image 2.0) · Artistic interpretation only — actual reality may differ.

Wherever a soul originates, when it performs karma, its vibration leaks outward. That vibration travels through every layer of existence. The vibrational record persists. Every thought and action produces subtle vibrations that become part of the universal record. These impressions influence the karmic journey of the soul across lifetimes. The Akashic field is therefore viewed as a cosmic memory system that preserves the experiences of all beings.

This information exists not only in the vast cosmos but also within every particle of existence. Elements such as space, air, water and energy is considered carriers of subtle information. In this view, the entire universe functions as a living archive of consciousness.

These imprints rest not only within the causal bodies at every level, but also in the Akashic records of every creation. Some souls are believed to originate from higher galaxies or universes. These souls:

- Possess multiple layers of subtle existence
- Maintain connections with parallel forms or aspects
- Influence and are influenced by records across different dimensions

Even if such a soul becomes entangled in karmic cycles—taking birth as a human, falling into lower states, or rising again—its celestial records remain linked to its highest origin. Celestial records can exist at many scales: Solar system, Galaxy, Universe, Great universe, Great-great universe, Multiverse.

A soul that originates from the multiverse will have its actions recorded up to the level of its connection. To perceive such records, the soul must be powerful. Ordinary practices like calling spirits into a human body and asking questions involve only simple, lower-level souls. But souls from parallel universes may have multiple forms — five, seven or even ten forms existing simultaneously in different realms — and their subtle records are extremely refined and interconnected.

Soul Power and Accessing Celestial Records

The reach of a soul's record depends on the origin and power of the soul. A soul connected only to earthly cycles may have records limited to lower cosmic levels, while highly evolved souls—originating from distant galaxies or higher universes—have records extending far beyond. Some souls come from very distant places — from other galaxies, other universes, the great universe, or even the great-great universe.

For example, certain souls — such as those described in past-life regression literature — are said to have celestial records extending up to the great-great universe because their connection exists at that level.

Not every soul can access these records. The ability depends on spiritual capacity or Soul Power (“kala”). Ordinary souls can perceive only limited aspects. Higher souls may access deeper karmic layers. Extremely evolved beings can view records across vast cosmic scales.

Thus, celestial records are not simply a mystical “sky archive,” but a structured system tied to the soul’s level of consciousness.

A soul with 20 “kala” soul power can access records up to that level. A soul with higher capacity can access broader cosmic records. In a multiverse context, a soul with 100 “kala” soul power could access records of any soul across the multiverse.

Chapter IV

Scientific Perspectives and Universal Field

Spirituality is beyond science

· ★ ·

Some modern thinkers attempt to relate the concept of Akashic Records to scientific ideas such as electromagnetic fields, quantum waves and information theory. According to these interpretations, the universe may function as an interconnected network where information is stored in subtle vibrational patterns. Just as cloud computing allows data to be stored invisibly and accessed remotely, the cosmic field is believed to contain information that may be accessed through heightened states of consciousness. Some theories suggest that the human brain may act as a receiver capable of interacting with subtle frequencies present throughout the universe. Although scientific validation remains limited, the idea of a universal information field continues to inspire research into consciousness, quantum physics, and the nature of reality.

This information travel through subtle energetic fields similar to electromagnetic waves or quantum fields. Every thought and action produces vibrations that are recorded within the cosmic structure of existence.

These records are not limited to Earth but exist throughout multiple layers of reality including:

- Physical dimension
- Subtle dimension
- Causal dimension
- Galactic dimension
- Universal dimension

- Multiversal dimension

Electromagnetic Waves, Cosmic Memory, and Universal Records

Light is understood in science as electromagnetic waves that travel across space, carrying energy and information. Just as television signals travel invisibly through the air yet contain images, sound and data, similarly light waves also carry subtle information about the universe.

When we observe a star, galaxy, or cosmic object, we are actually receiving electromagnetic signals that have travelled vast distances, carrying records of events that happened long ago.

These electromagnetic waves do not only carry physical information, but also subtle memory vibrations of the universe. Just as television waves contain programs, images, and sound encoded within them, the waves of the cosmos are believed to contain records of universal events. When a person observes stars, the sun, or galaxies, they are not only seeing light but also receiving a form of cosmic memory that has travelled through space. This suggests that the universe continuously records its own history through subtle energetic transmissions.

