About Bapuji

Bapuji (full name: Bapuji Dashrathbhai Patel, also lovingly called “Dadaji” by the younger generation) was born in 1956 in the small village of Akhaj in the Mehsana district of Gujarat. However, he spent his childhood in another village named Ambasan, also located in the Mehsana district.

In the early part of his life, he was a highly successful lawyer. Later, he devoted his life to realizing the supreme spiritual truth and bringing this divine knowledge forward for the welfare of humanity. Today, this supreme knowledge serves as a guiding light for true seekers to realize their ultimate destiny. It is a blessing of the highest divinity that the present time is witnessing the rise of this supreme spiritual knowledge, guiding souls on Earth to return to their original source.

Despite being raised in a very poor family and facing challenging circumstances, Bapuji had a deep desire to transform this sorrowful and suffering world into a better place. At the young age of six, he questioned God repeatedly, asking why God remained silent about the suffering of humanity. This intense longing to end human suffering eventually led him to attain the highest level of spirituality later in life.

Even as a child, Bapuji would spend hours alone in the fields, often neglecting his own comfort. Due to poverty, he would walk barefoot without shoes or sandals, frequently getting pricked by thorns. Many times, he would stay late in the fields and, on his way back home, encounter subtle world entities. These experiences sparked his interest in communicating with subtle world souls.

Bapuji was courageous from a young age, which helped him overcome many obstacles. Alongside his studies in chartered accountancy (CA), he gave tuition classes to support himself financially. Later, he completed his Bachelor of Law (LLB) degree and became a well-known lawyer in Ahmedabad.

In 1997, he established a spiritual institution called “Vishwa Parivartak Ishwariya Vidhyalay” in Chenpur, Ahmedabad, with the mission of transforming this mortal world, filled with suffering and disorder, into an eternal divine world of immortality. Smt. Sushma Tandon, lovingly known as “Maa,” worked alongside Bapuji in this grand divine mission.

To accomplish this mission, Bapuji worked tirelessly, dedicating all his resources to this divine purpose. During that time, he would deliver continuous spiritual

discourses for up to 18 hours without rest. In these discourses, he explained the highest dimensions of divine knowledge, which he realized through deep meditation and divine vision in a state of superconsciousness. This knowledge goes beyond the imagination of the ordinary human mind.

Bapuji's teachings cover a vast range of topics, including the types of celestial creators across different dimensions, the creation of our solar system, galaxy, and universe, and most importantly, the transcendental knowledge of the multiverse and realities beyond it. His knowledge is supremely profound and is intended for highly evolved seekers, referred to as "behad souls." According to Bapuji, these "behad souls" will play a key role in transforming this mortal world into an eternal divine realm.

At present, Bapuji remains deeply engaged in intense meditation and samadhi for long hours. He does not meet anyone, as he is continuously immersed in his transcendental mission in a superconscious state.

Preface

This book contains the spoken wisdom of Bapuji Dashrathbhai Patel on one of the deepest questions a human being can ask: Who is the Almighty Authority?

It is not a philosophical exercise. It is an invitation — to expand your awareness beyond the ordinary world, to ask the questions that only the deepest souls ask, and to connect with the Supreme Source of all that exists.

Read slowly. Think deeply. Let the knowledge settle.

Note on the Source Discourse

This book is based on a spoken discourse delivered by Bapuji Dashrathbhai Patel.

The original words have been lightly refined for written readability. Conversational repetitions and fillers have been carefully removed. No knowledge has been added, altered, or removed. The meaning remains exactly as Bapuji conveyed it.

Chapter 1

The One Who Owns All Worlds

‘Who is the Almighty Authority?’

This is not an ordinary question. Not everyone will think to ask this question. It will not arise in every mind. Only a soul of high soul power and higher quality, a soul of boundless awareness, will feel drawn to ask it at all.

To know, recognise and understand Almighty Authority requires, what Shri Bhagwat *Gita* calls *vishaal buddhi* — a vast and expansive intelligence. Those with a limited or narrow intellect will not be able to grasp what is shared here.

Almighty Authority / Father of Infinite, descended only once in this multiverse to deliver infinite knowledge, guiding transformation from a 160 million light-years-wide manifested world into its unmanifested, original state. Father of the Infinite, descends into the corporeal (*sakar*) world through a journey from *Paramdham* to *Moolvatan*, to *Sukshma Vatan*, and finally into the world of five gross elements. All that is created in this gross world has its origin in subtle thought. Just as a house is first designed in the mind before being built, the universe too was first created in thought-form.

The *Almighty Authority* has already descended. He has come to wind up this infinite world drama and restore supreme peace. In the end, all merges into the supreme soul — the eternal supreme light

This is not a criticism. Just as not everyone becomes a doctor or an engineer, not everyone walks the path of this knowledge. This is a path for those whose awareness reaches naturally beyond the everyday world.

Chapter 2

From Shiv to the Almighty — A Cosmic Hierarchy

To understand who the Almighty Authority is, we must first understand the cosmic structure — as both our scriptures and modern science have described it.

Cosmic Hierarchy According to the Shastras

Parabrahm (Supreme Father):

Parabrahm is described as the ultimate, formless, eternal source of all existence. He is beyond attributes, beyond time, beyond birth and death, and beyond the grasp of the ordinary mind. Para Brahm exists as pure consciousness and supreme authority over the entire behad creation — the infinite and boundless multiverse.

