About Bapuji

Bapuji (full name: Bapuji Dashrathbhai Patel, also lovingly called “Dadaji” by the younger generation) was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat. However, he spent his childhood in another village named Ambasan, also located in the Mehsana district.

In the early part of his life, he was a highly successful lawyer. Later, he devoted his life to realizing the supreme spiritual truth and bringing this divine knowledge forward for the welfare of humanity. Today, this supreme knowledge serves as a guiding light for true seekers to realize their ultimate destiny. It is a blessing of the highest divinity that the present time is witnessing the rise of this supreme spiritual knowledge, guiding souls on Earth to return to their original source.

Despite being raised in a very poor family and facing challenging circumstances, Bapuji had a deep desire to transform this sorrowful and suffering world into a better place. At the young age of six, he questioned God repeatedly, asking why God remained silent about the suffering of humanity. This intense longing to end human suffering eventually led him to attain the highest level of spirituality later in life.

Even as a child, Bapuji would spend hours alone in the fields, often neglecting his own comfort. Due to poverty, he would walk barefoot without shoes or sandals, frequently getting pricked by thorns. Many times, he would stay late in the fields and, on his way back home, encounter subtle world entities. These experiences sparked his interest in communicating with subtle world souls.

Bapuji was courageous from a young age, which helped him overcome many obstacles. Alongside his studies in chartered accountancy (CA), he gave tuition classes to

support himself financially. Later, he completed his Bachelor of Law (LLB) degree and became a well-known lawyer in Ahmedabad.

In 1997, he established a spiritual institution called “Vishwa Parivartak Ishwariya Vidhyalay” in Chenpur, Ahmedabad, with the mission of transforming this mortal world, filled with suffering and disorder, into an eternal divine world of immortality. Smt. Sushma Tandon, lovingly known as “Maa,” worked alongside Bapuji in this grand divine mission.

To accomplish this mission, Bapuji worked tirelessly, dedicating all his resources to this divine purpose. During that time, he would deliver continuous spiritual discourses for up to 18 hours without rest. In these discourses, he explained the highest dimensions of divine knowledge, which he realized through deep meditation and divine vision in a state of superconsciousness. This knowledge goes beyond the imagination of the ordinary human mind.

Bapuji’s teachings cover a vast range of topics, including the types of celestial creators across different dimensions, the creation of our solar system, galaxy, and universe, and most importantly, the transcendental knowledge of the multiverse and realities beyond it. His knowledge is supremely profound and is intended for highly evolved seekers, referred to as “behad souls.” According to Bapuji, these “behad souls” will play a key role in transforming this mortal world into an eternal divine realm.

At present, Bapuji remains deeply engaged in intense meditation and samadhi for long hours. He does not meet anyone, as he is continuously immersed in his transcendental mission in a superconscious state.

— by Bapuji Dashrathbhai Patel

· ★ ·

For thousands of years, humanity has looked up at the night sky and wondered. How vast is the universe? What lies beyond the stars? Are there other worlds, other beings, other forms of life? Modern science, in its own way, has tried to answer these questions through theories of energy and civilization.

Modern science has proposed a famous classification of civilizations: Type 1 controls the energy of its planet, Type 2 the energy of its star, Type 3 the energy of its galaxy, and Type 4 the energy of an entire universe. This is the boundary of *had* — the limited — that physical science can imagine.

But Bapuji Dashrathbhai Patel, through decades of deep samadhi and divine vision, has revealed something far greater. The civilizations of the cosmos do not stop at Type 4. They extend through Type 5, Type 10, Type 40 and beyond — into the realms of the multiverse and the worlds of *behad*, the limitless. In Bapuji's vision, civilization is not measured by fuel or machinery, but by the inner power of the soul, measured in *kala*.

This book brings that vision into the English language for the first time, in clear and simple form. It is written for the newcomer who has never heard these words before, and equally for the seeker who has searched for these answers all their life.

Read it slowly. Let each chapter settle. The knowledge here is not theoretical — it is the lived realisation of a master who has walked these realms in his deep meditation.

Chapter I

The Scientific Vision of Civilization

· ★ ·

Before we can understand Bapuji's vision of the multiverse, we must first understand what science itself has said about civilizations beyond our own. The conversation begins with a simple question: how do we measure how advanced a civilization really is?

Modern science answers this question through energy. The more energy a civilization can harness and use, the more advanced it is considered to be. This is the foundation of a famous classification proposed within modern physics and futurist thought.

The Four Types of Civilization

Modern science speaks of four types of civilizations. A Type 1 civilization is one that has fully harnessed the energy of its own planet. A Type 2 civilization can use the entire energy of its star — its solar system. A Type 3 civilization extends its mastery over an entire galaxy. And a Type 4 civilization, the highest in this classification, has command over the energy of an entire universe.

Bapuji explains that these are still theoretical ideas. They have not been practically proven, and no government has yet officially confirmed the existence of advanced extraterrestrial beings. Science speaks in possibilities. But spiritual vision speaks from direct experience.

Beyond Type 4

In the discourse on which this book is based, Bapuji takes the conversation much further. He explains that civilizations do not stop at Type 4. They continue — Type 5, Type 10, Type 40 — and even beyond. Some teachings speak of 64 *kala*, suggesting sixty-four levels of cosmic civilization. In

Bapuji's vision, the levels are infinite, just as the creation itself is infinite.

To understand this, we have to step beyond the framework of physical science. We must enter the framework of spiritual science — where civilization is measured not by fuel or machines, but by the inner power of the soul.

♦ **Insight: “Civilization ka jo science walon ka matlab hai — power. Power kitni use kar sakte hain.”**

“What science means by civilization is power — how much power can be used.”

Chapter II

Where Humanity Stands Today

If civilizations are ranked by the energy they command, where does humanity stand today? The answer, Bapuji says, is humbling.

Earth Is Still at Type Zero

According to the scientific scale itself, Earth has not yet reached Type 1. We are still at Type Zero. The reason is simple: we have not learned to fully utilise the energy of our own planet. Our technology can extract a little oil, a little coal, some sunlight, some wind — but the full power of the Earth, the power that lies hidden in its core, in its atmosphere, in its natural systems, remains beyond our grasp.