From a higher spiritual viewpoint, the records of one universe are said to be transmitted towards higher centers of cosmic intelligence. These records are believed to reach a supreme center point associated with “Mahashiva”, where the activities of universe is monitored and regulated.

Bapuji Says that infinite universes are interconnected through subtle waves, and higher cosmic powers observe and control universal functioning through these energetic records.

The universe is not silent or empty but filled with continuous streams of information carried through light and energy

waves. These waves function as carriers of memory, enabling higher powers to observe what is happening across different cosmic systems. both science and spirituality recognize that light carries information. Science explains this through electromagnetic theory, while spiritual philosophy expands the idea to suggest that light may also carry deeper records of universal activity.

Chapter V

Cosmic Script Vs Free Will of a Soul

Understanding predetermined cosmic script and soul's free will

· ★ ·

It is explained that when the universe is created, a “script” or cosmic blueprint is also established. This script governs the general functioning of the universe, including cycles of creation, preservation, and transformation.

Bapuji says that as per spiritual cosmology:

- Shiva represents the source of creation
- Vishnu represents sustenance
- Brahma represents manifestation of the universe
- Mahashakti (divine feminine Goddesses) represents the dynamic energy behind creation

This cosmic script is said to operate across galaxies, universes and even multiversal structures. However, the script is not completely fixed. Changes can occur depending on circumstances, the collective actions of souls, and interactions between different cosmic forces. Bapuji explains that higher-dimensional souls do not interfere with another soul's path unless their karmic structures naturally overlap. Many such souls from higher realms are themselves seekers of the Supreme Almighty Authority. They therefore respect the free path of every soul and do not interfere in another's cosmic script.

Free-will: While the broad framework of the universe may follow a predetermined structure, individual souls are believed to have the freedom to make choices and influence their personal karmic path. Through spiritual effort, meditation, and positive thinking, individuals may transform their karmic outcomes.

Bapuji says that destiny is not completely fixed. Instead, human consciousness plays an active role in shaping life experiences. Based on Soul power, Soul can choose its actions/ karma. The script of each soul is written by the soul itself, in alignment with the broader cosmic framework.

Myth Busters

- Baba Vanga (1911–1996) predictions on Future: Blind Bulgarian mystic widely believed to possess the ability to foresee future events, Many followers of her believed that she could see future through her inner eyes.

Bapuji Clarifies that certain individuals can access subtle layers of reality often described as the subtle world “Sukshma Jagat” According to these ,information about events, actions and karmic patterns may exist in a subtle energetic form. Spiritually sensitive individuals occasionally access fragments of this universal knowledge. In our Hindu scripture mentions that Rishi Markand used to view the court of deity Brahma known as “Brahmapuri” through his deep state of meditation.

Even if intuitive insights occur, they may represent probabilities rather than fixed outcomes as per Bapuji.

Chapter VI

Akashic Delete

The One Power That Can Clear Every Cosmic File

Records across cosmic planes can be erased. Bapuji says, Karmic imprints can dissolve. The soul becomes free from cycles of bondage. This liberation represents the soul's return to its pure state beyond all archives and identities.

When soul draws power from the Almighty Authority “Behad Parmapita” via meditation, our soul recharges with Supreme Divine Light (Paramprakash) from Almighty authority.— that power flows soul through multi dimensions causal body (‘Kaaran Sharir’), Galactic dimension (“Maha Kaaran Sharir”), Universal dimension (“Param Maha Kaaran Sharir”). Through that Paramprakash Power, the entire karmic ledger — every accumulated account — can be deleted.

“Without Through this Power, souls, anywhere can erase its record. This is the most profound secret of the cosmos.”

Therefore: without Yog Bal, without receiving power from Parmatma — the atma cannot delete its record. Only through Yog Bal will the entire record be dissolved.

When Is This Record Erased?

At Ardha Pralay on earth — the semi-dissolution (i.e at the end of each cycle of “chatur yuga” i.e. 43,20,000 years.) — every soul receives the consequence of its karma. But the complete erasure of cosmic record — across all Bramand, all Maha Bramand — can only happen one way.

That record can only be erased through meditation (Yog Bal) where one directly connects with Supreme Almighty

authority and direct power is received from Supreme father via union of self with Supreme Father.