The Almighty Authority resides in the highest Paramdham in a completely *Nirakari* (formless) state. Just as Shiv is understood in different levels of manifestation — *Nirakari* (formless), Aakari (subtle form), and Saakar (manifested through avatars) — the Supreme Father too possesses levels of existence far beyond human comprehension.

From Parabrahm emerges the vast cosmic structure of creation, including countless universes, dimensions, lokas, energies, and souls. He remains untouched by creation while simultaneously being the source of all existence.

Paramatma, Param Maha Shiva, and the Cosmic Order

According to the Shastras, Paramatma, also called Param Maha Shiva, is created by Para Brahm. Param Maha Shiva is regarded as the soul-conscious governing intelligence of a universe and the originator of souls.

The hierarchy of creation is described in multiple cosmic layers:

- Param Maha Shiva governs one universe.
- From Param Maha Shiva emerges Maha Shiv.
- Maha Shiv governs one galaxy, such as what modern science calls the Milky Way.

- Shiv governs one Brahmand, understood here as one solar system.

Science itself recognizes billions of galaxies spread across the visible universe, and theories suggest the existence of countless unseen universes beyond human observation. Spiritual teachings describe this as an infinite chain of Great Universes, Great-Great Universes, and even higher cosmic dimensions that language itself struggles to describe.

Shiv then manifests the Trimurti for the functioning of creation:

- Brahma — the creator (Srishti Karta)
- Vishnu — the preserver (Palankarta)
- Shankar or Rudra — the destroyer (Vinashkarta)

The teachings emphasize that Shiv and Shankar are not the same. Shiv is the higher formless consciousness, while Shankar represents a manifested aspect or avatar expression operating within creation.

Infinite Universes, Dimensions, and Souls

The Shastras describe existence as an immeasurable multiverse filled with countless universes, galaxies, solar systems, and dimensions. Every universe is said to operate under its own cosmic hierarchy and divine administration. Bapuji confirms this repeatedly in all his teachings

Each Param Maha Shiva creates and governs a universe. Within that universe, Maha Shiv governs galaxies, and further manifestations oversee solar systems and lokas. This structure continues endlessly across visible and invisible realms.

Souls themselves are described as existing in multiple forms:

- Gross or Physical Form — experienced in the earthly realm
- Subtle (Sukshma) Form — existing in astral dimensions and subtle lokas
- Causal (Karana) Form — existing as thought-energy and deeper consciousness

Life exists not only on the physical plane but also in subtle and causal dimensions far beyond ordinary human perception. The teachings explain that beings across all these dimensions are interconnected within the greater cosmic system.

The Suffering of Souls and the Need for Higher Understanding

According to Bapuji, beings across physical, subtle, and causal realms are presently experiencing suffering, confusion, and spiritual decline. Humanity is

not alone in this condition. Even higher souls, subtle beings, and entities dwelling in unseen dimensions are described as crying out to the Divine for liberation from darkness and sorrow.

The teachings state that all beings are ultimately seeking freedom from the endless cycle of suffering, ignorance, and karmic bondage. Their collective call is directed toward the Almighty Source, asking for restoration, awakening, and supreme peace.

To understand this cosmic reality fully, one must study and realize:

- The Kalchakra (Cycle of Time)
- The distinction between Shiv, Shankar, Maha Shiv, Param Maha Shiv, and higher cosmic levels
- The origin of the soul (Atma)
- The journey of consciousness across the multiverse and through countless births and dimensions

These teachings present creation not as a limited physical universe, but as an infinite spiritual reality filled with layers of consciousness, divine hierarchies, and evolving souls moving through the eternal journey of existence.

Chapter 3

Who was Shiv, Krishna, Ram, Kalki and Almighty Authority

According to the deeper spiritual knowledge explained by Bapuji Dashrathbhai Patel and Behad Ka Gyan, humanity has often understood divine personalities only from the level of scriptures, traditions, and limited spiritual dimensions. However, beyond the common understanding exists a vast hierarchy of consciousness, cosmic powers, and infinite realities. To understand Kalki, Krishna, Ram, Shiv, and Almighty Authority correctly, one must first understand the difference between a brahmand, galaxy, universe, and multiverse.

Shiv is described as the controller of one Solar System or one cosmic system. He operates creation through the powers of Brahma, Vishnu, and Shankar. Brahma creates, Vishnu sustains, and Shankar dissolves, but all three function through the energy and authority of Shiv. However, even Shiv exists within the cycle of time. The four yugas — Satyug, Treta Yug, Dwapar Yug, and Kaliyug — apply to the brahmand controlled by Shiv. When imbalance increases and the power of Shiv weakens, he eventually creates Kalagni and dissolves his Solar System *brahmand* into himself. Therefore, Shiv is immensely powerful, but according to Behad Ka Gyan, he is not beyond time.

Beyond Shiv exists Mahashiv. Mahashiv is not the controller of a single brahmand but the controller of One Galaxy consisting multiple solar system. One second of Mahashiv is said to equal one hundred years of Brahma. This means the speed of time changes completely at higher dimensions. Mahashiv can create and dissolve infinite brahmands within his own cycle. Yet even Mahashiv is not considered the final supreme authority because galaxies themselves also have limited duration.