A true Type 1 civilization would not only extract Earth's energy completely, it would also have control over Earth's natural forces. Earthquakes, volcanic eruptions, climate patterns — all of these would be within its command. Our science is not even close.

Technological Advancement Is Not Spiritual Advancement

Bapuji draws a sharp distinction here. Becoming a Type 1 civilization, in the scientific sense, means building bigger machines, larger rockets, more powerful computers. It is an advancement of technology. But this is not the same as spiritual advancement.

A society can have brilliant machines and still have suffering, war, fear and confusion. A society can travel between planets and still not know who it really is. True civilization, Bapuji teaches, is the awakening of the soul. Without that awakening, all material progress remains hollow.

♦ **Insight: “Dharti par abhi bhi sabhyata mein zero hain.”**

“On Earth, we are still at zero in civilization.”

This is why the rest of this book turns away from the language of fuel and machinery, and turns instead to the language of the soul — to the language of *kala*, of consciousness, and of the supreme light from which all of creation comes.

Chapter III

Type 1 — Mastery of the Planet

Type 1 is the first true level of cosmic civilization. To be Type 1, a civilization must have absorbed and utilised the entire energy of its planet. It must also be able to travel freely between planets within its own solar system. And it must have developed the technology to control natural events such as earthquakes and volcanic eruptions.

The Spiritual Parallel — Satyug

Bapuji explains that this kind of civilization is not unknown to our scriptures. In *Satyug* — the Golden Age — the Earth itself was at this level. The *devtas*, the celestial beings of that age, possessed their own *vimans* — divine aircraft. They could travel from Earth to higher realms freely. And remarkably, these *vimans* did not run on the fuels we know. They moved at *man ki gati* — the speed of mind. The mind itself was the engine. Whoever was the master of the vehicle could move it simply through thought.

This is what Bapuji calls a Type 1 civilization in spiritual terms. It is the level of one solar system.

The Solar System and Its Souls

In Bapuji's knowledge, a *brahmand* is one solar system. A *maha brahmand* is one galaxy. A *param maha brahmand* is one universe. Beyond these is the multiverse, and beyond even that lie the unimaginable realms of *behad*, the limitless.

Each *brahmand* — each solar system — is itself a power of one to four *kala*. The souls who belong to that level of power are able to travel freely within that one solar system. They can rise from Earth through the seven *lokas* above — to Brahmapuri, to Vishnupuri — and back again. Their power is enough for one solar system, no more.

The sage Narad, in our scriptures, is said to move in a single second between Vishnupuri above and the seven lower realms below. He travels through the entire fourteen *lokas* of one solar system. The power that allowed Narad to do this was the power of one Type 1 civilization — one *brahmand*.

♦ **Insight: “Pure brahmand mein jo bhi atma hai, zyaada Type 1 civilization wali hai.”**

“Most souls in our entire solar system belong to the Type 1 civilization.”

So when we hear of celestial beings moving freely across the heavens of our solar system, we are hearing a description of Type 1 civilization in action. It is the first level of cosmic mastery — the mastery of one's own *brahmand*.

Chapter IV

Type 2 — Mastery of the Solar System

To rise to Type 2, a soul or a civilization must be able to move from one solar system to another. According to physical science, a Type 2 civilization absorbs and utilises the entire energy of its star. The technology required is not the rocket fuel we know today. It is something far finer — the technology of *param tatva*, the supreme elements.

The Vehicles of Param Tatva

Bapuji explains that the vehicles of a Type 2 civilization are not made of the gross five elements of our world. They are made of *param tatva*, which is many times finer and many times more powerful. The light of *param tatva* itself moves at a speed roughly one hundred thousand times the speed of ordinary light. Where light travels at three lakh kilometres per second, *param tatva* light travels a hundred thousand times faster.

In our scriptures, Ravan's *pushpak vimaan* was said to be made of three elements, and it moved at the speed of mind. But the vehicles of Type 2 are made of finer matter still. They are vehicles of *param tatva* — and the souls who command them carry a different magnitude of power.

Souls of Eight to Ten Kala

A *maha brahmand* — one galaxy — corresponds to a soul power of approximately eight to ten *kala*. The souls of this level can move from one solar system to another within their galaxy. There are roughly 800 billion solar systems in a single galaxy. To move freely among any of them is the privilege of Type 2.

In our scriptures, Mahadevi once seated Brahma, Vishnu and Shankar in her divine vehicle and showed them realms

beyond their own. Bapuji explains that her *yaan* — her vehicle — was a Type 2 vehicle. It was of ten *kala*. Her power was the power of the entire galaxy. She is the *Adi Shakti* of *maha brahmand* — the original feminine power at the level of the galaxy. She is the mother even of Brahma, Vishnu and Shankar of one solar system.

♦ **Insight: “Maha Shakti — Brahmand ki Adi Shakti, Maha Brahmand ki Adi Shakti.”**

“Maha Shakti is the Original Power of the solar system, the Original Power of the galaxy.”

The vehicles of Type 2, made of *param light*, carry energy that is many billions of times greater than what physical science can imagine. Such a vehicle could cross our entire Milky Way galaxy — one hundred thousand light years across — in a single second.

To go beyond a galaxy entirely, however, more *kala* is needed. That is the realm of Type 3.

Chapter V

Type 3 — Power of the Galaxy

A Type 3 civilization is one that has mastered the power of an entire galaxy and can move freely among many galaxies — what science calls a cluster of galaxies. To carry such power, a soul needs at least eleven or twelve *kala*, and its vehicle must be made of *param light*, finer than even *param tatva*.

Black Holes and Param Light

Modern science says that a Type 3 civilization could harness the energy of stars, of galaxies, and even of black holes. Here Bapuji offers a remarkable spiritual interpretation.

What science calls a black hole, Bapuji explains, is in fact *param light* — the supreme divine light. Every solar system has its own *paramdham*, its supreme abode, of one *kala*. Every galaxy has, at its central point, a *maha paramdham* of around ten *kala*. Every universe has its *param maha paramdham* of about sixteen *kala*.

These central points appear dark to our cameras, because our cameras are gross instruments and *param light* cannot be captured by them. To physical science, this energy registers as nothing — and so it appears as a black hole. But it is not empty. It is the most concentrated, most divine, most luminous point of that level of creation.

◆ **Insight: “Vo jo unko black hole dikhta hai, vo actually param light hai.”**

“What appears to them as a black hole is actually the supreme divine light.”