Even when a soul survives Mahakaal Pralay and migrates to another Galaxy, to Universe, to Great Universe — its record travels with it. Even a Formless Soul state (Nirakari atma) carries its full record within a subtle energetic covering. That record cannot be shed without the Power of meditation (Yog).

Why Dhyan-Yog Alone Is Insufficient

In the world today, no one truly understands Meditation (Yog). People practice Dhyan-Yog — meditation directed toward deities. But those deities have now taken human form . They no longer possess soul -power. How can they transmit what they no longer hold?

The souls trapped here need enormous power — not 2 or 4 Kalas (soul power). Many souls are highly powerful and require 10, 15, 20, 25, even 40 Kalas. Only Almighty can give that higher level of Soul Power. Shree Krishna had 16 Kala (soul power).

Therefore: Yog Bal — the soul's direct connection with Parmatma — is the only channel through which the destruction of sinful karma ("Vikarma Vinaash") can occur. When connection is established and power flows, the soul becomes light. It becomes Beyond Karma/ Actions ("Karmateet"), Beyond Emotions ("Bhavateet") , beyond the three qualities of nature (Sattva, Rajas, Tamas) ("Trigunateet") Only then does it return to its origin.

Chapter VII

Path of Knowledge — The Supreme Key

What Bhagavad Gita Truly Revealed

· ★ ·

Image: AI-generated (GPT Image 2.0) · Artistic interpretation only — actual reality may differ.

Behad Parmapita / Supreme Almighty Authority can only be known through path of knowledge (“Gyan”) — true, limitless knowledge (“Satya- Sanatan Gyan”).

Bhagavad Gita declared that: ‘Knowledgeable souls are especially dear to Me.’ Shri Krishna also reveals: “I am not reached through meditation (“Dhyan-Yog”) alone. I am reached through path of knowledge (“Gyan”).

Therefore, “Gyan” must be known. For every soul. This is the one supreme truth, the single ultimate path.

At the time of spiritual decline (“Dharma-Glani”) — all souls, whether in the physical plane (“Sthool Vatan”) or Subtle world (“Sukshma Vatan”), will settle their karmic accounts.

Without path of knowledge, souls settle karmic records through Karma-Bhog: by enduring suffering. However through path of knowledge, they escape that suffering. Through Yog Bal they dissolve their Vikarmas and return to the Nirakari form.

Creators' Space Craft (Vimana)— Returning to One's Origin

Image: AI-generated (GPT Image 2.0) · Artistic interpretation only — actual reality may differ.

Bapuji shares that in higher dimension of Subtle world ("Sukshma Vatan"), every Soul Creator has arrived in its own Space craft ("Vimana")— its divine cosmic vessel. Every Soul Creator ("Rachaita") awaits for its soul creation ("Rachna") get liberated from the trap of karmic entanglements Every door stands open to the liberated soul. The call goes out across the cosmos to all souls to return to their respective soul-creator.

However to board these Space craft ("Vimana")— which are made out of supreme element ("ParamTattva") or Supreme divine light ("Paramprakash"). Soul must convert from 5 elemental physical body to light body ("Avyakt"). Every soul has come from a specific level of creation kala — 200, 300,

500, 1000 — and each soul's Vimana awaits at that corresponding height. Knowledge alone reveals the way back to source.

“This is the ultimate Param Satya. Beyond this, nothing greater can be understood.”

Chapter VIII

Knowledge, Meditation, Selfless-Service and Godlike Attributes

The four Keys to Complete Liberation

· ★ ·

Knowledgeable souls (“Gyani Atma”) must practice meditation to connect with Almighty Authority “Behad Parmapita” and perform selfless service (“seva”). Bapuji assures that through selfless service (“seva”) souls creates Infinite-imperishable fortune beyond this multiverse. Soul-Power rises with true service. Souls in 3d plane practises and tries to evolve into Almighty equivalent attributes in their day to day life (“Dharana-Murti”).

For this, Knowledge of Infinite/ Beyond Multiverse (“Behad ka Gyan”) in its complete form is essential.

- Brahm Gyan: knowledge of the Solar System (from creation to dissolution)
- Maha Brahm Gyan of galaxy,
- Param Maha Brahm Gyan Universe
- ultimately Behad ka Param Maha Brahm Gyan — the supreme knowledge of the entire Multiverse and beyond multiverse.