Above Mahashiv exists ***Param Mahashiv***, who governs universes consisting innumerable galaxies. But according to this knowledge, even universes and multiverses eventually face imbalance. Therefore, beyond all these levels exists the Supreme Infinite Consciousness known as Parbrahm Param Ishwar or Almighty Authority — the Father of the Infinite. He is beyond the cycles of time, beyond destruction, beyond any category of shiv, beyond galaxies, and beyond

multiverse limitations. He is described as the ocean of supreme love, supreme peace, supreme light, supreme knowledge, and infinite compassion.

In this understanding, Lord Ram and Lord Krishna are not viewed merely as incarnations of Vishnu in the traditional sense. Bapuji explains that Krishna was an incarnation of Almighty Authority himself. If Krishna had been only an incarnation of Vishnu, then Brahma and all higher divine beings would already have known about his descent. Yet scriptures themselves show that Brahma did not fully recognize Krishna's true identity. Krishna demonstrated powers beyond the ordinary functions of Vishnu, including recreating all the cows and companions taken away by Brahma. Therefore, Krishna is described as an incarnation of Parbrahm Param Ishwar — Almighty Authority.

Similarly, Lord Ram is also understood as an incarnation of supreme immortal divine power. Ram did not merely establish a kingdom; he demonstrated the compassionate power of transformation. Through his touch, Ahilya regained her original form from stone. This symbolizes the power of supreme consciousness to restore fallen souls to purity. Ram and Krishna both came to uplift humanity, but according to *Behad Ka Gyan*, the complete transformation of the multiverse was still not accomplished during their time. Hence this time Almighty Authority himself has come on earth to complete the transformation.

Kalki Avatar is explained differently in this knowledge. Traditional scriptures describe Kalki riding a white horse with a sword to destroy negativity at the end of Kaliyug. However, Bapuji explains that the white horse symbolizes supreme divine knowledge and the sword symbolizes the destruction of ignorance through spiritual wisdom. Therefore, Kalki is not merely a warrior figure but a symbol of supreme consciousness and transformation. Yet Bapuji further explains that before the supposed arrival time of Kalki Avatar after 4,28,000 years, the world itself will already undergo massive transformation through the direct intervention of Almighty Authority.

According to this understanding, Almighty Authority himself is secretly working for the transformation of Earth, universes, and multiverses. This transformation is not based on destruction, fear, or annihilation but on the descent of supreme light, supreme elements, and supreme vibrations. The purpose is to elevate souls, purify consciousness, and transform creation into a world of Paramshanti — supreme peace.

Thus, Shiv governs a brahmand, Mahashiv governs galaxies, Param Mahashiv governs universes, Ram and Krishna represent incarnations of supreme divine authority, while Almighty Authority stands beyond all dimensions as the eternal

source of all existence. Kalki represents the final spiritual transformation of consciousness rather than merely a physical event. The ultimate teaching is that humanity must rise above narrow religious thinking and understand the infinite nature of existence, consciousness, and divine reality.

Chapter 4

The Knowledge That Reveals Him

The Gita says clearly नाहं वेदैर्न तपसा न दानेन न चेज्यया।
शक्य एवविधो द्रष्टुं दृष्टवानसि मां यथा॥ (11.53)

*nāhaṁ vedair na tapasā na dānena na cejyayā śakya evaṁvidho draṣṭuṁ
dṛṣṭavān asi mām yathā* (11.53)

भक्त्या त्वनन्यया शक्य अहमेवविधोऽर्जुन।
ज्ञातुं द्रष्टुं च तत्त्वेन प्रवेष्टुं च परन्तप॥ (11.54)

*bhaktiā tvananyayā śakya aham evaṁvidho 'rjuna
jñātuṁ draṣṭuṁ ca tattvena praveṣṭuṁ ca parantapa* (11.54)

"Neither by studying the Vedas, nor by austerities (tap), nor by charity, nor by ritualistic sacrifices (jap/yagya), can I be seen in this form as you have seen Me. (11.53) However, **by single-minded devotion (bhakti/gyan) alone**, O Arjuna, I can be known as I am, seen in reality, and entered into." (11.54)

The Gita further affirms: श्रीमद्भगवद्गीता (अध्याय 7, श्लोक 18) में भगवान श्री कृष्ण कहते हैं कि ज्ञानी भक्त मुझे अत्यंत प्रिय हैं, क्योंकि वे स्थिर बुद्धि वाले हैं और मुझे ही अपना सर्वस्व मानकर मेरी शरण में रहते हैं, इसलिए ज्ञानी मेरा ही स्वरूप हैं। — the soul endowed with true knowledge is especially dear to the Supreme.

This is a significant teaching. All practices have their place. But the Almighty Authority is revealed only through knowledge — specifically, the boundless knowledge, the *Behad Ka Gyan*. To receive this knowledge, one must immerse not in a *Gyan Ganga* — a river of knowledge — but in a *Gyan Sagar* — an ocean of knowledge. A river gives only surface-level understanding. It is the ocean that truly transforms.