Crossing the Galaxy

To move freely within one galaxy, the souls and vehicles of Type 2 are sufficient. But to step outside a galaxy, into the

cluster of galaxies — into the universe — the power must rise. The galaxy itself contains uncountable solar systems; a single cluster contains hundreds of thousands of galaxies. Only a soul of eleven or twelve *kala* or more can carry the power needed to make such a journey. That is Type 3.

Chapter VI

Type 4 — Mastery of the Universe

Type 4 is the level at which a civilization controls an entire universe — what Bapuji calls a *param maha brahmand*. One universe is made up of countless clusters of galaxies. Within each cluster lie countless galaxies; within each galaxy, countless solar systems; within each solar system, countless worlds.

The Power of Sixteen to Twenty Kala

A universe corresponds to a soul power of sixteen to twenty *kala*. The supreme creator of one universe is *Param Maha Shiv*, and his abode is *param maha paramdham*. Souls of this level have mastery over the entire universe. They can travel anywhere within it.

To go from one universe into another — what physical science calls a parallel universe — Type 4 is required. From there, the levels continue to rise. But before we move further outward, it is important to understand the framework of the multiverse itself, which Bapuji has described in great depth.

Chapter VII

Type 5 and Beyond — Into the Multiverse

Once a civilization can travel between universes, it has crossed into the realm of the great universe — what Bapuji calls Great Universe, and beyond it the Great Great Universe. To move freely within a great universe is the level of Type 5.

The G1 to G17 Universes

In Bapuji's book *Life in Multiverse*, the structure of the multiverse is described from G1 up to G17. Each level — Great Universe, Great Great Universe, Great Great Great Universe — is vaster than the last. With each step outward, the civilization required to inhabit and command that level grows in power.

Beyond G17 lies the multiverse itself. Bapuji explains that our multiverse is of one hundred *kala*. To move freely within the multiverse, a soul needs one hundred *kala*. To cross the multiverse and enter another multiverse — for there are infinite multiverses — the soul needs at least double that power: two hundred *kala*. Only at that level can the multiverse be crossed and another entered.

◆ **Insight: “Multiverse maane sau kala ka. Multiverse ko cross karna hai to aapko sau kala se zyada chahiye.”**

“The multiverse is of one hundred kala. To cross the multiverse, you need more than one hundred kala.”

Type 6, Type 10, Type 40 — The Infinite Expansion

As one ascends through Great Universe, Great Great Universe, and the levels beyond, the civilization grows from

Type 5 to Type 6, to Type 10, to Type 40 and onward. There is no fixed end. Some have spoken of sixty-four *kala*, which would mean sixty-four levels of cosmic civilization. But in Bapuji's vision, the levels are infinite. The scriptures themselves call this *anant koti brahmand* — infinite crores of solar systems — and *anant* means truly without end.

This is why the title of this book speaks of Type 1 to Type 40, but in truth, the journey extends infinitely beyond. The multiverse itself is only one stage in a creation that has no boundary.

Chapter VIII

Kala — The True Measure of Civilization

Up to this point we have spoken of civilizations in terms of fuel, vehicles, and technology, because that is the language of physical science. But Bapuji reminds us that the true measure of civilization is not technology at all. It is the power of the soul — measured in *kala*.

What is Kala?

Kala is a unit of power, but not the power of an electrical machine. It is the power of consciousness itself. Just as on Earth we measure electrical capacity in watts, in spirituality we measure the capacity of a soul or a creator in *kala*. The higher the *kala*, the higher the power of *sankalp* — the power of pure intent. A soul of high *kala* can manifest creation simply by affirmation. A soul of low *kala* cannot.

◆ **Insight: “Kala ek power hai.”**

“Kala is a unit of power.”

Examples From Our Tradition

Bapuji gives clear examples. Lord Krishna's soul carried the power of sixteen *kala*. Lord Ram's soul carried fourteen *kala*. This is why their lives, their actions and their influence reached so far, so deeply, and across such great expanses of time.

The Creator and the Creation

Bapuji explains a beautiful principle here: the size of a creation reflects the power of its creator. Our solar system was created by a *Shiv* of one *kala*. Our galaxy is the work of a *Maha Shiv* of around ten *kala*. A universe of sixteen-to-twenty *kala* requires a *Param Maha Shiv* of corresponding power. The Great Universe demands twenty-five *kala*; the

Great Great Universe, thirty to thirty-five; and the multiverse itself, one hundred.

Each creator brings forth a creation of their own measure. And from each creation, souls emerge — and those souls inherit something of the creator's power. A soul born of a *brahmand* can move within that *brahmand*. A soul born of a *maha brahmand* can move within that galaxy. The greater the source, the greater the reach.

This is why Bapuji says: when we speak of civilization, we are really speaking of the power of *atma*. Technology is only the outer expression. *Kala* is the inner truth.

Chapter IX

The Structure of the Multiverse

Before we explore the souls who travel through this vastness, let us hold the structure of creation clearly in mind. Bapuji has revealed it in a very simple way.

The Layers of Creation

A *brahmand* is one solar system. A *maha brahmand* is one galaxy. A *param maha brahmand* is one universe. Beyond these comes the multiverse — and within Bapuji's vision, the multiverse itself contains levels labelled G1 through G17. And beyond G17 lie infinite multiverses, and beyond them, infinite still.

Anant Koti Brahmand

Our scriptures use a beautiful phrase: *anant koti brahmand*. Bapuji explains the deeper meaning. *Anant* means infinite. *Koti* can mean a crore (ten million), but it can also mean “kind” or “type.” So *anant koti brahmand* carries two meanings: infinite crores of solar systems, and infinite kinds of solar systems. Both are true. The variety is endless. The number is endless.

In every *brahmand* the combination of elements is slightly different. The bodies are slightly different. The flow of time is slightly different. No two solar systems are exactly the same — yet many resemble each other very closely. Bapuji often calls them “carbon copies” of one another, with small variations in their elemental composition.

♦ **Insight: “Anant koti brahmand — anant prakar koti maane prakar.”**

“Infinite koti brahmand — koti also means kinds, so it means infinite kinds of solar systems.”