When we hold this knowledge then we will understand: how to become light body (“Avyakt”), how to ascend from physical to Light body and finally formless (“sthool sharir to Avyakt to Nirakari”).

Mahakaal Pralay — The Final Hour

Bapuji teaches that “Mahakaal Pralay” is a vast cosmic cycle of dissolution and renewal — a natural movement of cosmic time (Kaal) through which creation periodically transforms. According to this knowledge, such a cycle stands beyond the

familiar ages of “Sat-Yug”, “Treta-Yug”, “Dwapar-Yug” and “Kali-Yug” described in the scriptures. As per Bapuji’s teaching, our Multiverse has already passed through two such complete cosmic cycles, and a third lies ahead in the unfolding of cosmic time. Bapuji’s message is one of inner awakening, not alarm — souls who turn inward through knowledge, meditation and selfless service rise above the pull of these cosmic cycles and move toward liberation.

Only the powerful souls — the Behad Atma — will comprehend this knowledge. Such a soul will dive into the Ocean of Knowledge, churn the Ocean of Thought, and arrive at the ultimate questions: Who am I? Where did I come from? Why did I come? Where must I go? What is my ultimate destination?

Without Gyan, there is no other alternate path for liberation. Mukti (liberation) and Jeewan Mukti (liberated living) are impossible without it. Only Behad ka Param Gyan will guide you — saving you from Karm-Bhog, elevating you from Vyakt to Avyakt, from Avyakt to Param Light Body, to Nirakari.

Chapter IX

The Final Param Satya

The Soul's Ultimate Liberation

Bapuji has revealed in its fullness the deep secret of deleting Akashic records. This is not simple knowledge. Every soul, wherever they are — whether in the subtle world, the physical plane, or in any universe, galaxy or across the entire Multiverse — must settle its karmic account. Until that account is cleared, the soul cannot advance to the formless stage “Nirakari”, and cannot return to its Creator.

At the core, every creation seeks its Creator. When a soul realises karmic structures, it realises its Creator and moves, inevitably and irresistibly, toward that Creator. Third Eye will open. Cosmic Knowledge from creation to dissolution will be downloaded via third eye. At this stage, the soul will understand everything in this physical realm as well as in the higher subtle realms, and become liberated from all forms of bondage. Both the limited (Hud) and the unlimited Behad will both be understood through Atma Gyan, through Atma Swaroop, through the living experience of the self.

The Gyani Atma, the Yogi Atma, the Vishwa Seva Dhari, the Vishwa Kalyankari — the Behad Brahm Gyani, the world-uplifting soul — this soul alone will become Karmateet and Gunateet. This soul alone will board its Vimana.

Without Gyan: no path. Without Yog: no power. Without Seva: no fortune. When these three converge, the soul settles all accounts, becomes Nirgun, Nirakari — and ascends.

Akashic Delete — The spiritual process through which the karmic record accumulated by a soul across many lifetimes and many universes is erased through deep meditation and direct connection with the Almighty.

Akashic Records — A universal cosmic field that stores the record of every thought, action, emotion and experience of every soul across all lifetimes and dimensions.

Almighty Authority (Behad ka Baap / Behad Parmapita) — The Supreme Father, the unique master creator of this limitless creation. He is one and only one. He is the ultimate source of power for all creators and all creations.

Amarlok — The immortal realm. The eternal world that this old mortal world is meant to be transformed into.

Atma (Soul) — The eternal conscious spiritual entity that travels through many births and many dimensions, carrying its karmic record. Modern science calls this consciousness.

Avyakt — The invisible, subtle, light-form world of creation. Also the soul's state when it has moved beyond the gross physical body and become close to the formless state.

Behad — Unlimited, infinite. Refers to the limitless cosmic reality that lies beyond all material limits.

Behad Gyan — The supreme infinite knowledge given by Bapuji about the Almighty Authority and His boundless creation, including everything beyond our multiverse. This knowledge is not written in any earlier scripture.

Had — Limited; bounded by the physical world of five elements.

Had ki Atma — A common soul created at the lower levels of a creation. It is made up only of subtle elements (no Param Prakash) and has very low power.