Vichaar Sagar Manthan — churning the ocean of thought — is required. One must reflect on time in its boundless scale: the cycles of *Satyug*, *Treta*, *Dwapar* and *Kalyug*. The *Ardh Pralay*. The *Pralay*. The *Kalp Pralay*. The *Mahaa Kalp Pralay*. In the span of Brahma's one hundred years, entire *Bramands* dissolve and are recreated.

According to Infinite Knowledge, creation is not a one-time event limited to a single universe. Bapuji repeats infinite times in all his teachings that “प्रतिपल अनंत-अनंत ब्रह्मांड बनते-बिगड़ते हैं” — at every moment, infinite universes are continuously being created and dissolved. This process is eternal, beginningless, and beyond the grasp of ordinary worldly intellect. What human beings perceive through physical senses is only a tiny fragment of an immeasurable cosmic reality operating across infinite dimensions, lokas, galaxies, and subtle planes of existence.

Infinite Knowledge (*Behad Gyan*) explains that creation functions through a vast hierarchical order of divine consciousness. Shiv governs and creates localized brahmands or solar systems. Above Shiv exists Mahashiv, who governs galaxies and directs immense cycles of creation (*laya*) and dissolution (*vilaya*). Beyond Mahashiv is Param Mahashiv, the supreme cosmic source from whom countless Mahashivs, universes, and cosmic systems emerge. Param Mahashiv continuously renews and empowers the higher cosmic structure. When Mahashiv activates all supreme elements (*Param Tatva*) within Himself, He manifests as Mahakal — the great force of supreme time, transformation, and dissolution.

The rhythm of existence itself moves through *laya and vilaya*. *Laya* refers to manifestation — the emergence of form, worlds, beings, and dimensions from subtle consciousness into expression. *Vilaya* is the reverse movement, where forms dissolve back into their subtle causal state. According to the deeper spiritual understanding of Behad Gyan, this process is occurring every moment across infinite creations simultaneously. Countless worlds arise, sustain themselves for a period, and dissolve back into subtle existence in an endless cosmic pulse.

Such knowledge cannot be fully understood through ordinary intellectual reasoning alone. It requires *Behad Ki Buddhi* (Boundless Intelligence)

Infinite Knowledge (*Behad Gyan*) further teaches that one must contemplate the higher realities of Param Prakash (Supreme Light), Param Tatva (Supreme Element), Param Aakash (Supreme Ether), Param Vaayu (Supreme Air), and Param Agni (Supreme Fire). These are not merely physical elements but divine, subtle, conscious forces underlying existence itself. The subtle world continuously influences, governs, and sustains the *Sthool Jagat* (physical world). What manifests physically first exists in subtle form. Thus, the visible universe is only the outer expression of deeper invisible realities.

All these teachings together form only a small portion of the immense ocean known as Behad Ka Gyan — the boundless spiritual wisdom concerning creation, consciousness, time, the soul, and the infinite multiverse.

Who Was Sri Krishna

Throughout history, the divine **Leelas (miraculous acts) of Lord Krishna** have fascinated millions of people. Stories such as **lifting Govardhan Mountain, using the Sudarshan Chakra, defeating powerful demons, and manifesting multiple forms** are widely known through scriptures like the Vedas, Puranas, and epics. **Bapuji explained the deeper spiritual science behind Krishna's miracles**, clarifying that these events are not imaginary tales but expressions of divine power that ordinary human understanding cannot easily grasp.

Bapuji confirms that Shri Krishna is not viewed merely as a historical king, divine child, or religious figure limited to one era. He is described as a highly awakened divine consciousness who descended with a specific cosmic purpose during the Dwapar Yuga to Initiate transformation of this creation into supreme elements from Gross physical world. To give infinite knowledge to higher level souls about soul consciousness and journey back home.

Krishna as the Avatar of the Supreme Almighty Authority

According to Bapuji, **Shri Krishna was an avatar of the Almighty Authority**. When the Supreme Power manifests in human form, it operates on two levels:

1. **Visible physical form** – the human body that people see. (*Sakar Sharir*)
2. **Invisible divine form** – a subtle, powerful form composed of supreme light and divine elements. (*Aakaar Sharir*)

This invisible divine form performs the extraordinary actions associated with avatars. Because this divine form operates at a higher spiritual dimension, ordinary human logic cannot easily comprehend it.

Bapuji emphasizes that Krishna's life cannot be understood only through literal stories. Many events connected with him — the Vishwaroop Darshan, the Bhagavad Gita, the Raas Leela, and his divine attraction — are interpreted as symbolic representations of deeper spiritual truths. Krishna represents the

awakened state where consciousness becomes fully aligned with divine intelligence, love, detachment, and cosmic duty.

The Spiritual Science Behind Govardhan Mountain

One of the most well-known divine events associated with Shri Krishna is the lifting of Govardhan Mountain to protect the people of Vrindavan from devastating rainfall. According to Bapuji's explanation in Behad Gyan, this event was not merely an act of physical strength, but an example of advanced divine spiritual science and mastery over subtle energies.

Krishna did not lift the mountain through muscular power in the ordinary human sense. Instead, through divine yogic energy, the dense physical structure of the mountain was transformed into a subtle, light-like energetic state. Its gross material heaviness was altered at the subtle level of existence. Once the mountain's structure shifted from dense matter into a lighter energetic form, it could be supported effortlessly.