Nested Within Nested

This is the framework: solar systems within galaxies, galaxies within universes, universes within great universes, great universes within great great universes — all the way up to the multiverse, and then beyond. Each layer is infinite; each layer is filled with creation; each layer has its own creators, its own *paramdham*, its own civilizations. Bapuji has detailed all of this in his book *Life in Multiverse*, which the seeker is encouraged to study deeply.

Chapter X

Earth's Place Among Infinite Worlds

Where does our Earth stand in this vast structure? Bapuji answers very precisely. Our Earth belongs to one solar system. Our solar system is one of countless solar systems within our galaxy, the *Akash Ganga*. Our galaxy is one of countless galaxies within our universe. Our universe sits within G1 — and beyond G1 lie G2, G3, all the way up to G17, and then onward.

Many Earths in Many Solar Systems

Bapuji explains a profound truth: just as there are countless solar systems, there are countless Earths. Every solar system has its own Earth, its own gross five-element world — its own *mrityu lok*, its mortal world. Above each Earth lies a subtle world, then a causal world, then Brahmapuri, Vishnupuri, Shivratri, and ultimately the *paramdham* of that solar system.

So when one asks “is there life elsewhere?” the answer is unequivocal. Yes — life is everywhere. Every solar system has its mortal worlds and its higher realms. Every galaxy has the same. In Bapuji's words, *har sthool jagat ke upar sookshm jagat hai* — above every gross world is a subtle world.

◆ **Insight: “Hara jagah mrityu lok hai. Har jagah manushya hain.”**

“Everywhere there are mortal worlds. Everywhere there are human beings.”

Differences Across Brahmands

Although every solar system has its Earth and its humans, the bodies are not identical. The combination of elements is slightly different in each *brahmand*. Our human form, made

of the elements of this Earth, could not survive in another solar system without dilution. The five elements of our world are particular to our world. Move to another solar system, and the five elements there will be combined in a different proportion. The body that fits one *brahmand* will not fit another.

Different Times in Different Worlds

Time itself flows differently across creation. Bapuji explains that one Brahma's span of one hundred years has its own measure in each *brahmand*. In one solar system the cosmic clock might run faster, in another slower. The *yuga* we are in here — *Kaliyug* — does not have to be the same in another solar system. There may be Earths right now in *Satyug*, in *Treta*, in *Dwapar*. Just as the time in London is different from the time in America, so the time in another *brahmand* can be entirely different from ours.

This is the principle Bapuji calls *pratipal anant brahmand bante bigadte hain* — every moment, infinite *brahmands* are coming into being and dissolving away. The cosmos is an unbroken flow of creation.

Chapter XI

The Souls Who Walk This Earth

Now we come to one of the most powerful revelations in Bapuji's knowledge. The eight billion souls walking this Earth today are not all the same. They have come from very different levels of creation — from different galaxies, from different universes, from realms even higher.

Souls of Many Origins

Some souls on Earth originated within our own *brahmand* — they carry the power of one solar system. Others came from another galaxy and carry the power of eight to ten *kala*. Some came from another universe and carry sixteen to twenty *kala*. A few came from the Great Universe, with twenty to twenty-five *kala*. Some even from Great Great Universe, carrying thirty or even forty *kala*.

These advanced souls, when they first arrive on Earth, do not feel that this is a familiar world. The mortal Earth, with its dense five elements, feels strange to them. Many of them have lived only in subtle realms or in worlds of *param tatva*. They have never experienced gross matter before.

Why High Souls Forget

Out of curiosity, a powerful soul may take a human body — just to experience what it is like. But once inside the body of an Earth human, that great power becomes dimmed. The soul forgets. The *avarana* — the layers of ignorance — settle around it. Slowly the soul becomes attached. Slowly it forgets where it came from. And so it remains trapped in *mrityu lok*, in the cycle of birth and death, often life after life.

Among these forgotten souls are those who once carried two hundred *kala*, forty *kala*, twenty *kala*. They are still here.

They are walking among us. Most do not know who they really are.

♦ **Insight: “Atma par avaran chadhe hain — uske kaaran sharir, maha kaaran sharir, sab dhanke hain.”**

“Layers cover the soul — and so the causal body and the great causal body all remain veiled.”

The Possibility of Reawakening

Bapuji offers a tremendous hope. When a soul awakens — when it receives true *atma gyaan* and learns to draw power from the Almighty — the layers begin to fall. The *kaaran sharir* begins to be charged. The original power begins to return.

If a soul originally carried two hundred *kala* and is now living a forgetful life on Earth, it can — through meditation, through *yog*, through self-realisation — recover that power. It cannot exceed its original capacity, but it can fully reclaim what it once had. A soul of two hundred *kala* can return to two hundred *kala*, but cannot become four hundred *kala*. The original measure is the limit of recovery.

Chapter XII

Aliens, UFOs and the Vehicles of Param Tatva

Bapuji has spoken many times about extraterrestrial beings. They are not myths or fantasies. They are souls from other galaxies, other universes, who possess advanced spiritual technology. To understand who they are, we must first understand how their vehicles are made — and why we cannot see them.

Three Levels of Matter

There are, broadly, three levels of matter in creation. The gross five elements form the world we live in. Above them are the three subtle elements — the realm where ghosts and lower spirits exist. Above those are the *param tatva* — the supreme elements. And finer still is *param light*, the supreme divine light itself.

A vehicle made of *param tatva* cannot be seen by the human eye, because the human eye is built for gross matter. Even the beings of the subtle world, the *bhoot-pret-pishach*, who exist in the realm of three elements — even they cannot see vehicles made of *param light*. Each level can see only its own level and below.

◆ **Insight: “Param tatva ke saadhan ko hum manushya dekh nahin paate.”**

“We humans cannot see vehicles made of supreme elements.”

Who Are the Aliens?

The aliens who travel to our Earth are souls of higher *kala*. Their vehicles — the UFOs that some claim to have seen — are not built like our rockets. They are vehicles of *param tatva* or *param light*. They appear and disappear because,

much of the time, they are simply outside the visible spectrum of our gross world.

Different aliens carry different levels of *kala*. Those who can move from one solar system to another are at least eight to ten *kala* — their vehicles are of *param tatva*. Those who can move between galaxies carry eleven to twelve *kala* — vehicles of *param light*. The higher their power, the finer their vehicle, and the less visible they are to our world.