Jeevan Mukti — Liberation while still alive. The soul is free from all karmic accounts, knows its Creator and lives in His blissful state.

Kaal — Cosmic time; the force responsible for the cycles of creation and dissolution.

Kala — A unit of soul power. It measures the spiritual capacity of a soul to access higher dimensions of knowledge and consciousness. Shri Krishna had 16 Kala. Our Multiverse is of 100 Kala.

Karma — The law of cause and effect. Every action of a soul leaves its consequence in the soul's record.

Karma-Bhog — The experience of karmic consequences through suffering, illness or difficult life circumstances.

Karmateet — A state beyond karma. The soul is no longer bound by any past actions.

Maha Bramand — Galaxy (for example, our Milky Way / Akash Ganga). Created from 8-12 Kala of celestial power.

Maha Kaaran Sharir — A higher Causal Body that stores the karmic record at the galactic level (Maha Bramand).

Mahakaal Pralay — The Great Cosmic Dissolution — an immense transformation cycle that affects many universes and beyond. The third such dissolution is approaching for our multiverse.

Mukti — Liberation. The stage when the soul no longer exists in creation; it dissolves into its Creator.

Multiverse — A vast dimension that contains uncountable universes, organised in 17 layers (G1 to G17). Our Multiverse is of 100 Kala power.

Nirakar / Nirakari — The formless state of the soul, beyond all physical and subtle bodies. The state of pure soul-consciousness.

Param Maha Bramand — Universe. Created from 16-20 Kala of celestial power.

Param Maha Kaaran Sharir — A subtler Causal Body that stores karmic records at the universal level (Param Maha Bramand).

Param Prakash (Paramprakash) — Supreme divine light. The energy of a soul in its incorporeal state, measured in Kala. The state of pure soul-consciousness.

Param Tattva — Supreme element. Finer than the ordinary five elements; the body of a soul in its higher subtle state.

Paramdhaam — The supreme abode of a creation. The highest dimension where everything is in supreme divine light form. The home of the Creator (Shiv) of that creation.

Paramshanti (Param Shanti) — Supreme Peace. The original state of every pure soul. Every soul ultimately seeks this state.

Pralay — The process of dissolution of a creation.

Rachaita / Rachna — Rachaita is the Creator-Soul. Rachna is the soul created by it. Every Creator awaits the return of its created souls.

Rishi — An ancient sage who, through meditation and spiritual discipline, perceived hidden truths of the universe and shared them for the welfare of humanity.

Sanatan Dharm — The eternal religion. The original religion that has existed since the beginning of creation. Hindu Dharma is also known as Adi Sanatan Dharm.

Sanskar — The character of the soul; the record stored in its Causal Body. Sanskar shapes how a soul thinks and acts.

Seva — Selfless service. In Behad Gyan, the highest seva is to share supreme knowledge for the benefit of every soul.

Sukshma Jagat — The subtle world; a dimension just beyond the physical plane.

Sthool Sharir — The gross physical body, made of the five elements: earth, water, fire, air and ether.

Sukshma Sharir — The subtle body inside the physical body, made of finer elements (ether, air, fire). It carries the soul's power to operate the physical body.

Sukshma Vatan / Sthool Vatan — The subtle world plane and the physical world plane respectively. Vatan means realm or plane.

Tattva — Element. The visible world is composed of five elements: earth, water, fire, air and ether.

Third Eye — The inner eye of higher spiritual perception. When opened through deep knowledge and meditation, it reveals the truth of the self and of creation.

Vikarma / Vikarm — A sin or wrong action committed by the soul that leaves a heavy mark on its record.

Vimana — The divine cosmic vessel of a Creator-Soul. Each soul's Vimana awaits at the level of its origin to take it back home.

Vyakt — The visible, five-element world of creation.

Yog (Yoga) — Connection. When a soul, after acquiring Behad Gyan, immerses in deep love for its Creator and forgets the physical world, it is in Yog.

Yog Bal — The spiritual power received through deep meditation in direct connection with the Almighty Authority. The only power that can dissolve karmic records across all cosmic levels.

Yug — A spiritual age. The cycle of four Yugas (Sat, Treta, Dwapar, Kali) repeats again and again until Mahakaal Pralay dissolves the Bramand.