In this understanding, what appeared to ordinary people as a supernatural physical miracle was actually the application of higher spiritual power capable of influencing and transforming matter itself. Behad Gyan teaches that advanced divine consciousness can interact directly with the subtle energies underlying physical reality, allowing matter to be manipulated in ways beyond normal human understanding.

The Reality of Sudarshan Chakra

Another powerful symbol in Krishna's Leelas is the **Sudarshan Chakra**, which was used to destroy evil forces such as Shishupal and other demons. Bapuji describes the Sudarshan Chakra as:---A **light-based spiritual weapon**---Created through **divine resolve or Sankalp**---Manifested as a rotating form of spiritual energy

When Krishna willed it, the Sudarshan Chakra appeared and carried out its task before dissolving again into subtle energy. This demonstrates that **divine beings operate through spiritual energy rather than physical weapons**. Whatever is written in the scriptures, whether it is Vedas or Upanishads, but it is the story of one universe. In our Vedas and Upanishads, it is the story of one universe, one solar system. Here, Krishna is the avatar of almighty authority.

The miracles of Lord Krishna described in scriptures are not simply imaginary stories. According to spiritual teachings, they represent the actions of **divine consciousness operating through higher cosmic laws and spiritual energy**

Modern humans may doubt these events due to limited understanding and weakened spiritual perception. Yet ancient scriptures, sages, and spiritual traditions consistently describe a universe filled with **subtle worlds, powerful souls, and divine forces**.

Chapter 5

Two Kinds of Souls

Bapuji draws a clear distinction between two kinds of souls.

The first is the *Hudh Ki Aatma* — the limited soul. This soul is absorbed in the ordinary world, in Illusion (*Maya*). It has no interest in what lies beyond. Its questions remain within the boundaries of everyday life. *Behad* — the boundless — simply does not concern it.

The second is the *Behad Ki Aatma* — the boundless soul. This is the high-quality soul. When it looks at the night sky and sees the stars, something stirs within it. *These stars are vast suns — who made them? Who made this Creation? Who created all of this? Where does soul travels?* These questions arise naturally in such a soul. It moves from wondering at the cosmos to seeking the one who created the cosmos. It looks at what science calls galaxies and universes, and then wonders: what is *Anant Koti Bramand*? Who is *Mahashiv*? Who is *Param Mahashiv*? Why do we celebrate *Mahashivratri*?

These are the questions of a *Behad Ki Aatma*. This knowledge is meant for such souls.

Chapter 6

Why You Must Know the Almighty Authority

Knowing the Almighty Authority is not an intellectual exercise. It leads to *Yog* — connection. *Yog* means connection. Those who practise *Shiv Yog* connect with *Shiv*. Those who practise *Mahashiv Yog* connect with *Mahashiv*. In the same way, when you truly know and recognise the Almighty Authority, you connect with Him.

Without knowledge Life is Wasted

Bhagavad Gita, where Lord Krishna declares that nothing is greater than spiritual knowledge. Knowledge purifies the intellect, transforms sanskars (deep impressions), and ultimately leads the soul toward liberation.

Through devotion, you may definitely receive results, but only through knowledge can you reach the Supreme Being. Knowledge is supreme. Knowledge is the highest. There is nothing more purifying than knowledge.

There is nothing more purifying than knowledge. So if one want to become pure, if one want to become spiritually purified, if one want to attain the supreme state, then: the mind must become pure, the intellect must become pure, and sanskars (deep impressions/nature) must be transformed.

People become extremely attached to their own patterns and behaviours. They become rigid regarding themselves. That is why meditation becomes very difficult for them. For such people, meditation only means calming the mind temporarily and experiencing a little peace for some time.

Bapuji highlights the importance of final consciousness and constant remembrance of the Divine will only help us become as supreme consciousness. That is the destination. *Uch Te Uch Paramdham* — the highest of all abodes. The *Amarlok* — the imperishable world. A place beyond the cycle of birth and death. A place of *Param Sukh* — supreme peace and supreme joy. You know *Shiv* and you reach *Shiv*. You know *Mahashiv* and you reach *Mahashiv*. You know *Param Mahashiv* and you reach *Param Mahashiv*. You know the Almighty Authority — and you reach the Almighty Authority.

This is why you must know Him.

Chapter 7

The Power of Connection

Bapuji often makes a beautiful distinction that explains why most people, even successful and comfortable people, still feel inwardly restless. He says there are two ways a human being can live — the way of *bhog*, and the way of *yog*.

Bhog means enjoyment, indulgence, the path of using the senses to chase pleasure. It is the way of getting more, having more, consuming more. There is nothing wrong with this in moderation. But when life becomes only *bhog*, a strange thing happens. The more we consume, the emptier we feel. The more we chase, the more tired we become. The senses cannot give us lasting peace because their nature is to want again. The person on the path of indulgence is connected to nature — to the body, name, fame, gross worldly objects. The small self does whatever, it does for enjoyment, for indulgence, for accumulation. And so, instead of peace, it gets tension. Instead of contentment, it gets chasing. Instead of rest, it gets exhaustion.

Yog, on the other hand, means connection. The same human being, when they free themselves from *bhogi* state and rise into their soul state — turning toward the higher self, toward the Source — becomes a *yogi*. The *yogi* is not against the world. The *yogi* simply does not depend on the world for inner peace. The *bhogi* worries. The *yogi* contemplates. *Chinta* (worry) is the result of indulgence. *Chintan* (contemplation) is the result of *yog*. The first one eats us alive. The second one heals us slowly.