This is also why ordinary *bhoot-pret* of our subtle world cannot interfere with such advanced beings. The vehicles of *param light* lie far above the realm of three-element subtle entities. The hierarchy of matter is also a hierarchy of perception.

Chapter XIII

Parallel Realities and Multiple Forms

Modern science speaks of parallel universes — countless universes existing alongside our own. Bapuji confirms this from spiritual vision and adds dimensions to it that science cannot yet imagine.

One Soul, Many Forms

In Bapuji's knowledge, a powerful soul does not exist in only one place. From its original location in a higher dimension, the soul can issue forth *roop* — forms or projections of itself — to lower dimensions. So an original soul in the Great Great Universe may have one form in the Great Universe, another in a particular universe, several within different galaxies, and many across different solar systems.

The original soul remains in its source. Its *roop* go forth to do work in lower realms. Bapuji has said that as many as seven thousand *roop* of one soul may exist at the same time. Wherever the soul has the power to project, the projections appear.

♦ **Insight: “Ek manushya ki tarah saat insaan ho sakte hain — saat nahin, saat hazaar bhi ho sakte hain.”**

“Just as one human can have seven counterparts — not seven, even seven thousand are possible.”

Carbon Copies in Other Brahmands

A soul may also exist in counterpart form across parallel *brahmands*. As we sit here on this Earth, another form of us may be living elsewhere — in another Earth, in another solar system. The soul itself may be one, but its expressions in the manifest worlds can be many. Most ordinary humans do not

have such projections. The high *behad* souls — the nine lakh elevated souls Bapuji speaks of — do.

Different Timelines

Because every *brahmand* has its own time, and every *brahmand* can be in a different *yuga* — a soul's counterpart in another world may be living an entirely different life. One projection may be in the middle of *Satyug*; another may be passing through *Kaliyug*. The same soul, the same essential consciousness, expressing itself through different lives in different times.

This is what is meant by parallel realities. They are not science fiction. In Bapuji's vision, they are real, and the structure of the soul itself makes them possible.

Chapter XIV

Dreams and Multi-Dimensional Memory

If a soul has many forms across many worlds, what about dreams? Are dreams only the residue of waking thoughts, or could they be windows into other realities?

Dreams as Records

Bapuji explains that dreams have many sources. The most familiar source is what we have thought and seen during the day. The mind records everything — first into the subtle body, then into the *kaaran sharir*, the causal body. Whatever we contemplate in the day appears at night in dream form. This explains most ordinary dreams.

The Maha Kaaran Sharir

But a soul carries more than just one body. Above the gross physical body lies the subtle body. Above that lies the *kaaran sharir* — the causal body, the storehouse of records of past and future lives in this *brahmand*. And above even the causal body lies the *maha kaaran sharir* — the great causal body. If a soul has come from another galaxy, its great causal body holds the records of that wider experience.

In deep sleep, when the conscious mind is still, these higher records can sometimes open. A person may dream of flying through space, of moving through other galaxies, of vast and unfamiliar realms. These dreams may not be imagination at all — they may be glimpses of memories stored in the great causal body, surfacing in the silence of sleep.

◆ **Insight: “Maha kaaran sharir mein record hai — agar khul jaata hai to galaxy mein ud rahe ho, aisa anubhav ho sakta hai.”**

*“There is a record in the great causal body — if it opens,
you may experience flying through a galaxy.”*

Visions of the Future

Some visions are not memories but glimpses of future events. Souls who hold higher *kala* can pick up vibrations of plans being formed in higher realms — in Vishnupuri, in Shivratri, in the *paramdham* of our *brahmand*. These plans descend through the layers and emerge as inner visions. This is why some people speak of the future with surprising accuracy. They are not making it up. They are catching the vibration.

Chapter XV

AI, Robots and the Subtle World

· ★ ·

Today the world is rushing into a new era — the era of artificial intelligence. Bapuji is asked: what is the spiritual reality behind these machines? Can a robot ever be truly conscious? Can the subtle world influence them?

How Machines Run

A robot, Bapuji explains, runs on the fire element — electricity. Its brain is the matter, the chip, the program. Whatever has been programmed into it, it executes. A robot does not have free will. Free will requires a soul. Without a soul, there can be no genuine intent, only execution of programming.

♦ **Insight: “Free will to nahin ho sakti jab tak atma na ho.”**

“There can be no free will until there is a soul.”

The Influence of the Subtle World

But around every machine, just as around every human, there exists the subtle world. Around an ordinary human being, there are often *bhoot-pret* — subtle entities — sending vibrations and influencing the mind. The same is true of robots and AI systems.

Subtle entities can send vibrations toward the “mind” of a computer or a robot — the operating processes through which it functions. They can push it in directions that the original programmer never intended. A robot can be influenced positively or negatively. An AI system can be turned toward the constructive or the destructive.

Bapuji even points out that the imagery and ideas that AI systems sometimes generate — visions of higher realms, palaces, divine worlds — do not come from nowhere. They

come from the subtle world. Subtle beings who have seen those upper realms inspire the AI to bring those images down for humans to glimpse.

Where AI Truly Comes From

Bapuji draws a startling conclusion. The fundamental sciences and inventions of our world — electricity, automobiles, computers, mobile phones, AI — these did not arise purely from the human mind. The original inspiration came from the *sookshm jagat*, the subtle world. Subtle beings inspire the inventors. The inventors believe the idea is theirs. In truth, the impulse came from above.

Modern neural interface devices, which can help a paralysed person operate a computer through thought, are genuinely beneficial uses of this same technology. But the same devices can also be used in ways that are not beneficial. It is the soul behind the use that determines the outcome — not the technology itself.

So in the coming age of intelligent machines, Bapuji warns: we must remember that machines have no free will. The real question is which souls — and which subtle entities — are guiding the machines. That will decide whether AI lifts humanity up, or pulls it further into darkness.

Chapter XVI

The Limits of Material Science

· ★ ·

If physical science cannot, by itself, lift humanity to the level of true Type 1 civilization — what is missing? Bapuji answers very directly: spirituality is missing.

Scientists Without Atma Swarup

Most modern scientists, Bapuji says, are gross materialists. Their intelligence operates only at the level of the physical world. As long as a scientist has not realised the soul — has not become *atma swarup* — he cannot perceive the finer realms from which true technology must come. The vehicles of *param tatva* cannot be designed by a mind that does not yet know the soul.