This is not a call to leave the world. We have homes, families, work, responsibilities. We must live in the world. But we can live in it differently. We can perform our duties and yet keep the inner connection with the soul and the Source alive. That is the real meaning of *yog*. Action in the world, but anchor in the divine.

Transforming Life

When you establish *Yog* — connection — with the Almighty Authority, what actually happens? Your soul, which has become *Tamo Pradhan* — heavy with accumulated past actions — begins to lighten. The *Vikarm* — the karmic burdens of the soul — begin to dissolve.

Bapuji teaches that the connection with Almighty Authority, draws *Param Prakaash* — Supreme Light — into our soul. Every layer of our being responds: the *Stchool Shareer* (physical body), the *Sookshma Shareer* (subtle body), the *Kaaran Shareer* (causal body), the *Mahaakaaran Shareer* (great causal body), and for those who are truly *Behad Ki Aatmaayen*, even the *Param Mahaakaaran Sharir* — the highest causal body, formed of *Param Tatva* — begins to charge with Supreme Light into Light Body

As *Karma* dissolves, the soul naturally rises into its true form — *Atma Swaroop*. The five *Vikaar* — *Kaam*, *Krodh*, *Lobh*, *Moh*, *Abankaar* (lust, anger, greed, attachment, and ego) — begin to lose their grip. The soul becomes lighter, freer, and more powerful.

First comes *Swa Parivartan* — self-transformation. When the soul stabilises in *Atma Swaroop* and maintains its connection with the Almighty Authority, its ordinary life itself becomes extraordinary. It becomes a *Vishwa Sevaadhaari* — a servant of the world — and a *Vishwa Kalyaankaari* — a benefactor of all. And at the very end of this journey, the soul ascends to the *Behad Ke Avinashi Paramdham* — the indestructible and boundless supreme abode.

Chapter 8

The Goal: World Transformation

Bapuji has given us a phrase that has become the heartbeat of this entire mission. “*Swa parivartan se vishwa parivartan.*” World transformation begins with self-transformation. At first this idea may sound poetic, even unrealistic. How can one quiet person sitting in *yog* actually change the world? The world is so large, so noisy, so troubled. What can one soul do?

Bapuji’s mission is clear: *Poore Vishwa Ka Parivartan* — the complete transformation of this Multiverse. Not through destruction, but through supreme peace vibrations, through higher consciousness, through soul-consciousness living rather than body consciousness.

The aim is to stop the Third World War. To prevent natural calamities. To purify the *Vaayumandal* — the atmosphere — with *Param Tatva*. The transformation of all ordinary elements into *Param Tatva* — Supreme Elements — this is the mission. The Almighty Authority works in a secretive way to bring about this transformation. He cannot be found through rituals, scripture, austerity. He is known only through *Gyan* — through the boundless, indestructible divine knowledge only

When we recognise and connect with Almighty Authority, our thoughts and vibrations shift. The aura around us becomes brighter. Even the people who simply enter our room, home, office begin to feel a quiet calm. They may not know why. They may not even believe in Almighty. But they feel something. Because energy does not lie.

If only a small percentage of souls on this earth begin to live as conscious souls, sending out supreme peace vibrations daily, the collective atmosphere of the world begins to soften. Conflicts ease. Hearts open. New possibilities appear. This is not naïve. This is the deep mathematics of consciousness. Bapuji has called this the path of *world transformation through soul awakenin*

The whole purpose of Bapuji’s knowledge is not to make you dependent on another teacher, another mentor, another healer. The purpose is to make you *self-sufficient*. To make you *self-independent*. To plant inside you the very tools you need to heal yourself, calm yourself, lift yourself, and connect yourself directly to the Source. This is a very important point. A good teacher does not

bind you to themselves. A good teacher gives you wings. The Paramshanti path, as Bapuji has shaped it, is exactly this kind of path. It is offered freely. It is taught simply. And it is designed so that, with time, you no longer need an outer helper to find your inner peace. You become your own helper.

Behad ki Kala ka Paramdhaam: This is the supreme abode of highest dimension of creation whose power is inestimable or infinite. This is the abode of Almighty Authority.

Behad: Infinite — beyond all limits. Behad literally means beyond limits or without boundary. In Bapuji's knowledge, Behad refers to the infinite, boundless dimensions of creation. Key terms: Behad ki Atma (a limitless soul), Behad Gyan (infinite knowledge), Behad Seva (unlimited service), Behad ka Karma (imperishable action).

Brahm Gyan: Complete knowledge of the cosmos from its beginning to its end. Brahm Gyan is the complete knowledge of creation. how it was created, by whom, how it operates across its full cosmic time span, and how it dissolves. Supreme knowledge; the highest spiritual understanding of the ultimate reality.

Brahm: The supreme power that brings a creation into existence. Brahm is not a person. It is an infinite creative intelligence — the supreme power that gives rise to a creation

Brahma: The creator of souls within our solar system; the source through whom Shiv initiates creation. In our Bramand, Brahma created Saptarishis directly from his own being by a single thought-intent (sankalp), creating them in the Akari (form-based) stage from the very beginning.