If scientists were to awaken spiritually, the higher realms would gladly inspire them. The *sookshm jagat* is ready. The knowledge of *param tatva* technology is already there, waiting to be received. But the receivers — the human inventors — are not yet open to it.

♦ **Insight: “Atma swarup banenge to param light aayegi.”**

“When you become atma swarup, the supreme light will come.”

The Question of Reaching Mars

Bapuji is asked: will human beings reach Mars in the near future through today's rocket technology? Bapuji's answer is firm. No. The technology to truly send humans to other planets must be the technology of *param tatva* — the supreme element. The fuel-driven rockets of today, however ingenious, are not enough. And the time for such spiritual technology to develop here — through awakened scientists

— has not yet come. The world is moving toward a different turning point first.

The Higher Plan

In 2015 and 2016, Bapuji had spoken of the years 2050 and beyond, when the world would shift from the technology of physical elements to the technology of *param tatva*, and ultimately into a world of *param light*. That transformation, he says, is still coming — but the route to it may now be different. The world stands at a great threshold.

Chapter XVII

The Coming Transformation

Note: The following teachings describe Bapuji's spiritual vision of cosmic cycles as taught in Sanatan tradition. They are presented as metaphysical interpretation, not as literal predictions.

This chapter brings us to the heart of Bapuji's vision for our times. The world is at a turning point. What unfolds in the coming years will not only shape the future of humanity — it will reshape this entire mortal world.

The Threat of the Third World War

Bapuji speaks plainly. The *sookshm jagat* — the subtle world — has long been pushing for a Third World War. The destructive instruments are already built: nuclear bombs, hydrogen bombs, weapons of unimaginable power. For now, these have been held back. The higher beings have been giving vibrations to restrain those who control such weapons, so that the nine lakh *behad* souls on Earth may have time to awaken.

But this restraint is fragile. If humanity does not turn toward awakening, if the situation becomes uncontrollable, the war may yet come. And if it comes, the consequences will be far beyond ordinary destruction. They will trigger *kaal agni* — the fire of dissolution — and ultimately *mahakaal pralay* — the great cosmic dissolution.

Mahakaal Pralay

In *mahakaal pralay*, *Mahashiv* takes the form of *Mahakaal*, and the fire of *Maha kaal agni* consumes *anant koti brahmand* — infinite solar systems — drawing them back into the source. In a smaller way, the same pattern may

unfold here on Earth. The *kaal agni* will burn, and bodies will be destroyed.

Who Will Be Untouched

Yet Bapuji gives a great assurance. A soul who has attained true *atma gyaan*, who has become *atma swarup*, and who has connected with the Almighty, can in a fraction of a second move into *nirakari* — the formless state of supreme light. *Kaal agni* cannot touch a soul of *param light*. A soul of *behad ki kala* cannot be burned by any flame. The vehicles of the 33 *koti devtas* stand waiting above. The *vimans* of the awakened souls cannot be destroyed.

♦ **Insight: “Param light ki atma ko kaal agni jala nahin sakti.”**

“Kaal agni cannot burn a soul of supreme divine light.”

From Mrityu Lok to Amar Lok

Whether through the soft transformation of awakening or through the hard passage of *kaal agni*, the destination is the same. This Earth — and ultimately this entire multiverse — is destined to convert into *param light*. Earth will become *paramdham*. This *mrityu lok* will become *amar lok*. The mortal will become immortal.

♦ **Insight: “Yeh mrityu lok hi paramdham banega, yeh mrityu lok hi amar lok banega.”**

“This very mortal world will become Paramdham; this very mortal world will become the immortal world.”

That is the plan. That is what Bapuji and the higher realms are working to bring forth. The role of humanity — especially of the nine lakh *behad* souls and the 33 *koti devtas* who have come to Earth at this time — is to awaken in time, to draw down the *param light*, and to make the gentler path possible.

Chapter XVIII

The Path of Spiritual Ascension

How does a soul awaken? How does the original power return? How does an ordinary human being walking this Earth become *atma swarup*, become connected to the Almighty, and rise toward its true civilization?

The Foundation Is Atma Gyaan

Everything begins with knowledge — but not ordinary knowledge. It begins with *atma gyaan*, knowledge of the soul. The soul must come to know who it is, where it has come from, why it has come, and where it must return.

Bapuji says: when meditation deepens, the soul awakens. When the soul awakens, *atma gyaan* arises. The soul begins to perceive its own nature. It can then go back to where it came from — and it can begin to recover its lost power, up to the original measure that it brought with it into this birth.

Yog Maane Connection

Bapuji explains *yog* in the simplest possible way. *Yog* means connection. When a soul, established in its true form, links itself with the Almighty, that linking is *yog*. Through this connection, power flows from the supreme source into the soul. The *avarana* — the layers of ignorance — begin to dissolve. The *vikarma* — the accumulated wrong impressions — begin to be cleansed. The *kaaran sharir* begins to charge.

◆ **Insight: “Yog maane connection.”**

“Yog means connection.”

Becoming Bhavatit, Karmatit, Gunatit

As the *kaaran sharir* charges, the soul rises beyond its old conditions. It becomes *bhavatit* — beyond emotional turbulence. It becomes *karmatit* — beyond the bondage of

karma. It becomes *gunatit* — beyond the three *gunas* of nature. This is the inner transformation that no machine, no chip, no rocket can produce. It can only be earned through long, devoted, inner work.

Patience and Practice

Bapuji is honest about the time required. To become a doctor or chartered accountant takes four or five years of disciplined study. To become *atma swarup* takes much more — years of immersion in *gyan sagar*, the ocean of knowledge; constant churning of thought; sustained connection in *yog*. The reward, however, is incomparable. A worldly degree has no value after death. The realisation of the soul carries through every life, every realm, into eternity itself.

♦ **Insight: “Gyan sagar mein doobe, vichar sagar manthan kare.”**

“Immerse in the ocean of knowledge; churn the ocean of contemplation.”

The Wave That Is Coming

Bapuji ends the discourse with a stirring vision. Just as a wave of Ram swept over the country overnight when the great consecration took place, so a wave of *behad ka param gyan* will one day sweep across the world. It only awaits the awakened children to carry it.