Brahmand/ Bramand/Brahmands : Our solar system-one unit of creation. In Bapuji's knowledge, Brahmand refers specifically to a solar system-one universe created Shiv. There are countless such Brahmands inside a single galaxy. Our own solar system is our Brahmand. . Each Bramand has a Kala measure.

Buddhi: Intelligence — the faculty of understanding. Buddhi is the intelligence or discerning faculty of the soul. When refined and oriented toward the eternal seed-form, allows the soul to read its own inner records of its journey and ascend. A Brahm Rishi's buddhi is encoded with the direct experience of multiple universes — not because they studied it, but because they lived it across immeasurable cosmic journeys. The higher the soul's purity, the clearer the buddhi.

Gita: *The sacred scripture spoken by the Almighty Authority through the avatar of Krishna.*

Gyan Daan Mahadaan: *The donation of knowledge as the greatest of all donations. The principle under which all of Bapuji's books and teachings are offered freely to humanity.*

Gyan: *Knowledge; specifically, divine or transcendental knowledge.*

Gyani Atma: *The soul that has become the very embodiment of knowledge, no longer merely holding wisdom as belief but living from it directly. From this state, liberation from karma at every level becomes possible.*

Had/ badh/ budh: Limited: *within boundaries. Refers to limited, finite dimensions of creation. Our solar system is part of the Had / bud creation. The spiritual journey is to grow from the limited (Had / bud) toward the infinite (Behad).*

Had/ badh/ budh ki Atma: *Common souls of lower power, whose composition goes up to the element of ether or the supreme ether, without Param Prakash at their core. They are ordinary souls with limited spiritual power and awareness. Most souls on Earth are Had ki Atma*

Incarnation / Avatar: *It is the cell of a supreme soul or soul from higher dimension that is used to carry out specific work on earth. The cell has the energy of supreme soul but it has less energy as compared to roop/clone. Like Vishnu has incarnations on earth like Ram, Parshuram*

Kali Yuga/ Kalyug/ Kaliyuga: *The Iron Age; the fourth and final yuga, lasting 432,000 years. The age of darkness; the final era in the four-age cycle of cosmic time.*

Karan Sharir/ karan Sharir/ Karan sharer: A Causal Body. *A human being has many bodies even though we can see only physical body but there are subtle bodies inside this physical outline which holds the energy of soul and operates the physical body. So gross physical body is only a medium to carry out work of soul. Physical body gets power from subtle body which comprises of ether element , air element and fire element. Subtle body gets power from causal body*

which comprises of ether element only. This is also called karan sharir which is the store house of the details of karmic accounts of a soul.

Krodh: Anger; one of the five vikars.

Maha Brahmand: A galaxy. Our own Maha Brahmand is the Milky Way.

Maha kaal Pralay / Mahakaal Pralay: The Great Dissolution at cosmic scale. Mahakaal Pralaya is the supreme dissolution: The supreme dissolution in which infinite solar system are absorbed back into the Mahashiv; the total of all cosmic dissolutions within the relevant realms, all lokas and all existence back into himself. Only Brahm Rishi souls of 16–20 kala survive this event.

Maha Kaaran Sharir / Mahakaran Sharir: The great causal Body; a dimension deeper than the causal body. This subtle body is corelated to Galaxy.

Maha Paramdham: The great supreme abode at the centre of every galaxy; the home of Maha-Shiv. Often misidentified by science as a supermassive black hole.

Maha shiv/ MahaShiv/ Mahashiva: The owner of a Galaxy and the supreme authority above Shiv, capable of bringing forth infinite Shivs in a single thought. A single moment of Mahashiv equals one hundred years of Brahma.

Maha tattva : The protective shield of great elements that surrounds the soul of Shiv even inside a black hole. Preserves certain cosmic records across the dissolution.

Mool Srot: The original source.

Mool Vatan: The original homeland of the soul in which the transition from the Nirakari (formless) to the Akari (form-based) state first takes place.

Multiverse: The cosmic scale that contains many Universes, Great Universes, Great-great universe upto G17 layers of universe. The architecture of creation extends further still, beyond what the human mind can readily comprehend

Niharika: A super-cluster of galaxies. Niharika is a super-cluster of galaxies — what modern science now calls a galactic supercluster. Ancient Indian texts described Niharika long before modern astronomy confirmed them. Many of the most powerful souls on Earth have come from a specific Niharika. Their intellect carries knowledge of that distant cosmic origin.

Nirakar/ Nirakaar/ Nirakari : This is formless state of a soul. This is the true divine state of a soul when soul is in the form of divine light. This is also called as the incorporeal state of a soul. In this state soul is termed as supreme soul. This is the

ultimate stage of a soul. A formless soul of this purity is what is rightly called Paramatma and ascends directly to Paramdham.

Par Brahm Parmatma: The consciousness beyond all universes. Par means beyond. Par Brahm Parmatma transcends even the individual universe. This is the Almighty Authority who holds knowledge of infinite crores of multiverse. He is sometimes referred to as Behad ka Baap — the Supreme Father of all infinite creation.

Param Agni: Supreme fire, one of the three Param Tattvas of which the causal body is composed in Shivpuri.

Param Akash: Supreme ether; a higher and more refined element than ordinary Akash. Together with Param Vayu and Param Agni, it constitutes the Param Tattvas of the causal body.