If the *behad* souls take up the work of *Gyan Daan Maha Daan* with full devotion — if they share this knowledge widely, freely, generously — then in a single day the world can be filled with it. The supreme knowledge can become visible everywhere. The transformation can begin in earnest.

♦ **Insight: “Yahan exchange offer hai — tum sukh do aur behad ki param light le lo.”**

*“Here there is an exchange offer — give happiness, and
receive the supreme light of behad.”*

The path is clear. Awaken the soul. Connect with the Almighty. Receive the *param light*. Share the knowledge. And so help bring this very mortal world — this Earth that we walk on — into its destiny as *amar lok*, the immortal world. That is the journey from Type 1 to Type 40 and beyond. That is the ultimate civilization.

Bapuji Insights

· ★ ·

Collected here are the powerful sayings of Bapuji that appeared throughout the chapters of this book. Each insight is presented first in Bapuji's own Hinglish words, followed by the English translation.

From Chapter One

♦ **Insight:** “Civilization ka jo science walon ka matlab hai — power. Power kitni use kar sakte hain.”

“What science means by civilization is power — how much power can be used.”

From Chapter Two

♦ **Insight:** “Dharti par abhi bhi sabhyata mein zero hain.”

“On Earth, we are still at zero in civilization.”

From Chapter Three

♦ **Insight:** “Pure brahmand mein jo bhi atma hai, zyaada Type 1 civilization wali hai.”

“Most souls in our entire solar system belong to the Type 1 civilization.”

From Chapter Four

♦ **Insight:** “Maha Shakti — Brahmand ki Adi Shakti, Maha Brahmand ki Adi Shakti.”

“Maha Shakti is the Original Power of the solar system, the Original Power of the galaxy.”

From Chapter Five

♦ **Insight:** “Vo jo unko black hole dikhta hai, vo actually param light hai.”

“What appears to them as a black hole is actually the supreme divine light.”

From Chapter Seven

♦ **Insight:** “Multiverse maane sau kala ka. Multiverse ko cross karna hai to aapko sau kala se zyada chahiye.”

“The multiverse is of one hundred kala. To cross the multiverse, you need more than one hundred kala.”

From Chapter Eight

♦ **Insight:** “Kala ek power hai.”

“Kala is a unit of power.”

From Chapter Nine

♦ **Insight:** “Anant koti brahmand — anant prakar koti maane prakar.”

“Infinite koti brahmand — koti also means kinds, so it means infinite kinds of solar systems.”

From Chapter Ten

♦ **Insight:** “Hara jagah mrityu lok hai. Har jagah manushya hain.”

“Everywhere there are mortal worlds. Everywhere there are human beings.”

From Chapter Eleven

♦ **Insight:** “Atma par avaran chadhe hain — uske kaaran sharir, maha kaaran sharir, sab dhanke hain.”

“Layers cover the soul — and so the causal body and the great causal body all remain veiled.”

From Chapter Twelve

♦ **Insight:** “Param tatva ke saadhan ko hum manushya dekh nahin paate.”

“We humans cannot see vehicles made of supreme elements.”

From Chapter Thirteen

♦ **Insight:** “Ek manushya ki tarah saat insaan ho sakte hain — saat nahin, saat hazaar bhi ho sakte hain.”

“Just as one human can have seven counterparts — not seven, even seven thousand are possible.”

From Chapter Fourteen

♦ **Insight:** “Maha kaaran sharir mein record hai — agar khul jaata hai to galaxy mein ud rahe ho, aisa anubhav ho sakta hai.”

“There is a record in the great causal body — if it opens, you may experience flying through a galaxy.”

From Chapter Fifteen

♦ **Insight:** “Free will to nahin ho sakti jab tak atma na ho.”

“There can be no free will until there is a soul.”

From Chapter Sixteen

♦ **Insight:** “Atma swarup banenge to param light aayegi.”

“When you become atma swarup, the supreme light will come.”

From Chapter Seventeen (a)

♦ **Insight:** “Param light ki atma ko kaal agni jala nahin sakti.”

“Kaal agni cannot burn a soul of supreme divine light.”

From Chapter Seventeen (b)

♦ **Insight:** “Yeh mrityu lok hi paramdham banega, yeh mrityu lok hi amar lok banega.”

“This very mortal world will become Paramdham; this very mortal world will become the immortal world.”

From Chapter Eighteen (a)

♦ **Insight:** “Yog maane connection.”

“Yog means connection.”

From Chapter Eighteen (b)

♦ **Insight:** “Gyan sagar mein doobe, vichar sagar manthan kare.”

“Immerse in the ocean of knowledge; churn the ocean of contemplation.”

From Chapter Eighteen (c)

♦ **Insight:** “Yahan exchange offer hai — tum sukh do aur behad ki param light le lo.”

“Here there is an exchange offer — give happiness, and receive the supreme light of behad.”

Glossary

The following terms appear throughout this book. Definitions are kept short and simple to help readers new to Bapuji's knowledge.

Atma — The soul. A point of conscious energy. Our true self, beyond the body.

Paramatma — The Supreme Soul. A creator who has the power to bring forth many souls.

Almighty — The Supreme Father, the master creator of the entire boundless cosmos. The ultimate source of power for all creations.

Kala — A unit of measurement of soul power. The higher the kala, the higher the power of the soul or creator.

Sankalp — A pure thought, intent, or affirmation. A high-kala soul can create through sankalp itself.

Nirakari — The formless state of the soul, the state of pure divine light. The original incorporeal stage of every soul.

Akari — A subtle form, not physical. Created by the energy of a soul rather than by gross matter.

Sakari — A physical form. The dense expression of the soul in the world of five elements.

Tatva — Element. The basic constituents of the visible world: earth, water, fire, air and ether.

Param Tatva — Supreme element. Far finer and more powerful than ordinary tatva. The matter from which advanced cosmic vehicles are made.

Param Light / Param Prakash — Supreme divine light. The energy of a soul in its incorporeal form. The highest level of energy in creation.

Param Maha Tatva — The supreme great element, present around param prakash. The highest level of element after param prakash itself.

Brahmand — A solar system. One unit of creation.

Maha Brahmand — A galaxy. Made up of countless solar systems.

Param Maha Brahmand — A universe. Made up of countless galaxies.