Param Gyan: Supreme knowledge; the highest understanding of reality and the soul.

Param Maha Brahmand: A universe. The larger structure within which galaxies are contained.

Param Maha karan Sharir / Param Mahakaran Sharir: The supreme great-causal body; the deepest level at which the soul carries the bonds of karma. Liberation at this level marks the soul's emergence into its full and undimmed nature.

Param Maha Karan/ Param Mahakaran : The supreme great causal body related to universe; the deepest layer of the causal dimension.

Param Maha Shiv: The incorporeal creator of a universe (Param Maha Brahmand). He resides in the supreme abode Paramdham of the universe. ; the supreme authority above the Mahashiv. the creator of all Mahashivs

Param Tatva: Supreme elements; the purified, elevated form of the five basic elements. the fundamental substance of higher real creations. Just as a nucleus is finer than an atom, param tattva is finer than tattva (elements). The energy of a param tattva is far greater than that of a tattva. Param Akash, Param Vayu and Param Agni are three param tattva.

Param Vayu: Supreme air element ; one of the three Param Tattvas of which causal body is composed for one particular category of higher level souls

Paramatma / Param Atma: The Supreme Soul- the creator of souls. In its true formless divine light form, a soul with tremendous power can create other souls

through sankalp. Shiv, the creator of a Solar system, is called Paramatma. In the Nirakari stage there is no real difference between the soul and the Supreme Soul.

Paramdham/ Param-dham/ Paramdhaam: The supreme abode — the original home of souls. Paramdham is the highest dimension within a Solar system — a world of pure divine light where the creator resides in formless form. Souls in Paramdham exist in complete peace, light, and bliss. It is the original home from which all souls come and to which the most advanced souls return. Also called Amarloka — the immortal realm. Every Creator of solar system, Galaxy, Universe, multiverses have their respective supreme abode in incorporeal form.

Parampita/ Param Pita: The Supreme Father; the ultimate divine being.

Paramshanti/ Param Shanti: Supreme peace — the original state of the soul. Param Shanti is not merely the absence of noise or conflict. It is the original state of the soul when it rests in its pure divine light form. It is both a living state and a vibration that can be radiated outward. That's why soul always seeks supreme peace or Paramshanti. This is stage when soul establishes itself in its pure divine incorporeal state of supreme light

Pralaya: Dissolution; the cyclic process by which worlds, Solar System and the souls within them are eventually unmade.

Sakar: Formed into a visible or realised reality.

Sakari: The physical stage of the soul. When the soul reaches Mrityulok and takes a human body of all five elements, it enters the Sakari condition; the causal and subtle bodies remain at its inner core. Physical form. When the energy of the soul degenerates further, it acquires a physical body made of

Sanatan Dharm: Before any religion established on earth, there is one religion since the beginning of creation which is eternal that is called Sanatan Dharm. Hindu religion is also known as Adi sanatan Dharm i.e. the religion which is there right from the beginning of creation which still continue to exist and it will also continue to exist in future. The eternal religion — the one religion present from the beginning of creation of this Brahmand, also known as Adi Sanatan Dharm

Sankalp Seva: Service through divine intention — is one of the highest forms of spiritual action.

Seva: Selfless service. Bapuji insists the best form of service is to disseminate supreme knowledge of self for the benevolence of soul. Now one can do also

service through affirmations also by spreading vibrations of “Paramshanti” in the atmosphere.

Shankar: *The deity who resides at Kailash along with Parvati. In Behad Gyan, Shankar is the sustainer and transformer within the solar system.*

Sthool Sharir: *The gross physical body.*

Sthool Tatva: *The gross material elements that limit physical existence.*

Subtle Body: *The non-physical body of impressions, thoughts, and tendencies that begins to form as the soul descends from Shrivpuri into Vishnupuri, where half of the Param Tattvas of the causal body recede and lower elements take their place. The subtle body accompanies the soul through its further descent into the Sakari condition.*

Sukshma Jagat / Sukshma Jagat : *The subtle, invisible world beyond ordinary physical perception. A dimension of creation composed of subtle elements, invisible to the physical eye.*

Swa Parivartan: *self-transformation. a person starts observing and transforming their own thoughts, emotions, habits, vibrations, and sanskars rather than constantly focusing on the faults of others. Behad Gyan explains that every thought creates subtle vibrations which influence not only the individual but also the surrounding environment, society, nature, and even the subtle worlds. Therefore, self-transformation is not viewed as a personal activity alone; it becomes a cosmic responsibility. When one soul becomes peaceful, pure, and spiritually awakened, its vibrations spread into the collective consciousness.*

Uch Te Uch Paramdham: *the highest of all abodes.*

Vichar-sagar-manthan: *The churning of the ocean of thought; deep reflective contemplation.*

Vishaal buddhi: *a vast and expansive intelligence. boundless intellect required to understand the Almighty Authority.*

Vishay Vikaar: Impurities of desire and ego. Refers to the collective impurities: attachment, desire, lust, anger, greed, and ego. These keep the soul trapped in lower consciousness. To receive Brahm Gyan, one must be completely free of Vishay Vikaar.

Vishwa Parivartan: World transformation; the grand mission of changing the mortal world into an immortal one.

Vyakt: The visible world of five gross elements.