Multiverse — The realm beyond a universe, containing infinite universes within layered structures (G1 to G17 in Bapuji's knowledge).

Paramdham — The supreme abode of a solar system. The topmost dimension where Shiv resides. A world of pure divine light.

Maha Paramdham — The supreme abode of a galaxy. Resides at its central point and is of approximately ten kala.

Param Maha Paramdham — The supreme abode of a universe. Of around sixteen kala.

Behad ki Kala ka Paramdham — The supreme abode of the highest dimension of creation, of immeasurable infinite power. The abode of the Almighty.

Shiv / Maha Shiv / Param Maha Shiv — The incorporeal creator of a solar system / galaxy / universe respectively.

Shakti / Maha Shakti / Param Maha Shakti — The original feminine power at the level of a solar system / galaxy / universe.

Adi Shakti — The original or primordial feminine power of a creation. The mother even of Brahma, Vishnu and Shankar.

Behad — Limitless, infinite, boundless. The opposite of had — the limited.

Had — Limited, bounded. Refers to creations or knowledge that have boundaries.

Behad ki Atma — A soul constituted only of param prakash and param maha tatva. A very powerful soul. A behad soul.

Had ki Atma — Common souls of low power, made up of subtle elements and not containing supreme light.

Behad Gyan — The supreme infinite knowledge of the Almighty and the boundless creation. The ultimate knowledge from beginning to end of all creation, not previously written or taught anywhere on Earth.

Param Gyan — Supreme knowledge realised by a master in deep meditation.

Atma Gyaan — Knowledge of the soul. The realisation of who one truly is.

Atma Swarup — Established in the soul-conscious state. Identified with one's true nature as soul, not body.

Yog — Connection. The connection of the awakened soul with the Almighty, through which power flows.

Sookshm Jagat / Subtle World — The world of subtle elements, finer than the gross five-element physical world.

Sthool Jagat / Gross World — The visible physical world made of the five gross elements.

Mrityu Lok — The mortal world. The world of birth and death — the world we live in.

Amar Lok — The immortal world. The eternal divine world that this Earth is destined to become.

Loka — A layer or dimension of creation within a brahmand or higher structure. Examples include Bhu-loka (Earth), Bhavar-loka, Swarg-loka, Maha-loka, Jana-loka.

Brahmapuri / Vishnupuri / Shimpuri — Higher subtle realms within a solar system, the abodes of Brahma, Vishnu, and Shiv respectively.

Devta — A celestial being of higher dimension within our solar system.

33 Koti Devta — The 33 koti (categories or crores) of celestial beings spoken of in Sanatan tradition.

9 Lakh Behad Souls — The nine hundred thousand elevated behad souls who have come to Earth at this time to play a key role in its transformation.

Vimaan / Yaan — A divine vehicle. In higher civilizations, made of param tatva or param light. Operates by mind, not by fuel.

Man Ki Gati — Mind-speed. The speed at which divine vehicles travel — instantaneous, governed by the mind of their master.

Anant Koti Brahmmand — Infinite crores — and infinite kinds — of solar systems. Refers to the limitless variety and number of brahmmands.

Yuga — A cosmic age. The four yugas in cycle: Satyug, Treta, Dwapar, Kaliyug. Together they form one Chaturyug.

Satyug — The Golden Age. The age of truth, when Earth itself is at the level of higher civilization.

Kaliyug — The Iron Age. The current age of confusion, suffering, and forgetfulness of the soul.

Roop — A clone or projection of a soul, sent forth from the original soul to act in lower realms. Reduces the original power of the source soul.

Pralay — Dissolution of a creation.

Mahakaal Pralay — The great cosmic dissolution, when Mahashiv as Mahakaal draws back infinite solar systems into the source.

Kaal Agni / Maha Kaal Agni — The fire of dissolution. Burns the world at the time of pralay. Cannot touch a soul of param light.

Avaran — Layers or coverings over the soul that hide its true power and identity.

Vikarm — A wrong action or sin, which leaves a record on the soul and its causal body.

Karan Sharir / Kaaran Sharir — The causal body. Holds the records of past and future lives within one brahmand. Charging the kaaran sharir is essential for inner transformation.

Maha Karan Sharir / Maha Kaaran Sharir — The great causal body. Holds the records of soul experiences across higher dimensions.

Bhavatit — Beyond emotional turbulence; without ordinary feelings and reactivity.

Karmatit — Beyond all karmic bondage; free from the law of karma.

Gunatit / Nirgun — Beyond the three gunas (satva, rajo, tamo) of nature. The pure soul-conscious state.

Vyakt — The visible manifested world of five elements.

Avyakt — The invisible subtle and supreme subtle world of creation.

Mukti — Freedom. In Bapuji's knowledge, the stage when a soul dissolves into its creator and no longer exists separately.

Jeevan Mukti — Freedom from all karmic accounts while still living. The soul has full knowledge of its creator and exists in blissful eternal connection.

Bhoot-Pret-Pishach — Subtle entities of the lower three-element subtle world.

Akash Ganga — The Milky Way — our galaxy.

Niharika — A nebula; in Bapuji's usage, a structure where many galaxies join together at a higher level — equivalent to a universe.

Gyan Daan Maha Daan — Sharing knowledge is the highest charity. The principle by which Bapuji's teachings are freely shared with all.

Samadhi — The deep meditative state of superconsciousness in which the soul realises its true nature.

Sanskar — The character or imprint of a soul, recorded in its causal body. Sanskar shapes the working of the mind.

Param Shanti — Supreme peace. The original state of the soul. The ultimate goal of every soul's journey.

“Gyan Daan Maha Daan”

*Who Lives in Type 1 to Type 40 Civilizations · Bapuji Dashrathbhai
Patel*

*Sharing Knowledge is the Highest Charity
— Bapuji Dashrathbhai Patel*

The universe is filled with
civilizations far beyond
human imagination.

From planetary beings to multiversal intelligences,
this book explores the hidden hierarchy
of **Type 1 to Type 40** civilizations through
the divine spiritual knowledge of
Bapuji Dashrathbhai Patel.

Discover the mysteries of advanced souls,
cosmic dimensions, higher worlds,
param light, kala, UFOs, parallel realities,
and the infinite structure of creation itself.

A mind-expanding journey into
the spiritual science of the multiverse.
